Detailed Fiscal Analysis

The bill simply gives the local agency the flexibility to contract with a provider outside the state in order to provide services to Ohio clients who work outside the state. It does not provide increased or decreased funding to accommodate this flexibility. LBO assumes that many of the clients are currently receiving subsidized day care services in Ohio and will simply transfer to out of state vendors.

However, there is a possibility that the demand for day care services may increase if the bill prompts eligible persons, who are not applying now due to access and logistical issues, to seek child care. However, the resources that fund day care are limited to what the legislature appropriated. Thus, irrespective of demand, expenditures cannot exceed the current appropriation level.
