

LSC Redbook

Analysis of the Executive Budget Proposal

Department of Medicaid

Ivy Chen, Principal Economist
Wendy Risner, Fiscal Supervisor
Gregory Craig, Economist

Legislative Service Commission

February 2015

READER'S GUIDE

The Legislative Service Commission prepares an analysis of the executive budget proposal for each agency. These analyses are commonly called "Redbooks." This brief introduction is intended to help readers navigate the Redbook for the Ohio Department of Medicaid (ODM), which includes the following five sections.

1. **Overview:** Provides a brief description of the Medicaid Program and ODM, highlights of the current biennium, and an overview of the provisions of the executive budget that affect ODM, including major new initiatives.
2. **Facts and Figures:** Provides additional data on the Ohio Medicaid Program.
3. **Analysis of Executive Proposal:** Provides a detailed analysis of the executive budget recommendations for ODM, including funding for each appropriation line item.
4. **Medicaid Primer:** Provides an overview of Medicaid basics.
5. **Attachments:** Includes the Catalog of Budget Line Items (COBLI) for ODM, which briefly describes each line item, and the LSC budget spreadsheet for ODM.

- Ohio Medicaid provides health care coverage to over 2.9 million Ohioans

OVERVIEW

Medicaid Program Overview

Medicaid is a publicly funded health insurance program for low-income individuals. It is a federal-state joint program: administered by the states and funded with federal, state, and, in some states like Ohio, local revenues. The federal government establishes and monitors certain requirements concerning funding, eligibility standards, and quality and scope of medical services. In Ohio, Medicaid covers as many as 2.9 million low-income adults, children, pregnant women, seniors, and individuals with disabilities each year. Ohio Medicaid is the largest health insurer in the state. It is also the largest single state program with annual spending of about \$25 billion in combined federal and state dollars. Medicaid accounts for 4% of Ohio's economy. Medicaid services are an entitlement for those who meet eligibility requirements. Entitlement means that if an individual is eligible for the program then they are guaranteed the benefits and the state is obligated to pay for them.

Another federal-state joint health care program, which has been implemented as a Medicaid expansion in Ohio, is the State Children's Health Insurance Program (SCHIP). This program provides health care coverage for children in low- and moderate-income families who are ineligible for Medicaid but cannot afford private insurance.

Ohio's Medicaid Program is among the largest in the nation. It includes coverage for the following:

- 1.4 million children, from birth to age 18;
- 51% of all Ohio children under age five;
- 200,000 senior citizens;
- 51,000 individuals residing in nursing facilities; and
- 95,000 individuals in home and community-based waivers.

On January 13, 2011, the Governor created the Office of Health Transformation (OHT) to streamline the Medicaid Program and improve the overall quality of the health care system. In Ohio, Medicaid is administered by the Department of Medicaid (ODM) with the assistance of other state agencies, county departments of job and family

services, county boards of developmental disabilities, community behavioral health boards, and area agencies on aging.

The federal government requires each state to designate a "single state agency" to administer its Medicaid Program. ODM is the single state agency for Ohio under the federal regulation. As Ohio's single state agency ODM must retain oversight and administrative control of the Ohio Medicaid Program and assure the federal Centers for Medicare and Medicaid Services (CMS) that federally set standards are maintained. Federal law allows states' single agency to contract with other public and private entities to manage aspects of the program. ODM contracts with the following state agencies to administer various Ohio Medicaid programs through interagency agreements:

- Ohio Department of Aging (ODA);
- Ohio Department of Developmental Disabilities (ODODD);
- Ohio Department of Health (ODH);
- Ohio Department of Education (ODE); and
- Ohio Department of Mental Health and Addiction Services (ODMHAS).

ODA administers Medicaid programs such as the Pre-Admission Screening System Providing Options and Resources Today (PASSPORT) Medicaid waiver, the Assisted Living Medicaid waiver, and the Program for All-Inclusive Care (PACE).

ODODD provides services to disabled individuals through home and community-based Medicaid waiver programs. ODODD also provides services to severely disabled individuals at ten regional developmental centers throughout the state and pays private intermediate care facilities for Medicaid services provided to the disabled. In addition, ODODD provides subsidies to, and oversight of, Ohio's 88 county developmental disabilities (DD) boards. County boards provide a variety of community-based services including residential support, early intervention, family support, adult vocational and employment services, and service and support administration.

ODMHAS works with local boards to ensure the provision of mental health services. Ohio has community behavioral health boards, which serve all 88 counties. The boards are responsible for planning, monitoring, and evaluating the service delivery system within their geographic areas. The local boards contract with local service providers to deliver mental health services in the community.

ODH certifies long-term care and hospital providers. ODODD certifies intermediate care facilities for individuals with intellectual disabilities (ICFs/IID) beds. Certification is required for a provider to receive reimbursement from Medicaid.

ODM contracts with county departments of job and family services (CDJFSs) to perform eligibility determination and enrollment. Some of these activities are done utilizing the new integrated eligibility system: Ohio Benefits, starting October 1, 2013. Ohio Benefits will ultimately replace the eligibility system known as the Client Registry Information System-Enhanced (CRIS-E). ODM provides technical assistance to counties and assists them to implement eligibility policy.

The executive budget provides a total appropriation for the Medicaid Program of \$27.29 billion in FY 2016, a 10.2% increase over FY 2015's estimated spending of \$24.77 billion, and \$28.16 billion in FY 2017, a 3.2% increase over FY 2016. Table 1 below first shows the executive's recommendation of the total Medicaid appropriation by agency. Table 2 then shows the executive's recommendation of the appropriation for Medicaid by expense type.

Ohio Department	FY 2016	FY 2017
Medicaid*	\$24,439,920,607	\$25,037,604,938
Developmental Disabilities	\$2,611,019,417	\$2,876,185,877
Job and Family Services	\$195,628,960	\$201,228,960
Health	\$25,692,094	\$25,692,094
Mental Health and Addiction Services	\$13,736,600	\$13,736,600
Aging	\$6,770,114	\$6,770,114
Office of Health Transformation	\$860,000	\$877,446
TOTAL	\$27,293,627,792	\$28,162,096,029

*To avoid double counting, the appropriation for line item 651655, Medicaid Interagency Pass-Through, is not included in the Department of Medicaid total.

Expense Type	FY 2016	FY 2017
Services	\$26,022,387,527	\$26,907,864,470
Administrative	\$1,271,240,265	\$1,254,231,559
TOTAL	\$27,293,627,792	\$28,162,096,029
Percent of Medicaid's budget for administration	5%	4%

Note: To avoid double counting, the appropriation for line item 651655, Medicaid Interagency Pass-Through, is not included in the Department of Medicaid total.

The tables above show that the appropriations for Medicaid service expenditures make up a majority of the recommended funding for the Medicaid Program, for FY 2016 at 95% and for FY 2017 at 96%, while approximately 5% in FY 2016 and 4% in FY 2017 of Medicaid's budget is for the Medicaid-related administrative activities.

Table 3 below shows the executive recommended appropriations for Medicaid funding for all agencies by fund group.

Table 3. Executive Budget Recommendations for the Medicaid Program by Fund Group		
Fund Group	FY 2016	FY 2017
General Revenue	\$18,499,570,001	\$19,650,108,808
<i>Federal Share</i>	<i>\$12,530,677,004</i>	<i>\$13,315,715,821</i>
<i>State Share</i>	<i>\$5,968,892,997</i>	<i>\$6,334,392,987</i>
Dedicated Purpose Fund	\$2,703,202,279	\$2,579,373,611
Federal Fund	\$6,078,855,512	\$5,920,613,610
Internal Service Activity Fund	\$11,000,000	\$11,000,000
Holding Account Fund	\$1,000,000	\$1,000,000
TOTAL	\$27,293,627,792	\$28,162,096,029

Note: ODM will pass through the federal reimbursement to local providers under the Medicaid School Progra

General Revenue Fund (GRF) appropriations account for the largest portion (69%) of the executive recommended funding for the Medicaid Program. About 68% of the GRF funding is federal Medicaid reimbursement. Federal funds account for the next largest share of recommended funding at 22%. Federal funds include the federal reimbursement for Medicaid services and administrative activities that are spent out of GRF or non-GRF line items.

Dedicated Purpose Fund accounts for 10% of the recommended funding. Sources of these funds mainly include the following:

- Revenue generated from the hospital assessments;
- Revenue generated from the nursing home and hospital long-term care unit franchise permit fees;
- Revenue generated from the intermediate care facilities for individuals with intellectual disabilities (ICFs/IID) franchise permit fee;
- Prescription drug rebate revenue; and
- Recoveries from the third-party liability.

Table 4 below provides estimates of the revenue that the state is expected to collect for the various provider types.

Table 4. Estimated Franchise Fee Revenue (Dollars in millions)		
Provider Type	FY 2016	FY 2017
Hospital	\$661	\$695
Nursing Facility	\$400	\$400
ICF/IID	\$45	\$44
TOTAL	\$1,106	\$1,139

Table 5 below shows the executive's recommended budget for using the various franchise fee revenue and the corresponding federal share by appropriation line item. If the state spends the franchise fee revenue on Medicaid-related services or activities, the state can draw down federal reimbursement.

Table 5. Franchise Fee Revenue and the Corresponding Federal Share by ALIs (Dollars in millions)				
Fund	ALIs	State or Federal Share	FY 2016	FY 2017
5GF0	651656	State	\$661	\$695
3F00	651623	Federal	\$1,102	\$1,152
	Hospital Total		\$1,763	\$1,847
5R20	651608	State	\$400	\$400

3G60	653639	Federal	\$18	\$18
3A40	653653	Federal	\$46	\$46
	ICF/IID Total		\$110	\$108
	TOTAL		\$2,940	\$3,019
	Assumed FMAP		62.51%	62.38%

Agency Overview

ODM is the single state agency for Ohio under the federal regulation to administer Ohio's Medicaid Program. Ohio's Medicaid Program provides health care coverage to children, pregnant women, families, adults, seniors, and people with disabilities who have limited income. Many of the people served by Medicaid obtain medical care at no cost, however, some must pay copayments for certain services. Once enrolled, Medicaid

consumers gain coverage for doctor visits, hospital care, well-child visits, home health, long-term care, and more.

Staffing Overview

ODM submitted a budget request for 816 staff for the FY 2016-FY 2017 biennium. Table 6 below lists the number of employees in each area as requested by ODM.

Table 6. Department of Medicaid Requested Staffing Level		
	# of Employees	% of Total
Operations	299	36.6%
Policy	111	13.6%
Chief of Staff	94	11.5%
Fiscal Operations	90	11.0%
Information & Technology Services	70	8.6%
Chief Strategy Office/Project Management Office	68	8.3%
Clinical Quality & Research	65	8.0%
Legal	12	1.5%
Communications	4	0.5%
Office of the Director	2	0.2%
Legislation	1	0.1%
TOTAL	816	100.0%

Staff in the "Operations" category account for the largest share (299 employees, 37%) of ODM requested employees. Staff in this area is responsible for enrolling, re-enrolling, sanctioning, and terminating Medicaid providers; completing state and federal mandatory provider screening activities; provider network training and education; the payment and reconciliation of claims; and operations of a provider network call center that offers ongoing technical support. Operations staff also manages relationships with outside vendors under contract to perform onsite inspections of facilities and providers.

Staff in the "Policy" category accounts for the second largest share (111 employees, 14%) of ODM requested employees. Staff in this area manages the administration of Ohio's Medicaid benefit coverage and eligibility requirements. Work activities include policy and rule development, state plan amendment requests, managed care enrollment and contract administration, rate setting, and payment policy. Staff works with health care providers, consumers, other health insurers, state, county and federal agencies, professional associations, and advocacy groups.

Staff in the "Chief of Staff" category accounts for the third largest share (94 employees, 12%) of ODM requested employees. Staff in this area provides administrative support to the Medicaid Program through oversight of the contract and

procurement process, human resource management, and program integrity. The Surveillance Utilization and Review Section of the integrity group seeks to identify and recover payments from providers who were ineligible for payment.

Staff in the "Fiscal Operation" category is responsible for providing financial oversight of the Medicaid Program and aligning the budget with the strategic vision for health and human services.

Staff in the "Chief Strategy Office/Project Management Office" category is responsible for cross-functional and cross-agency projects. Staff in this area is responsible for advanced planning documents and federal and state compliance, including HIPAA privacy and security. Staff in this area is also responsible for information technology change management and for research and data analytics.

Staff in the "Clinical Quality & Research" category is responsible for the clinical decisions, quality measures and outcomes, and compliance and safety checks to oversee services delivered through Ohio Medicaid. Work activities include development and implementation of quality measures, prior authorization, and health and safety reviews that will inform policy decisions and improved health outcomes.

Appropriations Overview

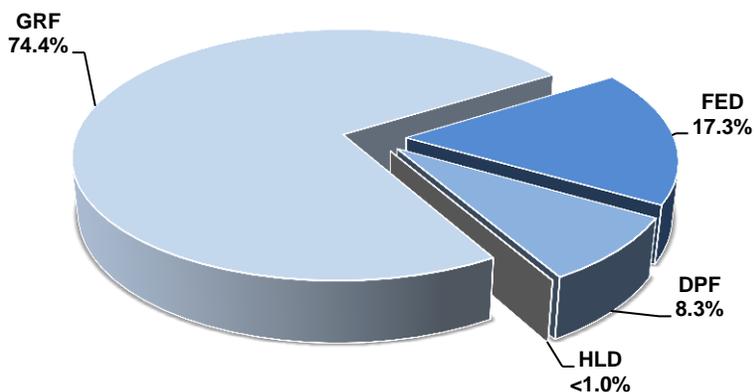

Appropriations by Fund Group

The executive budget provides a total appropriation for ODM of \$24.53 billion in FY 2016 and \$25.13 billion in FY 2017. Table 7 shows the executive recommended appropriations by fund group.

Fund Group	FY 2016	FY 2017
General Revenue (GRF)	\$17,931,797,285	\$19,022,178,639
<i>Federal Share</i>	<i>\$5,401,120,281</i>	<i>\$5,706,462,818</i>
<i>State Share</i>	<i>\$12,530,677,004</i>	<i>\$13,315,715,821</i>
Dedicated Purpose Fund (DPF)	\$2,150,122,614	\$1,971,008,527
Federal Fund (FED)	\$4,448,400,708	\$4,134,823,772
Holding Account Fund (HLD)	\$1,000,000	\$1,000,000
TOTAL	\$24,531,320,607	\$25,129,010,938

Chart 1 presents the executive recommended appropriations by fund group as well.

Chart 1: Executive Budget Recommendations for ODM by Fund Group, FY 2016-FY 2017

Note: Percentages may not total 100 due to rounding.

As shown in the chart above, appropriations from the GRF make up a majority of the recommended funding for ODM for the biennium at 74.4%. The GRF appropriations include the Medicare Part D clawback payments, and the state share for Medicaid service expenditures. The GRF appropriations also include the federal grant amounts (federal reimbursement) for Medicaid service expenditures.

The Federal Fund Group accounts for the next largest portion of recommended funding for ODM at 17.3%, which include federal reimbursement from Medicaid payments for both service and administrative expenditures. The Dedicated Purpose Fund Group accounts for 8.3% and the Holding Account Fund accounts for less than 1.0%.

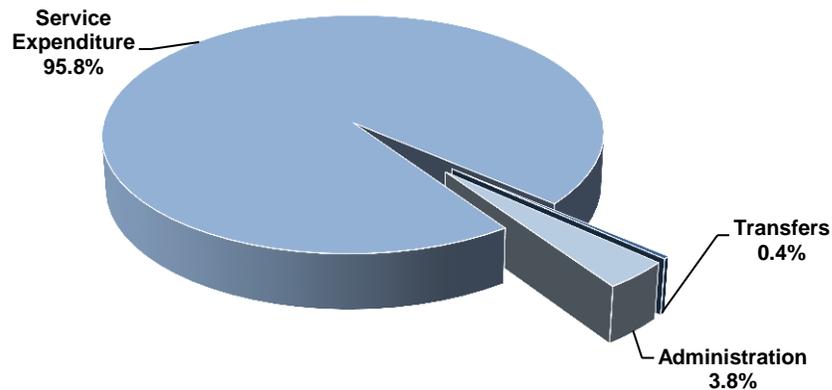

Appropriations by Expense Type

Table 8 shows the executive recommended appropriations by expense type.

Table 8. Executive Budget Recommendations for ODM by Expense Type		
Expense Type	FY 2016	FY 2017
Services	\$23,485,889,607	\$24,106,899,938
Transfers to Other Agencies	\$91,400,000	\$91,406,000
Administrative	\$954,031,000	\$930,705,000
TOTAL	\$24,531,320,607	\$25,129,010,938

Chart 2 shows the executive recommended appropriations by expense type as well. Approximately 95.8% of ODM's budget is paid out as subsidies to persons receiving Medicaid services.

**Chart 2: Executive Budget Recommendations for ODM
by Expense Type, FY 2016-FY 2017 Biennium**

ODM will spend approximately \$1.88 billion (3.8%) of its recommended budget for the biennium for operating expenses including personal services, purchased services, maintenance, and equipment. ODM will pass through approximately \$182.8 million of federal reimbursement over the biennium to other agencies for their Medicaid administration and services.

List of Acronyms

ABD – Aged, Blind, and Disabled
ACA – Patient Protection and Affordable Care Act
ACO – Accountable Care Organization
ARRA – American Recovery and Reinvestment Act of 2009
CDJFS – County Department of Job and Family Services
CFC – Covered Families and Children
CHIPRA – Children's Health Insurance Program Reauthorization Act of 2009
CMMI – Centers for Medicare and Medicaid Innovation
CMS – Centers for Medicare and Medicaid
DD – Developmental Disabilities
DRG – Diagnosis-Related Group
DSH – Disproportionate Share Hospital
DVS – Department of Veteran Services
eFMAP – Enhanced Federal Medical Assistance Percentage
FFS – Fee-for-Service
FMAP – Federal Medical Assistance Percentage
FPL – Federal Poverty Lines
GME – Graduate Medical Education
HCAP – Hospital Care Assurance Program
HCBS – Home and Community-Based Services
HIC – Health Insuring Corporation
ICF – Intermediate Care Facility
ICF/IID – Intermediate Care Facility for Individuals with Intellectual Disabilities

SPA – State Plan Amendment

FY 2016-FY 2017 Biennium New Initiatives with Budget Impact

Table 9 below provides a summary of the FY 2016-FY 2017 biennial budget initiatives proposed in H.B. 64, As Introduced, and the fiscal impact of each.¹ It also serves as a crosswalk to guide the reader to the corresponding brief summary for each of the initiatives. For example, as seen in the table, the summary for the first initiative listed, "Eliminate coverage for non-ABD Adults above 138% FPL," can be found under Initiative Number 1 below.

Table 9. FY 2016-FY 2017 Biennium New Initiatives with Budget Impact (Dollars in millions)							
Initiative Number	Initiatives	FY 2016		FY 2017		Biennium**	
		State Share	All Funds	State Share	All Funds	State Share	All Funds
1	Eliminate coverage for non-ABD Adults above 138% FPL	-\$7.4	-\$15.3	-\$15.4	-\$31.4	-\$22.8	-\$46.7
2	Reduce TMA Plan to 6 months	-\$1.5	-\$4.2	-\$15.0	-\$39.9	-\$16.6	-\$44.1
3	Set managed care rates at the lower bound	-\$13.4	-\$35.8	-\$43.4	-\$115.5	-\$56.8	-\$151.2
4	Use one-time unearned managed care quality incentive funds	-\$19.3	-\$51.4	-\$89.1	-\$236.9	-\$108.4	-\$288.3
5	Reform payment methodology for detail-coded drugs	-\$8.3	-\$22.2	-\$16.7	-\$44.3	-\$25.0	-\$66.5
6	Consolidate outpatient charges within 72 hours of an inpatient visit	-\$2.1	-\$5.6	-\$4.2	-\$11.1	-\$6.3	-\$16.7
7	Eliminate 5% rate add-on for outpatient services	-\$18.7	-\$49.9	-\$40.1	-\$106.7	-\$58.8	-\$156.6
8	Reduce potentially preventable hospital readmissions	-\$5.1	-\$13.6	-\$12.1	-\$32.0	-\$17.1	-\$45.6
9	Implement correct coding standards for hospital claims processing	-\$2.0	-\$5.4	-\$3.6	-\$9.6	-\$5.6	-\$15.0
10	Simplify and increase the Hospital Franchise Fee	-\$95.6	-\$255.1	-\$118.1	-\$313.8	-\$213.7	-\$568.9
11	Reduce NF reimbursements for low-acuity individuals	\$0	\$0	-\$8.8	-\$23.5	-\$8.8	-\$23.5
12	Implement an EVV system for home health	\$0	\$0	-\$1.9	-\$9.5	-\$1.9	-\$9.5
13	Redesign home health and private duty nursing benefits	\$0	\$0	-\$3.6	-\$9.6	-\$3.6	-\$9.6

*These numbers represent the net effect of the provision described under item 16 below.

**Biennium totals may not add due to rounding.

1. Eliminate Medicaid Coverage for Non-ABD Adults above 138% FPL

The executive proposes, beginning January 1, 2017, to eliminate Medicaid coverage for individuals who have modified adjusted gross income (MAGI) above 138% FPL in the Pregnant Women, Family Planning, and Breast and Cervical Cancer Prevention (BCCP) groups. These populations are currently covered at MAGI levels up to 200% FPL. Individuals enrolled in the Pregnant Women and BCCP groups at the time of the change will be eligible to receive services through Medicaid until their eligibility expires under current rules. Individuals with incomes above 138% FPL are eligible for federal subsidies through the health insurance exchange. This proposal is estimated to save \$15.3 million (\$7.4 million state share) in FY 2016 and \$31.4 million (\$15.4 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

2. Reduce the Transitional Medical Assistance Plan to six months

The executive proposes to reduce the duration of the Transitional Medical Assistance (TMA) period from 12 months to six months. The TMA takes effect when a parent or caretaker relative's earned income increases above the eligibility threshold for the group. The TMA provides temporary continued eligibility in order to ease an individual's transition from Medicaid due to an improved financial situation. This

proposal also institutes a quarterly income reporting requirement. If an individual's income remains below 185% FPL and they fulfill the quarterly reporting requirement, the individual will be granted six additional months of eligibility. This provision is estimated to save \$4.1 million (\$1.5 million state share) in FY 2016 and \$39.9 million (\$15.0 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

3. Set Managed Care Rates at the Lower Bound

The executive proposes to set managed care capitation rates at the lower bound beginning January 1, 2016. ODM contracts with Mercer Health & Benefits, LLC, which annually determines a range of actuarially sound capitation rates for different populations (e.g., ABD Adult) for use by Ohio's Medicaid managed care plans (MCPs). Setting the capitation rate at the lower bound is anticipated to reinforce efficient operations by the Medicaid managed care plans and to streamline internal processes at the state level. This provision is estimated to save \$35.8 million (\$13.4 million state share) in FY 2016 and \$115.5 million (\$43.4 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

4. Use One-Time Unearned Managed Care Quality Incentive Funds

H.B. 64, As Introduced, uses unspent funds from the Medicaid Managed Care Incentive Fund (Fund 5KW0) beginning on July 1, 2016 to offset one-time GRF costs associated with transitioning current fee-for-service populations into managed care. This provision is estimated to save \$51.4 million (\$19.3 million state share) in FY 2016 and \$236.9 million (\$89.1 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

5. Reform Payment Methodology for Detail-Coded Drugs

The executive proposes to pay for drugs based on the Medicaid physician fee schedule instead of on hospital costs when these drugs are administered by hospitals in an outpatient setting or independently billed by hospitals. Currently, in some cases hospitals are reimbursed at 60% of their hospital-specific costs for administering drugs under the above conditions. Any drug not listed on the Medicaid physician fee schedule, however, will still be reimbursed at 60% of cost. This provision is estimated to save \$22.2 million (\$8.3 million state share) in FY 2016 and \$44.3 million (\$16.7 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

6. Consolidate Outpatient Charges within 72 Hours of an Inpatient Visit

The executive proposes to require hospitals to include any outpatient charges that occur 72 hours before or after an inpatient stay to be included on that inpatient claim. Hospitals are currently required to include only those outpatient charges which

occur 24 hours before or after an inpatient visit. This provision will also work in tandem with episodes of care programs, such as the State Innovation Model. This provision is estimated to save \$5.6 million (\$2.1 million state share) in FY 2016 and \$11.1 million (\$4.2 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

7. Eliminate 5% Rate Add-on for Outpatient Services

The executive plans to eliminate the temporary 5% rate increase for outpatient hospital services for all but children's hospitals. The executive maintains that this rate add-on is unnecessary due to Medicaid expansion, as hospital uncompensated care costs are decreasing. This temporary rate increase is set to expire in December 2015. This provision is estimated to save \$49.9 million (\$18.7 million state share) in FY 2016 and \$106.7 million (\$40.1 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

8. Reduce Potentially Preventable Hospital Readmissions

The executive proposes to implement potentially preventable readmissions (PPR) software that analyzes clinically related readmissions across hospital providers. Ohio Medicaid currently targets PPR claims at the same hospital within 30 days, but does not target PPR claims across providers. Ohio's current average inpatient hospital PPR rate is 9.2%; Ohio Medicaid anticipates this rate declining by 1% annually with the implementation of this software. In addition, ODM will implement a PPR benchmark and will assess a 1% penalty on hospitals that exceed this benchmark. Together, these provisions are estimated to save \$13.6 million (\$5.1 million state share) in FY 2016 and \$32.0 million (\$12.1 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

9. Implement Correct Coding Standards to Hospital Claims Processing

The executive plans to implement, by January 1, 2016, National Correct Coding Initiative (NCCI) methodologies and edits into the Medicaid Information Technology System (MITS) to properly process outpatient Medicaid claims in accordance with federal regulations. This provision is estimated to save \$5.4 million (\$2.0 million state share) in FY 2016 and \$9.6 million (\$3.6 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

10. Simplify and Increase the Hospital Franchise Fee

The executive proposes to streamline the Hospital Franchise Fee Program by establishing a fixed assessment rate of 3.0% (an increase of 0.3 percentage points from the current rate of 2.7%) and by working with the hospital industry to create a collection schedule that takes into account the cash flow needs of hospitals. Currently, the assessment rate must be established each program year by amending the Ohio and

Administrative Code; this causes delays in the assessment and collection of fees and places an undue burden on hospitals. It is anticipated that the state will collect an additional \$107 million in FY 2016 and \$142 million in FY 2017. A total of \$12 million in FY 2016 and \$24 million in FY 2017, and the corresponding federal shares, will go back to hospitals through the upper payment limit program. The net impact is a savings of \$255.1 million (\$95.6 million state share) in FY 2016 and \$313.8 million (\$118.1 million state share) in FY 2017.

11. Reduce NF Reimbursement for Low-Acuity Individuals

The executive proposes to reduce reimbursement payments to nursing facilities for the lowest acuity individuals from \$130 per resident day to \$91.70 per resident day (a decrease of roughly 29.5% per bed day); the proposed rate is more in line with what it would cost to serve these individuals in a community setting. This provision is estimated to save \$23.5 million (\$8.8 million state share) in FY 2017.

12. Implement an Electronic Visit Verification System for Home Health

The executive plans to implement an Electronic Visit Verification (EVV) system for home health providers to validate service delivery to eligible individuals by authorized service providers. An EVV system reduces fraudulent activity by using technologic solutions, including telephony, GPS tracking, and biometrics, to authenticate the presence of service and by allowing the recipient of care to confirm that they are receiving care at the time of service delivery. This provision is estimated to save \$9.5 million (\$1.9 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.²

13. Redesign the Home Health and Private Duty Nursing Benefit

The executive plans to redesign the home health and private duty nursing benefit toward a short-term acute care benefit for those individuals who are not part of a managed care plan or home and community-based services (HCBS) waiver, and toward managed care or an HCBS waiver for those individuals who receive long-term care. This provision is estimated to save \$9.6 million (\$3.6 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

14. Recoup Certain Physician Payments

The executive proposes extending Ohio Medicaid's retrospective review and technical denial policy to any physician claim associated with a technical denial received by a hospital. This policy is currently only applied toward hospitals

² The appropriation items 651425 and 651624 experience investment costs as a result of this provision; the numbers described here represent the net effect of this provision.

themselves. This provision is estimated to save \$26,000 (\$10,000 state share) in FY 2016 and \$51,000 (\$19,000 state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

15. Support Payment Innovation

The executive plans to implement innovative payment models, including paying for better coordinated care and improved outcomes through patient-centered medical homes. Such payment innovations were developed as a result of the convention in 2013 of Governor Kasich's Advisory Group on Health Care Payment Innovation to align public and private health care purchasing power to reward the value of services, not the volume. This provision is estimated to cost \$1.0 million (\$375,000 state share) in FY 2016 and save \$5.0 million (\$1.9 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

16. Increase Medicaid Primary Care and Dental Rates

The executive plans to increase payments to eligible Medicaid providers that bill for office or outpatient services codes, and preventative services codes. Ohio Medicaid will provide an enhanced payment amount to any practitioner (e.g., physicians, advanced practice nurses, physician assistants, and clinics) who bills for the specified primary care codes through both fee-for-service and managed care delivery systems. The executive also increases dental provider rates by 1%. Neither physician services nor dental provider rates have received an increase since 2000. The primary care rate increase is projected to cost \$42.1 million (\$15.8 million state share) in FY 2016 and \$109.2 million (\$41.1 million state share) in FY 2017, while the dental provider rate increase is projected to cost \$1.5 million (\$562,000 state share) in FY 2016 and \$3.0 million (\$1.1 million state share) in FY 2017, for a total cost of \$43.6 million (\$16.3 million state share) in FY 2016 and \$112.2 million (\$42.2 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services. This cost, however, is to be offset entirely by savings achieved through the following proposals:

- **Apply the Medicaid maximum payment to Medicare crossover claims:** proposes to only reimburse up to the Medicaid maximum for all Part B categories of service, including physician services. For dual eligible individuals, states have the option to pay either the patient's Medicare cost sharing amount (typically 20%) or reimburse up to the Medicaid maximum amount. Ohio currently reimburses up to the Medicaid maximum for all services except physician services. This provision is estimated to save \$43.1 million (\$16.2 million state share) in FY 2016 and \$86.2 million (\$32.4 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

- **Convert subsidies for medical education into a primary care rate increase:** transfers \$25 million (\$9.4 million state share) from Medicaid graduate medical education (GME) to teaching hospitals to support a primary care rate increase in FY 2017.
- **Eliminate enhanced payment to Holzer Clinic:** eliminates the enhanced reimbursement rate for the Holzer Clinic Network and reverts payment to the standard Medicaid physician fee schedule beginning January 1, 2016. According to OHT, since 1992, the Holzer Clinic has been reimbursed at 140% of the Medicaid physician fee schedule. The enhanced rate was set because the Holzer Hospital did not provide outpatient hospital services, and the enhanced payment approximated what the total payment amount would have been had claims for service been billed by both the hospital and the physician group practice. The enhanced rate supported one rural clinic. However, the Holzer Clinic expanded to ten new delivery sites and expansion continues, with every new site receiving enhanced reimbursement. This provision is estimated to save \$500,000 (\$187,000 state share) in FY 2016 and \$1.0 million (\$376,000 state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

17. Expand the Medicaid in Schools Program

The executive plans to expand the Medicaid in Schools Program (MSP) to include intensive behavioral services provided by a Certified Ohio Behavioral Analyst (COBA), services provided by an aide under the direction of a registered nurse or COBA, and specialized transportation from a child's home to school as services that may be included in a student's Individualized Education Plan (IEP). Services currently allowable under an IEP include behavioral, nursing, occupational therapy, targeted case management, and specialized transportation. Ohio Medicaid reimburses schools through the MSP program for services provided to children with an IEP. The school is responsible for providing services, but can draw federal funds through the MSP program to reimburse 63% of the cost. There are currently 580 school systems enrolled in the MSP program serving 61,000 Medicaid-eligible students with an IEP. This provision is projected to allow school districts to claim federal funds totaling \$22.2 million in FY 2016 and \$24.3 million in FY 2017 for services that the school districts otherwise would have had to provide with their own funds. This provision will have no impact on the state GRF, as school districts provide the local match, through expenditures tied to eligible IEP services, to draw federal Medicaid funds.

18. Rebase Nursing Facility Rates with a Different Grouper Update

The executive proposes to update rates beginning in FY 2017 using calendar year 2013 costs as a basis. The update is required by current law and will result in rates more

reflective of current health care costs and Ohio nursing facility service delivery. Rebasing also allows for the opportunity to update the resource utilization group (RUGs) methodology used to measure resident acuity in the state's nursing facilities, from RUGS III to RUGS IV to coincide with the calculation of new rate components during the rebasing process. Rebasing and implementing a new grouper is estimated to cost \$84.1 million (\$31.7 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.³ This increased spending will be put entirely toward a new quality improvement program described below.

19. Pay for Quality

The executive proposes that the entire \$84.1 million spending increase related to rebasing be used to support a new quality framework in which the current quality framework is eliminated and that funding is incorporated into the direct care component of the rate. The payment for quality will be replaced with a "Quality Reserve" which nursing facilities may earn back by meeting five quality care objectives related to outcomes and Medicaid spending and include two staffing measures and three clinical measures. Nursing facilities must meet all five benchmarks to receive the full payment. The five measures include:

- Minimum staffing levels for nursing and state tested nursing assistants;
- Consistent assignment of nurse aides;
- Rate of pressure ulcers across the facility census (both long-stay and short-stay measures);
- Rate of atypical antipsychotic use (both long-stay and short-stay measures); and
- Rate of avoidable inpatient admissions from nursing facilities.

20. Program Integrity Initiatives

The executive proposes to procure an advanced data analytics system for pre- and post-payment review. This system intends to use Ohio Medicaid's access to enormous amounts of data in order to enhance program integrity efforts and detect billing patterns tied to potential fraud, waste, or abuse. This provision is estimated to cost \$9.0 million (\$1.6 million state share) in FY 2016 and cost \$0 (\$1.3 million state share savings) in FY 2017. This system is projected to pay for itself and begin to produce savings by FY 2017.

³ These numbers represent the net impact of the two proposals. Rebasing nursing facilities is estimated to cost \$153.8 million (\$57.9 million state share) in FY 2017, while updating to RUGS IV is estimated to save \$69.7 million (\$26.2 million state share) in FY 2017, both out of appropriation line item 651525.

21. Streamline Medicaid Disability Eligibility and Eliminate Spend Down

The executive plans to transition from what is known as a 209(b) state under Title XIX of the federal Social Security Act (SSA) to what is known as a 1634 state under Title XVI of the SSA. As a 209(b) state, Ohio currently places more restrictive qualifications on Medicaid disability eligibility than do states with 1634 status. The following changes (and their projected budget impacts) will occur as a result of this transition:

- Replace Ohio's two duplicative disability eligibility determination systems with one system administered by Opportunities for Ohioans with Disabilities (OOD) that will determine eligibility for both Medicaid and Supplemental Security Income (SSI). This is estimated to save \$6.0 million (\$3.0 million state share) in FY 2016 and \$7.4 million (\$3.7 million state share) in FY 2017 in GRF appropriation item 651425, Medicaid Program Support – State, and in FED Fund 3F00 appropriation item 651624, Medicaid Program Support – Federal.⁴
- Raise the income standard for Medicaid from 64% FPL to 75% FPL (to match SSI) and raise the asset test from \$1,500 to \$2,000, which would result in approximately 7,110 additional Ohioans qualifying for Medicaid. This is expected to cost \$51.4 million (\$19.3 million state share) in FY 2016 and \$65.0 million (\$24.4 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.
- Eliminate the Medicaid spend down provision, which allows individuals to spend down their assets on medical expenses in order to qualify for Medicaid. This would result in approximately 4,500 Ohioans no longer being eligible for Medicaid. This is estimated to save \$47.1 million (\$17.7 million state share) in FY 2016 and \$59.6 million (\$22.4 million state share) in FY 2017 in GRF appropriation item 651525, Medicaid/Health Care Services.

In total, these provisions are estimated to save \$1.7 million (\$1.4 million state share) in FY 2016 and \$2.0 million (\$1.7 million state share) in FY 2017 in the aforementioned line items.

22. Create a Special Benefit Program for Adults with Severe Mental Illness

The executive proposes to create a special benefit program for adults with severe and persistent mental illness (SPMI) who lose coverage as a result of the spend down changes detailed above. The majority of those who lose coverage due to these changes are adults with SPMI. While these individuals have access to services through Medicare

⁴ The appropriation items 651425 and 651624 experience investment costs and savings as a result of this provision; the numbers described here represent the net effect of this provision.

and private insurance, neither option pays for the types of community support activities and care coordination provided under Medicaid. As such, Ohio Medicaid will seek a state plan amendment under section 1915(i) of the Social Security Act to provide for eligibility for adults with SPMI with income up to 225% FPL who are not eligible under another Medicaid category and who meet diagnostic and needs assessment criteria established by the state and validated by a third party entity. Ohio Medicaid will also identify HCBS services needed by this population to be covered as services under the 1915(i) authority. These services will be developed in conjunction with a broader benefit redesign, and ODMHAS staff will conduct outreach efforts with behavioral health providers and consumer and family organizations to ensure support for the targeted population. This provision is projected to cost \$34.4 million (\$12.9 million state share) in FY 2016 and \$43.5 million (\$16.4 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.

23. Improve Care Coordination and Outcomes through Managed Behavioral Health Care

The executive plans to restructure all Medicaid-reimbursed behavioral health services under some form of managed care in order to improve care coordination and overall outcomes for people with mental health and addiction services needs. ODM and ODMHAS will coordinate this effort, beginning with structured processes for stakeholder input to occur in March 2015. This provision is estimated to cost \$68.9 million (\$25.9 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.

24. Give Individuals with Developmental Disabilities an Option to Enroll in Managed Care

The executive proposes to give the approximately 40,000 individuals who receive home and community-based services or who reside in developmental centers, and who are currently excluded from managed care, the option to enroll in a health plan, which in some cases may improve their access to primary care physicians, specialists, and dental services. This provision is projected to cost \$3.6 million (\$1.3 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.

25. Enroll Adopted and Foster Children in Managed Care

The executive plans to transition the 28,000 children in Ohio's child welfare system from the fee-for-service program to managed care, beginning on January 1, 2017. This transition will be monitored to ensure consistent coverage, better care coordination, and improved access to services. This provision is projected to cost \$32.2 million (\$12.1 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.

26. Give Individuals Access to Better Care Coordination Sooner

The executive proposes to change the managed care enrollment process so that an individual is able to enroll in a Medicaid managed care plan of their choosing upon enrollment, allowing for faster access to care management and better access to services. It currently takes an average of 45 days for an individual who qualifies for Medicaid to be enrolled into one of the five managed care plans. This provision is projected to cost \$38.2 million (\$13.0 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.

27. Engage At-Risk Women through Community Health Workers

Under the executive's proposals, managed care plans will be directed to use community health workers who live in the most high-risk neighborhoods to assist with the outreach to and identification of women, particularly pregnant women, to ensure their connection to ideal health care and community supports. The community health worker is expected to remove barriers to care for these women by connecting them with community services outside the health plan that support healthy living and work. Health plans are required to coordinate with local health districts to ensure that all health care and community supports are aligned toward decreasing infant mortality and improving the health of families. This provision is projected to cost \$13.4 million (\$5.0 million state share) in FY 2016 and \$13.4 million (\$5.0 million state share) in FY 2017 out of GRF appropriation item 651525, Medicaid/Health Care Services.

28. Premiums for Certain Medicaid Recipients

Beginning on January 1, 2016, childless, nonpregnant adults with income between 100% FPL and 138% FPL will be required to pay a monthly premium to the Medicaid Program. Monthly premiums will be capped so as not to exceed 2% of an individual's household income and are expected to be roughly \$20. If an individual is delinquent on premiums for three consecutive months, that individual may experience a disruption in coverage.

Ohio expanded its Medicaid Program to cover the Group VIII population through Controlling Board action on October 21, 2013. Section 1115 of the Social Security Act permits CMS to grant states the authority to charge premiums for the Group VIII population. Premiums will be calculated using a similar methodology as premiums charged in the federal marketplace exchange. This provision is estimated to save \$1.6 million in FY 2016 and \$3.2 million in FY 2017 (all state share) in GRF appropriation item 651525, Medicaid/Health Care Services.

Highlights of FY 2014-FY 2015 Biennial Budget

The following section highlights major policy changes assumed or included in the FY 2014-FY 2015 biennial budget.

Eligibility

ACA Expansion

The most recent eligibility changes to Medicaid came with the enactment of the Patient Protection and Affordable Care Act of 2010 (ACA). The goal of the ACA was to increase access to health insurance through a coordinated system of "insurance affordability programs," including a mandatory expansion of Medicaid to all individuals under age 65 whose family income is at or below 138% FPL,⁵ and the creation of health insurance exchanges. The ACA required that nearly all U.S. citizens and legal residents have some form of qualifying private or public health insurance. This requirement was otherwise known as the "individual mandate." Compliance with the individual mandate was to be facilitated through state-based or federally facilitated online insurance exchanges and expansion of the Medicaid Program. Under the insurance exchanges, individuals with income between 100% FPL and 400% FPL could qualify for federally funded premium credits and cost sharing subsidies.

Although the ACA made Medicaid expansion mandatory for states, the U.S. Supreme Court, in its 2012 ruling, effectively made the expansion optional by prohibiting the U.S. Secretary of Health and Human Services (HHS) from withholding all or part of a state's other federal Medicaid funds for failure to implement the expansion. Ohio has chosen to implement the Medicaid expansion. On October 21, 2013, ODM requested and received Controlling Board approval to increase federal appropriation by \$561.7 million in FY 2014 and \$2.0 billion in FY 2015, which effectively allowed for Medicaid expansion in Ohio to go forward. As of December 2014, 27 other states and the District of Columbia have also expanded their Medicaid programs under the ACA.

The "newly eligible"⁶ who qualify for Medicaid coverage under ACA are often referred to as "Group VIII," the group described in section 1902(a)(10)(A)(i)(VIII) of the Social Security Act (the Act).

⁵ Under the ACA, Medicaid eligibility was expanded to 133% FPL, plus 5% income disregard. Thus, it is effectively 138% FPL.

⁶ Adults ages 19 through 64 with income at or below 133% of the federal poverty line (\$15,521 for an individual).

Presumptive Eligibility

Starting March 31, 2014, ODM extended the use of presumptive eligibility to Group VIII. As a result, county departments of job and family services and qualified providers may enroll certain individuals who are presumably eligible for Medicaid services, which will allow those individuals to receive immediate access to care. Providers are guaranteed payments for the services provided should the application later be denied.

Presumptive eligibility is a Medicaid policy option that permits states to authorize specific types of "qualified entities," such as hospitals, federally qualified health centers, and schools, to screen eligibility based on gross income and temporarily enroll eligible children or pregnant women in the Children's Health Insurance Program or Medicaid. Ohio has implemented presumptive eligibility for children and pregnant women since April 1, 2010. ACA allows presumptive eligibility to be extended to parents and adults.

Inmate Coverage

On July 1, 2013, Ohio Medicaid began to cover inmates who were either under the age of 21, over 65, or pregnant and who were hospitalized for more than 24 hours. Beginning March 17, 2014, similar coverage was extended to almost all remaining inmates through the Medicaid expansion authorized by the ACA. For inmates who became eligible for Medicaid through the ACA, the federal government pays 100% of the costs from calendar years 2014 to 2016. For all other Medicaid eligible inmates, the state and federal shares are about 37% and 63%, respectively. The required state share is paid from the GRF through the ODM budget.

Ohio Benefits

ODM launched the first phase of the Benefits.Ohio.Gov website on October 1, 2013. The new website is designed to be an online portal where individuals may apply for Medicaid and other benefits and local case workers may integrate case management and data collection functions. As of October 1, 2013, the website is able to direct applicants who are likely eligible for Medicaid to the existing Medicaid eligibility system to actually apply for benefits and others to the health insurance exchange. Beginning January 1, 2014, Medicaid eligibility determinations and benefits applications is available directly on the website for certain applicants. The new website was developed, in part, due to ACA requirements. States are required to simplify Medicaid enrollment, allow applications for various benefits to be processed online, in person, or by phone, and verify income and other eligibility criteria electronically. States are also required to use the modified adjusted gross income as the income standard for Medicaid eligibility determination purposes. Over the course of the next two years, Benefits.Ohio.Gov will replace the existing Medicaid determination system that was

built in the early 1980s. According to OHT, many eligibility determinations using the current system must be manually overridden in order to ensure that eligible applicants receive coverage. Under ACA, the federal government will pay for 75% to 90% of the new website project costs with the state paying the remaining share. The total budget for the project was \$383.5 million (\$56.8 million state share).

MetroHealth Care Plus Program

The MetroHealth Care Plus Program was approved by CMS in February 2013 under a Medicaid waiver. Under the program, eligible individuals received a comprehensive set of benefits including physician services; behavioral health services; dental services; prescription drug coverage; home care; smoking cessation; physical, occupational, and speech therapies; and durable medical equipment. In order to be eligible an individual would have to reside in Cuyahoga County, be aged 19 to 64, have an income below 133% FPL, and be uninsured. The program targeted parents and childless adults and had an enrollment cap of 30,000 participants. The program was funded with \$36 million in county tax revenues and \$64 million in federal Medicaid matching funds. No state funds were used to support this program. This program was terminated after the implementation of Medicaid expansion in Ohio.

Managed Care

MyCare Ohio

MyCare Ohio is a system of five managed care plans that coordinate physical, behavioral, and long-term care services for individuals eligible for both Medicaid and Medicare. It serves as the single point of contact for all enrollees. The goal is to contain costs and improve individual health and well-being. MyCare Ohio's benefit package includes benefits currently available through Medicare and Medicaid; however, it may also include additional services. Participants are able to choose from at least two managed care plans.

MyCare Ohio began enrolling certain eligible individuals on May 1, 2014. The program is offered in seven multi-county regions, which represent 29 counties and about 100,000 individuals.

ABD Children in Managed Care

The transition of ABD children onto managed care began on July 1, 2013. More than 37,000 children with special health care needs were enrolled into managed care. These children were previously served through the traditional Medicaid fee-for-service system.

Health Plan Rates

During the FY 2014-FY 2015 biennium, ODM made a 5% adjustment in the component of the managed care capitation rate that is driven by projected prescription drug costs and held the overall growth in capitation rate at 3% per year.

Pay for Performance

To incentivize Ohio Medicaid managed care plans to improve health outcomes, ODM implemented a Pay-for-Performance (P4P) Program based on key clinical performance measures. These measures align with Medicaid's most critical clinical conditions such as high-risk pregnancy, behavioral health, cardiovascular disease, diabetes, asthma, and upper respiratory infections. The P4P Program was designed to award more money for better results. The MCPs' results were compared to standards based on national data and were awarded more money for higher outcomes. In the first year of the program, MCPs were awarded \$29 million.

Hospital Payments

5% Rate Increase

Beginning October 1, 2009, inpatient and outpatient hospital payment rates were increased by 5% based on the rates in effect on September 30, 2009 as part of an agreement related to the hospital assessment charged by Ohio Medicaid. The 5% rate increase for inpatient services was phased out on July 1, 2013 with the implementation of the All Patient Refined – Diagnosis Related Grouper (APR-DRG). The 5% rate increase for outpatient services is set to be in place through calendar year 2015.

All Patient Refined – Diagnosis Related Grouper (APR-DRG)

In July of 2013, ODM enacted updated payment policies for inpatient hospital services. The updates replaced the outdated Diagnosis Related Grouper (DRG) system payment rates, which had not been rebased since the late 1980s. The new grouper, All Patient Refined – Diagnosis Related Grouper (APR-DRG), and updated payment rates better reflect differences in severity of illness at a more discrete level among patients.

Outlier Payments

Additional payment reforms in the current biennium included moving to an outlier methodology that is more in line with standard practices for high cost cases and moving from 34% of all cases being paid on an outlier basis to 8.7% of cases being paid on an outlier basis.

Long-Term Care Services and Supports

Nursing Facilities

Peer Group Change

For the purpose of determining the Medicaid payment rates for nursing facilities, H.B. 59 of the 130th General Assembly provided for the nursing facilities located in Mahoning and Stark counties for services provided during the period beginning October 1, 2013, and ending on the first day of the first rebasing of the rates to be treated as if they were in the peer group that includes such urban counties as Cuyahoga, Franklin, and Montgomery. H.B. 59 also provided for nursing facilities located in Mahoning and Stark counties to be placed in the peer groups that included such urban counties as Cuyahoga, Franklin, and Montgomery when ODM first rebases nursing facilities' Medicaid payment rates. ODM implemented the peer group change for dates of service on or after October 1, 2013. As a result of this change, nursing facilities in Stark and Mahoning counties received an increase in the rate paid by the Ohio Department of Medicaid.

Remove Custom Wheelchairs, Oxygen (Other Than Emergency Oxygen) and Resident Transportation Costs from the Nursing Facility Rate

H.B. 1 of the 128th General Assembly (the main operating appropriations act for FY 2010-FY 2011) included the costs of wheelchairs, oxygen, and resident transportation services among the costs included in nursing facilities' Medicaid-allowable costs. The inclusion of wheelchair, oxygen, and resident transportation costs in nursing facilities' costs is part of what has been called "bundling." Other costs that are part of bundling include over-the-counter pharmacy products, physical therapy, occupational therapy, speech therapy, and audiology. Bundling affects nursing facilities' Medicaid payments.

H.B. 59 of the 130th General Assembly removed custom wheelchairs from nursing facilities' Medicaid-allowable costs, as well as repairs to and replacements of custom wheelchairs and parts that are made in accordance with the instructions of the physician of the individual who uses the custom wheelchair. The bill also removed oxygen (other than emergency oxygen) and resident transportation services from nursing facilities' Medicaid-allowable costs. All of the removals took effect January 1, 2014.

Increase in Personal Needs Allowance

H.B. 59 of the 130th General Assembly increased the amount of the monthly Personal Needs Allowance (PNA) for Medicaid recipients residing in nursing facilities as follows:

1. For 2014, increases the amount to not less than \$45 (from \$40) for an individual and not less than \$90 (from \$80) for a married couple; and

2. For 2015 and each calendar year thereafter, increases the amount to not less than \$50 for an individual and not less than \$100 for a married couple.

A PNA is the amount of income nursing home residents with Medicaid coverage are allowed to keep for their own use for items not covered by Medicaid, such as clothing, personal items, and newspapers. The last time PNA was adjusted was in 1997.

Seeking Federal Benefits for Veterans in Nursing Facilities

H.B. 59 of the 130th General Assembly authorized ODM to collaborate with the Department of Veterans Services (DVS) regarding the coordination of veterans' services. It authorized ODM and DVS to implement, during FY 2014 and FY 2015, certain initiatives that they determine would maximize the efficiency of the services and ensure that veterans' needs are met. On January 29, 2013, OHT approved \$260,000 for a pilot project to identify veterans on Medicaid and connect them to veterans' benefits. According to OHT, work is underway to expand the project statewide.

Balancing Incentive Program

In September 2014, expenditures on home and community-based services (HCBS) for the elderly and disabled represented 50% of the total Medicaid long-term care budget. This objective was reached one year before the federal deadline required for states participating in the Balancing Incentive Program (BIP). BIP provides grants, in the form of an enhanced federal medical assistance percentage rate, to states to help increase access to home and community-based services. Ohio is expected to receive a total of \$169 million before the program ends September 30, 2015.

Participating states are required to meet programmatic and structural reform requirements, including the establishment of a no-wrong door/single entry point system whereby an individual will have access to information about all services available regardless of which agency the individual made initial contact with. Ohio will accomplish this requirement through the statewide Aging and Disability Resource Network. This network allows individuals to access long-term services and supports in many different ways by coordinating with the many organizations that provide them. The network will eventually be supported by a statewide toll-free number and a comprehensive website that offer information and referral assistance. BIP also requires conflict-free case management services to ensure that an individual's plan of care will be created based on medical necessity and independent from funding availability. Ohio has incorporated conflict-free tenets into managed care plan contracts and has also developed firewalls for case management. These firewalls separate staff that perform assessments and develop plans of care from staff that provide actual services. Lastly, BIP requires the establishment of core standardized assessment instruments so that eligibility determinations are made in a uniform manner across Ohio. Ohio has created a modernized and simplified eligibility determination system known as "Ohio Benefits."

Providers

ACA Physician Rate Increase

The ACA required states to raise their Medicaid physician fees to at least Medicare levels, for family physicians, internists, and pediatricians for many primary care services. Physicians in both fee-for-service and managed care environments received the enhanced rates. The last payments were made in FY 2015. The differential in payments made to qualifying physicians totaled \$636 million in FY 2014, all of which is paid for by the federal government.

Part B Service Reduced to Medicaid Maximum

H.B. 59 of the 130th General Assembly required that a Medicaid payment for noninstitutional services, excluding physician services and including freestanding dialysis center services, provided during the period beginning January 1, 2014, and ending July 1, 2015, to a Medicaid recipient who is a dual eligible individual enrolled for benefits under Medicare Part B, shall equal the lesser of the following:

1. The sum of the Medicare Part B deductible, coinsurance, and copayment for the services that are applicable to the individual;
2. The greater of the following:
 - a. The maximum allowable Medicaid payment for the services when the services are provided to other Medicaid recipients, less the total Medicaid payment (if any) most recently paid on the Medicaid recipient's behalf for such services; and
 - b. Zero.

For consumers enrolled in Medicaid and Medicare, states have the option to pay the patient's Medicare cost sharing amount (typically 20%) or reimburse up to the Medicaid maximum amount. Ohio has elected to reimburse up to the Medicaid maximum for institutional categories of services and for services paid by a Medicare Advantage plan and all remaining Medicare Part B categories of service, not including physician services.

Pricing Reduction for Radiology

H.B. 59 of the 130th General Assembly required that the ODM Director, not earlier than January 1, 2014, reduce the Medicaid payment rate for a repeat radiological service provided in a physician's office or an independent diagnostic testing facility by specifying that the reduction is to be made when the service is provided more than once by the same provider for the same Medicaid recipient during the same session.

Effective January 1, 2014, ODM has included skilled therapies and certain imaging procedures for a reduction in payments when they are performing multiple procedures on the same date of service to the same person. Providers are paid 100% for

the first performance of service and a reduced amount for subsequent services on the same day to the same patient.

Facility/Nonfacility Pricing for Physician Services

H.B. 59 of the 130th General Assembly required that the ODM Director, not earlier than January 1, 2014, establish varying payment rates for physician services based on the location of the services.

Effective January 1, 2014, ODM has extended the site differential to additional care settings where physicians, advanced practice nurses, and physician assistants are not incurring the full practice expense. This includes services provided in hospitals, ambulatory surgery centers, and nursing facilities. The effect of this change means that entities such as these cannot bill Medicaid for use of its facility when Medicaid already accounts for that "overhead" in its payment to the professionals providing the service.

Adjust Rates for Aide and Nursing Services

The FY 2014-FY 2015 biennium budget increased aggregate spending for Medicaid aide and nursing services by 3% in FY 2015. The increase takes into account labor market data, education and licensure status of providers, whether providers are independent or home health agencies, and the length of time of service visits.

Joint Medicaid Oversight Committee

The Joint Medicaid Oversight Committee was created by S.B. 206 of the 130th General Assembly in March of 2014. JMOC's chief responsibility is to oversee the Medicaid Program on a continuing basis, while specific duties include the following:

- Contracting with an actuary before the beginning of each fiscal biennium to determine the projected medical inflation rate for the upcoming biennium;
- Reviewing how the Medicaid Program relates to the public and private provision of health care coverage in Ohio and the United States;
- Reviewing Medicaid reforms required in section 5162.70 of the Revised Code;⁷

⁷ Section 5162.70 requires the Medicaid Director to implement reforms that limit the growth in the per recipient per month cost of the program for a fiscal biennium. This section requires the limit to be achieved by, among other things, improving the physical and mental health of recipients and providing services in the most cost-effective and sustainable manner. Additionally, the Director is to reduce comorbid health conditions, mortality rates, and infant mortality rates of recipients.

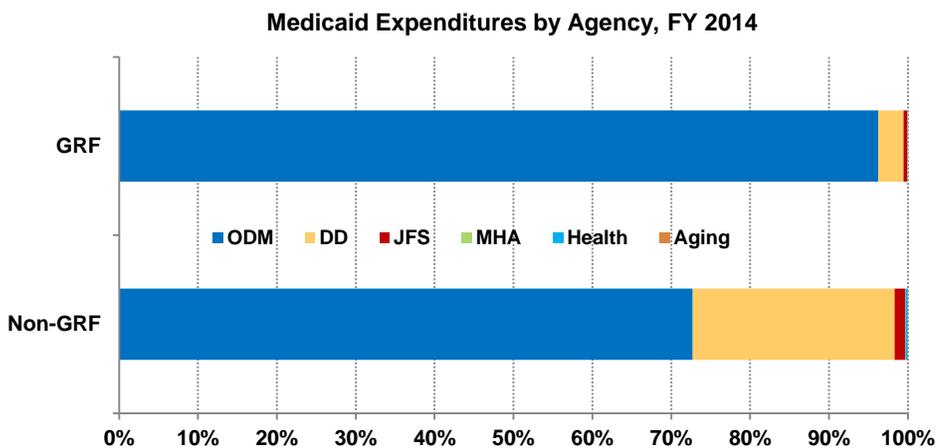

- Recommending policies and strategies to encourage Medicaid recipients to join and stay in the workforce and to encourage less use of the Medicaid Program;
- Recommending, to the extent JMOC determines appropriate, improvements in statutes and rules concerning the Medicaid Program; and
- Developing a plan of action for the future of the Medicaid Program.

In addition to these required duties, JMOC may organize and conduct forums, conferences, and public hearings to increase knowledge of the Medicaid Program and to develop improvements in the program itself. Additionally, JMOC is permitted to investigate state and local government Medicaid agencies. However, the JMOC chairperson cannot grant approval for an inspection unless JMOC, the President of the Senate, and the Speaker of the House of Representatives grants prior approval.

JMOC is a ten-member legislative committee. The House Speaker and Senate President each appoint three members from the majority party and two members from the minority party to serve on the committee. JMOC's daily operations are the responsibility of an executive director and one additional full-time employee.

FACTS AND FIGURES

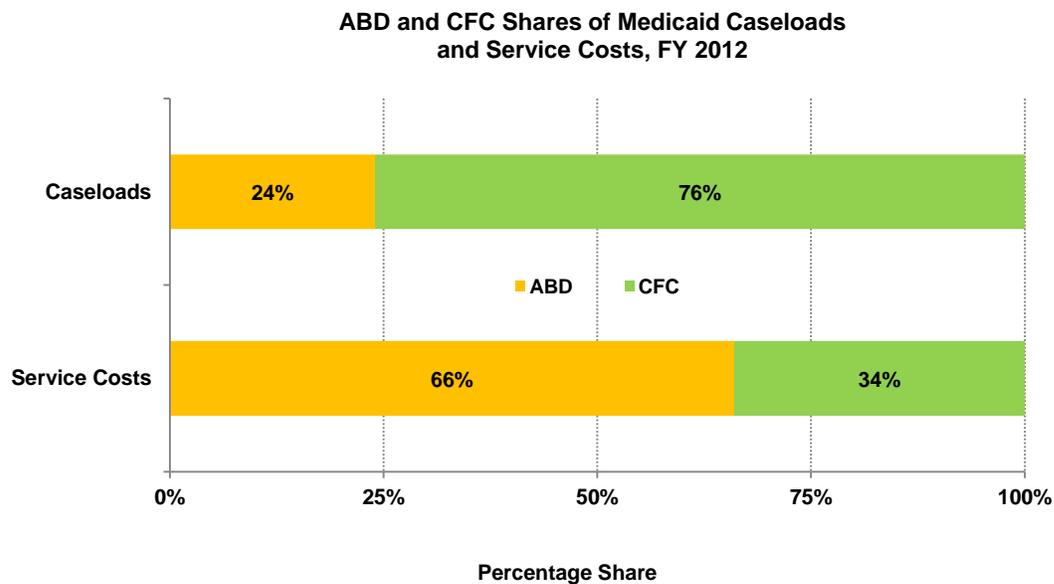

Department of Medicaid Disburses the Majority of Payments for Ohio Medicaid

Source: Ohio Administrative Knowledge System

- GRF Medicaid expenditures were \$13.57 billion in FY 2014, of which 96.3% (\$13.07 billion) was disbursed by the Ohio Department of Medicaid (ODM). Non-GRF Medicaid expenditures were \$7.29 billion in FY 2014, of which 72.7% was disbursed by ODM. Across all funds, Medicaid expenditures totaled \$20.86 billion. ODM accounted for 88.0% of this total.
- Ohio Medicaid is administered by ODM with the assistance of five other state agencies – Developmental Disabilities (DD), Job and Family Services (JFS), Mental Health and Addiction Services (MHA), Health, and Aging – and various local entities.
- The Department of Developmental Disabilities had the second largest share of Medicaid expenditures, accounting for 3.2% (\$435.5 million) of the GRF total, 25.6% (\$1.87 billion) of the non-GRF total, and 11.0% (\$2.30 billion) of the all funds total. The other four agencies accounted for the remaining 1% of the all funds total.
- In FY 2014, 96.0% of total Medicaid expenditures went to various service providers. Managed care had the largest share at \$7.76 billion (37.2%), followed by nursing facilities at \$2.41 billion (11.6%) across all funds.
- GRF Medicaid expenditures are paid by the combination of state and federal resources. Of the \$13.57 billion GRF Medicaid expenditures in FY 2014, \$8.22 billion (60.6%) came from federal reimbursements and \$5.35 billion (39.4%) was funded with state resources.
- Beginning on January 1, 2014, Ohio Medicaid extended coverage to certain low-income adults under the federal Patient Protection and Affordable Care Act. All funds expenditures for these individuals totaled \$494.7 million in FY 2014, which was fully reimbursed by the federal government.

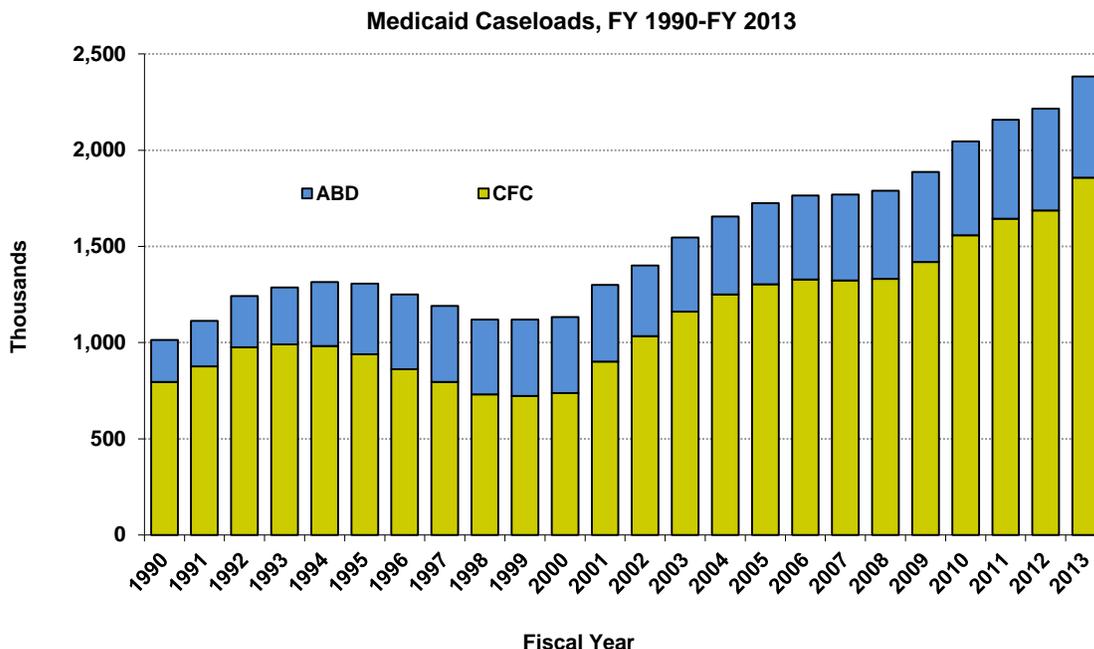

Aged, Blind, and Disabled Account for 24% of Medicaid Caseloads but 66% of Service Costs

Source: Ohio Department of Job and Family Services

- In FY 2012, the aged, blind, and disabled (ABD) population made up 24% of the Medicaid caseloads but accounted for 66% of the service costs. In contrast, the covered families and children (CFC) population made up 76% of the Medicaid caseloads but only accounted for 34% of the service costs.
- Medicaid caseloads totaled 2.2 million in FY 2012, of which 0.5 million were ABD and 1.7 million were CFC. Of \$16.9 billion in Medicaid service costs in FY 2012, \$11.1 billion was incurred for the benefits of the ABD population and \$5.8 billion was incurred for the CFC population.
- In Ohio, Medicaid provides health insurance coverage to the ABD and CFC populations. The ABD population includes low-income elderly who are age 65 or older and individuals with disabilities. The CFC population includes children and parents from low-income families and low-income pregnant women.
- In FY 2012, the average monthly Medicaid cost was \$1,752 for an ABD member compared to \$286 for a CFC member.
- The cost of long-term care is one of the reasons for the higher expense of the ABD population. To illustrate, expenditures on nursing facilities alone, which are almost entirely for the benefit of the ABD population, accounted for 14% of the total Medicaid service expenditure in FY 2012.

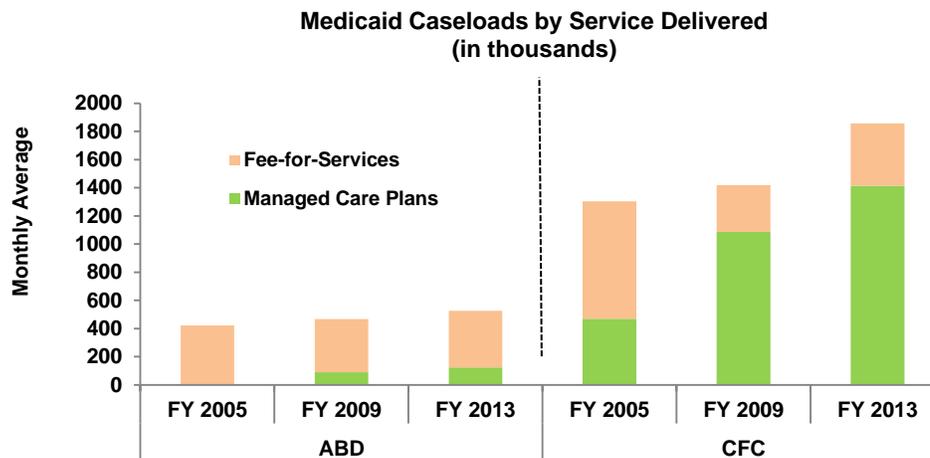

Medicaid Caseloads Continue to Increase

Source: Ohio Department of Medicaid

- Medicaid caseloads grew from 2.22 million in FY 2012 to 2.38 million in FY 2013, an increase of 7.5% (167,000). Of this increase, 67% (112,000) was due to a policy change that allows men and women of childbearing age who are under 200% of the federal poverty lines to receive family planning and related services under Medicaid starting January 2012.
- From FY 2011 to FY 2012, Medicaid caseloads grew at a moderate rate of 2.7% as the economy continued to improve.
- Due to the Great Recession, total caseloads increased by 6.4% per year on average from FY 2008 to FY 2011. Medicaid caseloads also increased rapidly in the early 2000s as a result of the economic slowdown and several eligibility expansions for family and child coverage. From FY 2000 to FY 2004, total caseloads increased by 10.0% per year on average.
- During this 24-year period, total caseloads increased by 135.2%, from 1.01 million in FY 1990 to 2.38 million in FY 2013.
- Due to the decline in the Ohio Works First cash assistance caseload as a result of welfare reform, CFC caseloads declined steadily in the late 1990s, reaching a low of 0.72 million in FY 1999.
- ABD caseloads grew 11.1% annually, on average, in the first half of the 1990s. Growth slowed to 1.5% per year on average from FY 1996 to FY 2000, followed by annual growth averaging 2.3% from FY 2001 to FY 2013.

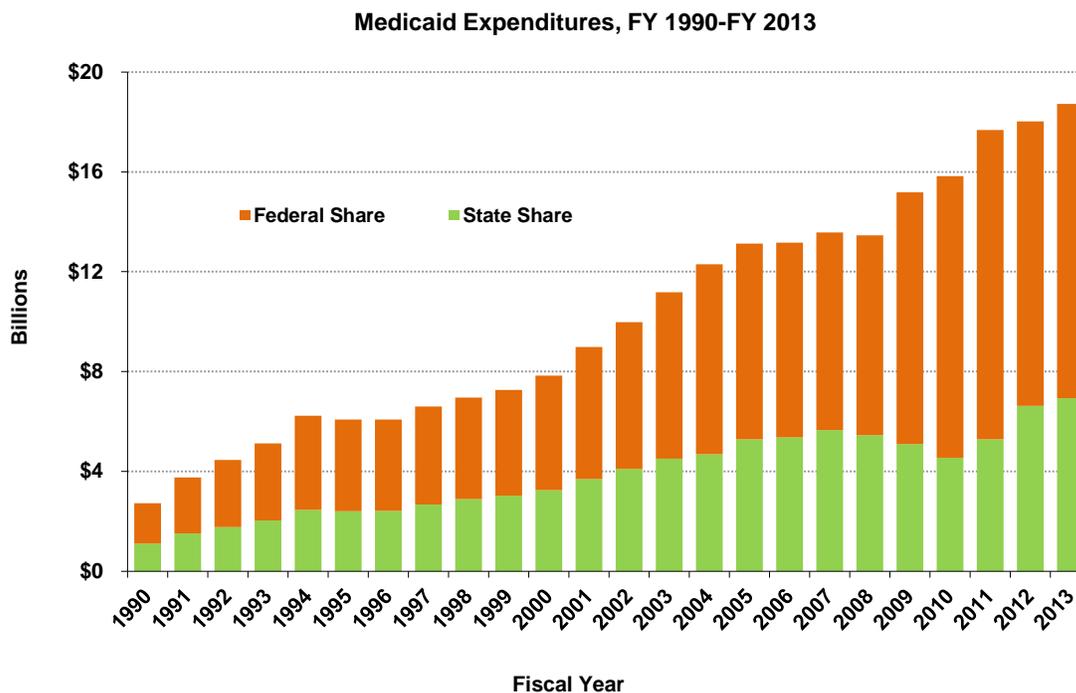

Medicaid Managed Care Caseloads Expand

Source: Ohio Department of Job and Family Services

- Due primarily to the statewide expansion implemented in FY 2006, Medicaid managed care caseloads increased by 226% from FY 2005 to FY 2013. The managed care share of total Medicaid caseloads increased from 27% in FY 2005 to 65% in FY 2013.
- For the covered families and children (CFC) category, managed care caseloads grew from 469,000 in FY 2005 to 1.4 million in FY 2013, increasing CFC's managed care share from 40% to 91%. For the aged, blind, and disabled (ABD) category, managed care caseloads grew from 2,000 to 125,000, increasing its share from 0.5% to 24%.
- H.B. 66 of the 126th General Assembly required that the CFC population and certain ABD populations be enrolled in managed care plans.
- Ohio Medicaid began to use managed care in 1978. Prior to the mandated expansion in H.B. 66, Medicaid managed care was limited to large metro areas and exclusively focused on the CFC population.
- Under the fee-for-service system, Medicaid reimburses health care professionals and institutions for providing approved medical services and products based on set fees for the specific types of services rendered.
- Under the managed care system, a Medicaid enrollee typically receives all care through a single point of entry. The state pays a fixed monthly premium per beneficiary for any health care included in the benefit package, regardless of the amount of services actually used.

Medicaid Expenditures Continued to Rise in FY 2013

Source: Centers for Medicare & Medicaid Services

- Ohio's Medicaid expenditures continued to rise in FY 2013, but the rate of growth slowed after FY 2011 as the economy gradually expanded. Total Medicaid expenditures increased by 1.9% from FY 2011 to FY 2012 and by 3.9% from FY 2012 to FY 2013. In contrast, Medicaid expenditures grew by 9.6% per year from FY 2008 to FY 2011 as a result of the Great Recession.
- Medicaid expenditures in FY 2013 totaled \$18.7 billion, almost seven times greater than FY 1990 expenditures of \$2.7 billion. The average annual growth rate over this 24-year period was 9.1%.
- Medicaid expenditures also rose rapidly in the early 1990s and early 2000s, averaging 23.2% per year from FY 1990 to FY 1994 and 10.9% per year from FY 2000 to FY 2005. Those high growth rates were a result of an economic downturn, poor labor market conditions, increasing health care costs, and eligibility expansions.
- Generally, the federal government pays for 64% of Ohio's Medicaid expenditures and the state pays the remaining 36%. The federal share is determined annually based upon the most recent per capita income for Ohio relative to that of the nation. For the period of October 1, 2008 through June 30, 2011, federal reimbursement for Medicaid was enhanced under the American Recovery and Reinvestment Act of 2009 and P.L.111-226.

Managed Care Spending Outpaces All Other Medicaid Expenditure Categories

Medicaid Spending by Expenditure Category (\$ in millions)					
Service Category	FY 2003		FY 2013		% Change
	Amount	% of Total	Amount	% of Total	
Managed Care	\$695	6%	\$7,011	40%	908%
NFs & ICFs/IID	\$3,529	32%	\$3,153	18%	-11%
HCBS Waivers	\$753	7%	\$1,952	11%	159%
Hospital	\$2,419	22%	\$1,700	10%	-30%
Drugs & Medicare Part D	\$1,510	14%	\$805	5%	-47%
Physician	\$533	5%	\$319	2%	-40%
All Others	\$1,490	14%	\$2,431	14%	63%
Total	\$10,928	100%	\$17,370	100%	59%

Source: Ohio Department of Job and Family Services

- Over the last decade, Medicaid spending growth has been concentrated in Managed Care. While overall Medicaid spending increased by 59% from \$10.93 billion in FY 2003 to \$17.37 billion in FY 2013, spending for Managed Care grew more than 15 times faster, by 908%. Consequently, Managed Care's share of total Medicaid spending increased from 6% in FY 2003 to 40% in FY 2013.
- The growth in Managed Care spending is largely due to H.B. 66 of the 126th General Assembly, which required that specific Medicaid populations be enrolled in managed care beginning in FY 2006.
- Although spending for nursing facilities (NFs) and Intermediate Care Facilities for Individuals with Intellectual Disabilities (ICFs/IID) has declined by 11% from FY 2003 to FY 2013, spending for NFs and ICFs/IID continues to be one of the major Medicaid expenditure categories. It accounted for 18% (\$3.15 billion) of total Medicaid spending in FY 2013.
- Home and Community-Based Services (HCBS) Waiver spending had the second highest growth rate at 159% during this period. HCBS Waivers allow the provision of long-term care services in home and community-based settings for certain Medicaid recipients. They offer a variety of services that can be a combination of standard medical services and nonmedical services.
- Direct payments to hospitals and physicians, and payments for prescription drugs experienced a decrease during this period due largely to the expansion of managed care.

ANALYSIS OF EXECUTIVE PROPOSAL

This section provides an analysis of the Governor's recommended funding for each line item in ODM's budget.

Table 10. Governor's Recommended Amounts for the Department of Medicaid				
Fund	ALI and Name		FY 2016	FY 2017
General Revenue Fund				
GRF	651425	Medicaid Program Support – State	\$191,018,000	\$198,594,000
GRF	651525	Medicaid/Health Care Services	\$17,431,956,285	\$18,495,160,639
GRF	651526	Medicare Part D	\$308,823,000	\$328,424,000
General Revenue Fund Subtotal			\$17,931,797,285	\$19,022,178,639
Dedicated Purpose Fund Group				
4E30	651605	Resident Protection Fund	\$2,878,000	\$2,878,000
5AJ0	651631	Money Follows the Person	\$4,911,000	\$4,660,000
5DL0	651639	Medicaid Services – Recoveries	\$551,125,000	\$561,317,000
5FX0	651638	Medicaid Services – Payment Withholding	\$6,000,000	\$6,000,000
5GF0	651656	Medicaid Services – Hospitals/UPL	\$660,787,756	\$695,270,527
5KC0	651682	Health Care Grants – State	\$10,000,000	\$10,000,000
5R20	651608	Medicaid Services – Long Term Care	\$400,000,000	\$400,000,000
5U30	651654	Medicaid Program Support	\$62,885,000	\$53,834,000
6510	651649	Medicaid Services – HCAP	\$451,535,858	\$237,049,000
Dedicated Purpose Fund Group Subtotal			\$2,150,122,614	\$1,971,008,527
Federal Fund Group				
3ER0	651603	Medicaid Health Information Technology	\$71,764,000	\$61,896,000
3F00	651623	Medicaid Services – Federal	\$3,674,661,708	\$3,382,678,772
3F00	651624	Medicaid Program Support – Federal	\$564,857,000	\$562,547,000
3FA0	651680	Health Care Grants – Federal	\$45,718,000	\$36,296,000
3G50	651655	Medicaid Interagency Pass-Through	\$91,400,000	\$91,406,000
Federal Fund Group Subtotal			\$4,448,400,708	\$4,134,823,772
Holding Account Fund Group				
R055	651644	Refunds and Reconciliations	\$1,000,000	\$1,000,000
Holding Account Fund Group Subtotal			\$1,000,000	\$1,000,000
Total Funding: Department of Medicaid			\$24,531,320,607	\$25,129,010,938

Medicaid/Health Care Services (651525)

This GRF line item is used to reimburse health care providers for covered services to Medicaid recipients. The federal earnings on the payments that are made entirely from this line item are deposited as revenue into the GRF. Spending within this line item generally can be placed into one of several major service categories: Managed Care Plans, Nursing Facilities (NFs), Hospital Services, Behavioral Health, Aging Waivers, Prescription Drugs, Physician Services, Home Care Waivers, Group VIII (i.e., those individuals who become eligible for Medicaid through the ACA), and All Other Care. The majority of expenditures from this line item earn the regular Federal Medical Assistance Percentage (FMAP) reimbursement rate at approximately 63%, although family planning expenditures earn an enhanced 90% federal participation rate, and a portion of the buy-in premium payments are state funds only. Expenditures for the State Children's Health Insurance Program (SCHIP) from this line item earn an enhanced federal participation rate of approximately 74%. The ACA extends SCHIP through most of 2015 and beginning October 1, 2015 the already enhanced SCHIP federal matching rate will increase by 23 percentage points.

The executive recommends \$17,431,956,285 for FY 2016, a 22.7% increase over the FY 2015 estimated expenditures of \$14,211,056,978, and \$18,495,160,639 for FY 2017, a 6.1% increase over FY 2016. The recommended appropriation levels are based on the executive's forecast of Medicaid spending, the executive's policy recommendations (discussed in the FY 2016-FY 2017 Biennium New Initiatives with Budget Impact section), the movement of the payments for Group VIII to this line item, and other eligibility changes. Tables 11 and 12 provide a summary of the changes to line item 651525 as well as the percentage growth for all funds (state and federal share) and state share only. The difference in the growth in FY 2016 to FY 2017 between all funds and state share is attributable to the 100% federal matching rate for Group VIII.

	FY 2015 Estimated Expenditure	FY 2016 Appropriation	FY 2017 Appropriation
Baseline	\$14,211	\$17,822	\$19,197
Executive proposed policies		-\$390	-\$702
Total Appropriation		\$17,432	\$18,495
<i>Baseline growth</i>		25.4%	7.7%
<i>Appropriation Growth</i>		22.7%	6.1%

	FY 2015 Estimated Expenditure	FY 2016 Appropriation	FY 2017 Appropriation
Baseline	\$4,694	\$5,058	\$5,460
Executive proposed policies		-\$157	-\$280
Total Appropriation		\$4,901	\$5,179
<i>Baseline growth</i>		7.8%	7.9%
<i>Appropriation Growth</i>		4.4%	5.7%

Note: Totals may not add due to rounding.

The executive's baseline budget assumption includes the following policies and impacts:

Managed Care – Health Insurer Fee

The ACA levies an annual fee on health insurers starting in 2014, which increases over time. The fee applies to all health insurance risk revenue, including Medicaid and SCHIP. The cost of the annual insurer fee will be passed along to states and the federal government, raising costs in the program. This add-on for the health insurer fee under the ACA is estimated to be \$76.4 million in FY 2016 and \$80.3 million in FY 2017.

Pay for Performance

As part of the expansion of managed care, Ohio is incorporating pay for performance into its managed care plan contracts. Under this program, a portion of the potential payments is withheld and only disbursed to providers if they meet specific targets.

Medicaid Program Support – State (651425)

This GRF line item is used to fund ODM's operating expenses. It is a purely administrative, purely state share GRF line item. The associated federal match is appropriated in line item 651624, Medicaid Program Support – Federal.

The executive recommends appropriations in this line item of \$191,018,000 for FY 2016, a 2.7% increase over the FY 2015 estimated expenditures, and \$198,594,000 for FY 2017, a 4.0% increase over FY 2016. The increases in the appropriation levels are due to polices such as investing in the electronic visit verification for home health providers to verify billing accuracy, investing in the program Integrity System, and supporting single Disability Determination, as discussed in the FY 2016-FY 2017 Biennium New Initiatives with Budget Impact section of this Redbook.

Medicare Part D (651526)

This GRF line item is used for the phased-down state contribution, otherwise known as the clawback payment, under the Medicare Part D requirements contained in

the federal Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003. The clawback is a monthly payment made by each state to the federal Medicare Program that began in January 2006. The amount of each state's payment roughly reflects the expenditures of its own funds that the state would have made if it continued to pay for outpatient prescription drugs through Medicaid on behalf of dual eligibles, those eligible for both Medicare and Medicaid.

The executive recommends appropriations in this line item of \$308,823,000 for FY 2016, a 1.3% decrease from the FY 2015 estimated expenditures, and \$328,424,000 for FY 2017, a 6.3% increase over FY 2016. The recommended funding levels are based on the executive's projected spending for the clawback payments. During FY 2014, Ohio Medicaid made over \$295 million in clawback payments for approximately 206,000 dual eligibles. The executive projects that the number of dual eligibles will continue to rise to 211,000 in FY 2017 and thus increase the clawback payments to the federal government.

The executive recommends, as was also included in H.B. 59 of the 130th General Assembly, to allow the Ohio Department of Budget and Management (OBM) Director to increase the state share of appropriations in either GRF line item 651525, or this GRF line item 651526, with a corresponding decrease in the state share of the other line item to allow ODM to implement the Medicare Part D requirements for FY 2016 and FY 2017.

Medicaid Services – Recoveries (651639)

This line item is used by ODM to pay for Medicaid services and contracts. The Health Care/Medicaid Support and Recoveries Fund (Fund 5DL0) provides funding for this line item.

All of the following are credited to the Health Care/Medicaid Support and Recoveries Fund:

1. The nonfederal share of all Medicaid-related revenues, collections, and recoveries;
2. Federal reimbursement received for payment adjustments made under the Medicaid Program to state mental health hospitals maintained and operated by the Department of Mental Health and Addiction Services;
3. Revenues ODM receives from another state agency for Medicaid services pursuant to an interagency agreement, other than such revenues required to be deposited into the Health Care Services Administration Fund;
4. The first \$750,000 ODM receives in a fiscal year for performing eligibility verification services necessary for compliance with the independent, certified audit requirement of the federal law (42 C.F.R. 455.304);
5. The nonfederal share of all rebates paid by drug manufacturers to ODM in accordance with rebate agreements required by federal law; and

6. The nonfederal share of all supplemental rebates paid by drug manufacturers to ODM in accordance with the Supplemental Drug Rebate Program established by continuing state law.

The executive recommends appropriations in this line item of \$551,125,000 for FY 2016, a 7.1% increase over the FY 2015 estimated expenditures, and \$561,317,000 for FY 2017, a 1.8% increase over FY 2016. The increase in appropriations for this line item is due to the increased rebates expected. ODM estimates drug rebates based on a historical ratio of rebates to projected pharmacy spending.

Medicaid Services – Payment Withholding (651638)

This line item is used for provider payments that are withheld from providers that change ownership. It is used to transfer the withheld funds to the appropriate fund used by ODM at final resolution. The funds are withheld and temporarily deposited into the Exiting Operator Fund (Fund 5FX0) until all potential amounts due to ODM or the provider reach final resolution. The executive recommends flat funding at the FY 2015 estimated expenditures level of \$6.0 million for FY 2016 and FY 2017.

Medicaid Health Information Technology (651603)

This line item is used for provider electronic health record (EHR) incentives and administrative costs related to the Health Information Technology (HIT) grant.

Health Information Technology (600603) was created by the Controlling Board in September 2010. The Controlling Board also established a fund, Fund 3ER0, and appropriated \$402,291,950 in FY 2011 to line item 600603, Health Information Technology. The American Reinvestment and Recovery Act of 2009 provided funding for payments to Medicaid providers and for state administrative expenses related to adoption of EHR technology. ODJFS issued the EHR incentive payments to Medicaid providers to encourage the adoption and use of certified EHR technology. The incentive payment to eligible providers is 100% federally funded.

The executive recommends appropriations in this line item of \$71,764,000 for FY 2016, a 41.7% decrease from the FY 2015 estimated expenditures, and \$61,896,000, a 13.8% decrease from FY 2017. The decrease in appropriations for this line item is based on projected spending.

Health Care Grants – Federal (651680)

This line item is used for Medicaid/SCHIP and non-Medicaid/SCHIP Program initiatives stemming from the ACA.

Line item 600680, Health Care Grants – Federal, was created by the Controlling Board in November 2010. The Controlling Board also established a fund, Fund 3FA0, and appropriated \$325,000 in FY 2011 to line item 600680, Health Care Grants – Federal. In February 2011, the Controlling Board increased the appropriation to \$13,701,346 in

FY 2011. The executive recommends appropriations in this line item of \$45,718,000 for FY 2016, a 2.7% increase over the FY 2015 estimated expenditures, and \$36,296,000, a 20.6% decrease from FY 2017. The spending level is based on the available revenue received.

Among the funding that supports this line item are the performance bonuses that Ohio received due to its efforts to enroll and retain children onto Medicaid. The performance bonuses were established under the Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA) and have been awarded annually since federal fiscal year (FFY) 2009. Ohio received its last performance bonuses award of \$10.8 million in FFY 2014. Ohio also received performance bonuses in previous years – \$19.0 million in FFY 2012, \$20.8 million in FFY 2011, and \$13.1 million in FFY 2010. Bonus awards have previously been used to fund a variety of health initiatives such as increasing early identification and intervention efforts for autism, providing additional community addiction treatment services, expanding access to patient-centered medical homes, and providing research funds for childhood asthma and neonatal abstinence syndrome.

In addition to the CHIPRA performance bonuses, the State Innovation Model Award grant is also used to support this line item. Ohio received \$75 million in December 2014 for the second phase of the State Innovation Model Award grant from CMS. The grant will be used over the next four years to support the testing and evaluation of a multi-payer health system transformation model that was developed under phase one of the grant. Specifically, Ohio will use the grant to accelerate the use of patient-centered medical homes (PCMH) and episode-based models. The PCMH model increases the coordination between patients and their physicians and pays providers for improving patient health through measurable outcomes. It is anticipated that the PCMH model will be utilized statewide by 2018. Under the episode-based model, providers receive payments based on a specific condition or medical event (e.g., asthma acute exacerbation, joint replacement) rather than for a variety of services related to that event. By the end of the phase two grant period, 50 episodes of care should be established. While the health system transformation model will be used by the Medicaid Program, OHT also anticipates that some or all aspects of the model might be adopted by commercial insurance companies since they collaborated on the model design.

CMS awarded a total of more than \$622 million to 11 states, including Ohio, to implement the model testing phase of the grant program. In February 2013, Ohio received a \$3 million State Innovation Model Design Award grant from CMS for the first phase of the grant. The money, along with approximately \$4 million in state and private funding and in-kind resources, was used to design a comprehensive statewide health transformation plan.

Medicaid Services – Federal (651623)

This federally funded line item is used for the Medicaid federal share when the state share is provided from a source other than GRF line item 651525, Medicaid/Health Care Services, or GRF line item 651425, Medicaid Program Support – State, or line item 651682, Health Care Grants – State. Major activities in this line item include the federal share of nursing facility, hospital, prescription drug expenditures, and general Medicaid services. The primary source of the funds is federal Medicaid reimbursement; however, it also includes Health Care Financing Research, Demonstrations, and Evaluations grants and the federal share of drug rebates. These moneys are deposited into the Health Care Federal Fund (Fund 3F00).

The executive recommends appropriations for this line item of \$3,674,661,708 for FY 2016, a 29.3% decrease from the FY 2015 estimated expenditures, and \$3,382,678,772 for FY 2017, a 7.9% decrease from FY 2016. The decreases in the appropriation levels are mainly due to the movement of Group VIII service payments from this line item to GRF line item 651525, Health Care/Medicaid, and other polices discussed in the FY 2016-FY 2017 Biennium New Initiatives with Budget Impact section of this Redbook.

Medicaid Program Support – Federal (651624)

This line item is used for the Medicaid federal share when the state share is provided for Medicaid administrative expenditures, mostly from GRF line item 651425, Medicaid Program Support – State. This line item also includes contracts.

The executive recommends appropriations for this line item of \$564,857,000 for FY 2016, a 2.9% increase over FY 2015, and \$562,547,000 for FY 2017, a 0.4% decrease from FY 2016. The fluctuation in the appropriation levels are mainly due to polices such as investing in the electronic visit verification for home health providers to verify billing accuracy, investing in the program Integrity System, and supporting single Disability Determination, as discussed in the FY 2016-FY 2017 Biennium New Initiatives with Budget Impact section of this Redbook.

Medicaid Interagency Pass-Through (651655)

This line item is used to disburse federal reimbursement to other agencies for Medicaid expenditures they have made. The departments of Aging, Developmental Disabilities, Health, Job and Family Services, and Mental Health and Addiction Services assist ODM in administering certain Medicaid programs/services and receive reimbursements, for services provided and related administration, out of line item 651655. Line item 651655 is appropriated so that these transfers may occur. In addition, line items within these agencies, that receive transferred funds, are also appropriated so that expenditures can occur out of these line items as well. So, in effect, appropriations for line item 651655, are double counted in ODM's budget and the receiving agency's budget. H.B. 64 of the 131st General Assembly, As Introduced, corrects this and

allocates federal reimbursements related to services to the appropriate state agency. However, reimbursements related to administration remain in this line item.

The executive recommends appropriations for this line item of \$91,400,000 for FY 2016, a 95.2% decrease from the FY 2015 estimated expenditures, and \$91,406,000 for FY 2017.

Resident Protection Fund (651605)

This line item is used to pay the costs of relocating residents to other facilities, maintaining or operating a facility pending correction of deficiencies or closure, and reimbursing residents for the loss of money managed by the facility.

The source of funding for this line item is all fines collected from facilities in which the Ohio Department of Health finds deficiencies. The fines collected are deposited into the Resident Protection Fund (former Nursing Home Assessments Fund) (Fund 4E30). Funds in the line item are transferred to the Department of Aging and the Department of Health.

The executive recommends flat funding at the FY 2015 estimated expenditures level of \$2,878,000 for FY 2016 and FY 2017.

Money Follows the Person (651631)

This line item is used to support the federal Money Follows the Person grant initiative. The executive recommends appropriations of \$4,911,000 in FY 2016, an 8.7% increase over the FY 2015 estimated expenditures, and \$4,660,000 in FY 2017, a 5.1% decrease from FY 2016. The recommended funding levels are the executive's projected spending.

The funding is used to relocate seniors and persons with disabilities from institutions to home and community-based settings. The federal government allocates a portion of the grant each year based upon the projected enrollment numbers as estimated by Ohio Medicaid. Ohio Medicaid cannot enroll more than their estimated projected enrollment. The grant is realized by the state as federal reimbursement on expenditures for transitioning eligible Medicaid members out of institutional settings and into home or community-based care. More specifically, for qualified and demonstrative services the federal government reimburses Ohio at an enhanced federal match rate of nearly 80% for Medicaid members for their first 12 months in home or community-based care, while other supplemental services is reimbursed at the regular federal Medicaid reimbursement. After the 12-month period, Ohio Medicaid draws down the regular federal reimbursement for each transitioned Medicaid member.

The Affordable Care Act of 2010 (ACA) extends the MFP Program through September 30, 2016, and appropriates an additional \$2.25 billion (\$450 million for each FFY 2012 to FFY 2016). Any funds remaining at the end of each fiscal year carry over to

the next fiscal year, and can be used to make grant awards to current and new grantees until FY 2016. Under ACA, grant awards are available to states for the fiscal year they got the award, and four additional fiscal years after. Any unused grant funds awarded in 2016 can be used until 2020. ACA also expands the definition of who is eligible for the MFP Program to include people that live in an institution for more than 90 consecutive days. (Exception: days that a person was living in the institution for the sole purpose of receiving short-term rehabilitation services reimbursed by Medicare do not count toward this 90-day period).

Medicaid Services – Hospital/UPL (651656)

This line item is used to support hospital upper payment limit (UPL) programs and provides offsets to Medicaid GRF spending. The source of funds for this line item is the revenue generated from a hospital assessment. Assessment revenue is deposited into the Hospital Assessment Fund (Fund 5GF0). The assessment is based on a percentage of total facility costs, and is collected over the course of three payments during each year. The federal match for expenditures from this line item is made from line item 651623, Medicaid Services – Federal. This fee is separate from the established assessment fee currently used to support the state's Disproportionate Share Hospital (DSH) Program.

The executive recommends appropriations in this line item of \$660,787,756 in FY 2016, a 24.4% increase over the FY 2015 estimated expenditures, and \$695,270,527 in FY 2017, a 5.2% increase from FY 2016. The increase in the appropriation is attributable to the executive's recommendation that the assessment be increased to about 3% for an additional two years as well as the projected increase in the hospital total facility costs.

Health Care Grants – State (651682)

This line item is used to fund planning and implementation grants related to the ACA. Ohio Medicaid deposits funds it receives pursuant to the administration of the Medicaid Program in Fund 5KC0, other than any such funds that are required by law to be deposited into another fund. Typically this is in the form of intrastate transfer vouchers from other agencies for specific projects associated with the Health Innovation Fund. There are currently no agreements to receive grants or monies to Fund 5KC0. However, in anticipation of receipt, the executive recommends flat funding for this line item at the FY 2015 estimated expenditures level of \$10.0 million for FY 2016 and FY 2017.

Medicaid Services – Long Term Care (651608)

This line item is used to make Medicaid payments to nursing facilities. The source of funds for this line item is the franchise fee payments from nursing facilities. The assessment amount is calculated each year at the maximum percentage allowed by federal law (not to exceed 6%). The franchise fee payments are due to the state in

February, May, August, and November of each year and are deposited in the Nursing Home Franchise Permit Fee Fund (Fund 5R20).

Ohio Medicaid is required to assess an annual franchise permit fee on each long-term care bed in a nursing home or hospital.

H.B. 59 of the 130th General Assembly replaced the specific dollar amount of the per bed per day rate of the fee with a formula to be used to determine the per bed per day fee rate. Effective July 1, 2013, the franchise permit fee rate was to be determined each fiscal year as follows:

1. Determine the estimated total net patient revenues for all nursing homes and hospital long-term care units for the fiscal year;
2. Multiply the amount estimated above by the lesser of (a) the indirect guarantee percentage⁸ or (b) 6%;
3. Divide the product determined above by the number of days in the fiscal year;
4. Determine the sum of (a) the total number of beds in all nursing homes and hospital long-term care units that are subject to the franchise permit fee for the fiscal year and (b) the total number of nursing home beds that are exempt from the fee for the fiscal year because of a federal waiver;
5. Divide the quotient determined pursuant to (3) above by the sum determined under (4) above.

The franchise fee calculated from the above formula was about \$12.00 for FY 2014 and \$12.05 for FY 2015.

The executive recommends relatively flat funding for this line item at the FY 2015 estimated expenditures level of \$400 million each year in FY 2016 and FY 2017.

Medicaid Program Support (651654)

This line item is used to pay costs associated with the administration of Medicaid.

Funding for this line item comes from a variety of Medicaid financing activities. The money is deposited in the Health Care Services Administration Fund (Fund 5U30). A significant portion of revenue to Fund 5U30 are (1) tort and audit recoveries made by

⁸ The indirect guarantee percentage is the percentage specified in federal law that is to be used to determine whether a class of providers is indirectly held harmless for any portion of the costs of a broad-based healthcare related tax. The indirect guarantee percentage is currently 6%. (42 U.S.C. § 1396b(w)(4)(C)(ii).)

department auditors, audit contractors, and the Attorney General's Office, and (2) from the transfer of state share of vendor offsets.

The executive recommends appropriations for this line item of \$62,885,000 for FY 2016, a 35.1% increase over the FY 2015 estimated expenditures, and \$53,834,000 for FY 2017, a 14.4% decrease from FY 2016.

Refunds and Reconciliations (651644)

This line item is used to disburse funds that are held for checks whose disposition cannot be determined at the time of receipt. Upon determination of the appropriate fund into which the check should have been deposited, a disbursement is made from this line item to the appropriate fund. In addition, unidentified federal reimbursement is temporarily drawn into this account until distribution can be made into the appropriate account.

The executive recommends flat funding for this line item of \$1 million for FY 2016 and FY 2017.

Medicaid Services – HCAP (651649)

This line item is to fund the state share of the Hospital Care Assurance Program (HCAP). The federal share of HCAP is funded through line item 651623, Medicaid Services – Federal.

Fund 6510 is used to support line item 651649. The only source of revenue for Fund 6510 is HCAP assessments from Ohio hospitals. Shortly after assessment revenue is received, it is disbursed back to hospitals using the HCAP program formula.

The federal government requires state Medicaid programs to make subsidy payments to hospitals that provide uncompensated, or charity, care to low-income and uninsured individuals at or below 100% FPL under the DSH Program. HCAP is the system Ohio uses to comply with the DSH Program requirement. Under HCAP, hospitals are assessed an amount based on their total facility costs, and government hospitals make intergovernmental transfers to ODM. ODM then redistributes back to hospitals money generated by the assessments, intergovernmental transfers, and federal matching funds based on uncompensated care costs.

The executive recommends appropriations of \$451,535,858 for FY 2016, and \$237,049,000 for FY 2017. The executive assumes no payment in FY 2015. The recommended funding levels for HCAP are based on the executive's projected assessment revenue and spending. The maximum amount of the HCAP program is capped in federal law. ODM estimated the revenue based on caps established in the Medicare Modernization Act of 2003. ACA requires annual aggregate reductions in federal funding from FFY 2014 through FFY 2020.

MEDICAID PRIMER

Medicaid/State Children's Health Insurance Program (SCHIP) is the largest health insurance program in the country. It covers a broad, low-income population, including working families, individuals with diverse physical and mental disabilities, and seniors. Medicaid's beneficiaries include many of the poorest and sickest people in the nation. Medicaid was enacted in 1965 under Title XIX of the Social Security Act.⁹ Medicaid is a publicly funded health insurance program for low-income individuals, initially established to provide medical assistance only to those individuals receiving assistance through Aid to Families with Dependent Children (AFDC), and state programs for the elderly. Over the years, Congress has incrementally expanded Medicaid eligibility to reach more Americans living below or near poverty, regardless of their welfare eligibility.

In 1972, Congress enacted a federal cash assistance program for the aged, blind, and disabled called Supplemental Security Income (SSI), which broadened Medicaid coverage to include this population. Another significant expansion of Medicaid was to provide health insurance coverage not just to the welfare population but also to other low-income families, especially low-income children and pregnant women. In 1996, Medicaid was delinked with the enactment of the Temporary Assistance to Needy Families (TANF) Program. Families who receive TANF benefits do not automatically qualify for Medicaid as they did under the AFDC Program.

In 1997, SCHIP was created. Title XXI of the Social Security Act, enacted by the Balanced Budget Act of 1997, added health care coverage for children in low- and moderate-income families who are ineligible for Medicaid but cannot afford private insurance. SCHIP builds upon the Medicaid Program. States were offered the option of implementing this health care coverage as stand-alone programs with different benefit packages, or as part of their existing Medicaid benefit. Ohio opted to implement SCHIP as a Medicaid expansion in 1998. States receive an enhanced federal match (greater than the state's Medicaid match) to provide SCHIP. Under the program, each state is entitled to a specific allotment of federal funds each year.

In 2009, the Children's Health Insurance Program Reauthorization Act of 2009 (CHIPRA), designed to provide coverage to more uninsured children and to improve the quality of their care, reauthorized SCHIP for the period April 1, 2009 to September 30, 2013. It also increased state SCHIP allotments, modernized the formula for dividing

⁹ Medicaid services are an entitlement for those who meet eligibility requirements. Entitlement means that if an individual is eligible for the program, then they are guaranteed the benefits and the state is obligated to pay for these benefits.

funds among the states, and established a mechanism for "re-basing" state allotments every two years to ensure that SCHIP funds are targeted to states that are using the funds. The Patient Protection and Affordable Care Act extended authorization and funding for SCHIP through 2015.

The Patient Protection and Affordable Care Act and Medicaid Expansion

On March 23, 2010, the Patient Protection and Affordable Care Act ("ACA," Public Law 111-148) was signed into law. The law requires that nearly all U.S. citizens and legal residents have some form of qualifying private or public health insurance. This requirement is otherwise known as the "individual mandate." The ACA implements the individual mandate through state-based or federally facilitated online insurance exchanges, the availability of federally funded premium credits and cost sharing subsidies for individuals with income between 100% and 400% of the federal poverty line (FPL), and the expansion of the federal-state Medicaid Program. Working in concert, these provisions are intended to ensure that all Americans have access to affordable healthcare.

Since its enactment in 2010, the ACA has been subjected to legal challenges at the federal level. In June 2012, the U.S. Supreme Court, in *National Federation of Independent Business v. Sebelius*, upheld by a 5-4 margin the individual mandate provision as a constitutional exercise of Congress's taxing power. In the same decision, the Supreme Court by a 7-2 margin limited the authority of the Secretary of the U.S. Department of Health and Human Services in enforcing the ACA's expansion of Medicaid; this effectively rendered Medicaid expansion optional at the discretion of the individual states.

Individual Mandate, Insurance Exchanges and Subsidies

The "individual mandate" refers to the ACA provision requiring nearly all U.S. citizens and legal residents to have some form of health insurance. Health insurance includes employer-sponsored health insurance plans, private health insurance purchased in the health insurance marketplace (exchanges), and public programs, including but not limited to Medicaid and SCHIP.

In order to facilitate the purchase of private health insurance, states have the option of establishing state-based online insurance exchanges. Such exchanges provide consumers with insurance packages offered by a number of private and nonprofit insurers. Exchanges must include four levels of benefit categories (bronze, silver, gold, and platinum, with bronze being the lowest level of coverage and platinum being the highest) and a separate catastrophic coverage plan. Each coverage level must offer the consumer a minimum level of benefits. If a state elects not to establish its own exchange, residents of that state are able to use the federally facilitated insurance exchange. Sixteen states and the District of Columbia currently operate state-based exchanges,

7 states operate exchanges under a federal-state partnership, and 27 states (including Ohio) have chosen not to establish a state-based exchange; residents in these 27 states must use the federally facilitated exchange.

The ACA requires nearly all American citizens and legal residents to have qualifying health insurance. In order to ease the financial burden of purchasing health insurance, the ACA provides for premium subsidies for individuals and/or families with income between 100% and 400% of the FPL. During the initial enrollment period for the federal insurance exchange (October 1, 2013 through April 19, 2014), 87% of individuals purchasing insurance through the federal exchange qualified for premium subsidies which, on average, covered 76% of the cost of the premiums. The subsidy amount an individual/family is eligible to receive is tied to the second lowest-cost (silver) plan in the area and is determined on a sliding scale based on the individual's/family's income level relative to the FPL, such that the individual's premium contribution does not exceed a certain percentage of that individual's annual income.

Income relative to the federal poverty line	Maximum individual premium contribution (percent of income)
Up to 133%	2.0%
133% to 150%	3.0% to 4.0%
150% to 200%	4.0% to 6.3%
200% to 250%	6.3% to 8.05%
250% to 300%	8.05% to 9.5%
300% to 400%	9.5%

The ACA also provides for cost sharing subsidies for eligible individuals and families. These subsidies provide assistance to individuals to pay for cost sharing expenses such as deductibles, co-insurance, and copays. Cost sharing subsidies are limited to silver plans, in which an individual/family typically pays 30% of benefit costs. Cost sharing subsidies reduce the amount of benefit costs an individual or family pays. As with premium subsidies, these amounts are based on income level relative to the FPL.

Table 14. Individual Cost Sharing Contributions Under the ACA	
Income relative to the federal poverty line (FPL)	Out of pocket expenses paid by an individual or family ¹⁰ (percent of benefit costs)
100% to 150% FPL	6%
150% to 200% FPL	13%
200% to 250% FPL	27%
250% FPL and Higher	30%

Under the ACA, if an individual elects not to purchase health insurance and is ineligible to enroll in a public health program, that individual is then subjected to a penalty under the Internal Revenue Code. The ACA grants exemptions from the penalty for financial hardship, religious objections, American Indians, individuals without coverage for less than three months, undocumented immigrants, incarcerated individuals, individuals for whom the lowest-cost (bronze) plan is greater than 8% of the individual's income, and individuals with incomes below the tax filing threshold. The penalty schedule for failing to purchase qualifying health insurance is listed in the table below. The penalty is based on the greater of a percentage of an individual's or family's income or a flat penalty assessed on up to three members of a family.¹¹

Table 15. ACA Penalties			
Year	Per individual*	Percent of taxable income	Maximum penalty (amount or percent of taxable income)
2014	\$95	1.0%	Greater of \$285 or 1.0%
2015	\$325	2.0%	Greater of \$975 or 2.0%
2016	\$695	2.5%	Greater of \$2,085 or 2.5%
2017+	2016 rate plus COLA**	2016 rate plus COLA	2016 plus COLA

*Up to three individuals per family
 **Cost-of-Living Adjustment

For example, if in 2016 a family of eight with taxable income of \$70,000 does not have qualifying health insurance, that family will be subjected to a penalty of \$2,085 (\$695 x 3); the penalty can be assessed on no more than three family members. The family is subjected to this penalty as it is greater than the penalty it would pay as a percentage of taxable income (\$70,000 x 2.5% = \$1,750).

¹⁰ Based on the silver level benefit plan.

¹¹ 26 U.S.C. § 5000A.

Medicaid, the State Children's Health Insurance Program, and Medicaid Expansion under the ACA

The ACA provides for the expansion of the federal-state Medicaid Program to all non-Medicare eligible individuals under age 65 (i.e., children, pregnant women, parents, and adults without dependent children) with incomes up to 133% FPL (plus 5% income disregard) and guarantees a benchmark benefit package which offers the same essential benefits covered by plans on the state and federal exchanges. The ACA requires that states expand their Medicaid programs at risk of losing all federal Medicaid matching funds. However, the June 2012 Supreme Court ruling in *National Federation of Independent Business v. Sebelius* strips the U.S. Secretary of Health and Human Services (HHS) of the authority to enforce that provision, effectively making Medicaid expansion voluntary at the discretion of the individual states.

On October 21, 2013, ODM requested and received Controlling Board approval to increase federal appropriations by \$561.7 million in FY 2014 and \$2.0 billion in FY 2015, which effectively expanded Medicaid in Ohio. As of December 2014, 27 states and the District of Columbia have also expanded their Medicaid programs. The federal government provides funding for nearly all of the costs associated with the Medicaid expansion population (i.e., those individuals who, but for expansion, would not have been eligible for Medicaid): 100% federal funding through 2016, 95% in 2017, 94% in 2018, 93% in 2019, and 90% in 2020 and thereafter). The ACA also requires states to maintain income eligibility levels for children in Medicaid and SCHIP until 2019 and extends SCHIP funding through 2015, while SCHIP benefit package and cost sharing rules remain unchanged. Beginning in 2015, states will be eligible to receive a 23 percentage point increase in the SCHIP match rate, up to a federal match of 100%. Other important ACA provisions related to Medicaid include:

- Increases in the Medicaid drug rebate percentage for brand name and noninnovator, multi-source drugs.
- Reduction in the aggregate Medicaid Disproportionate Share Hospital (DSH) payments by \$18.1 billion through 2020.
- Provisions to better integrate benefits and improve coordination between the states and the federal government to improve access to and quality of care and services for Medicare/Medicaid dual eligible individuals. The state effort in Ohio is known as MyCare Ohio.
- Incentivize demonstration projects and payment bundles to reduce costs and better coordinate care services. The state of Ohio has implemented these efforts through Patient-Centered Medical Home (PCMH) and Episode-Based Payment Models.

Medicaid – a Federal and State Joint Program

Medicaid is a federal-state joint program administered by the states and funded with federal, state, and, in some states like Ohio, local revenues. The federal government establishes and monitors certain requirements concerning funding, eligibility standards, and quality and scope of medical services.

State agencies administer Medicaid subject to oversight by the Centers for Medicare and Medicaid Services (CMS) in the U.S. Department of Health and Human Services (HHS). State participation in Medicaid is voluntary, but all states participate. The federal government provides reimbursement to the states and offers guidance on how to use those funds, but each state shapes and administers its program to suit the needs of its own population. Consequently, Medicaid operates as more than 50 distinct programs – one for each state, territory, and the District of Columbia.

Because states are entitled to federal reimbursement under Medicaid, and there is no funding cap, they are able to cover optional groups or provide a broad array of services. As long as a state can provide the match, federal funds are virtually unlimited for federally approved activities. To trigger federal Medicaid matching funds, a state must spend some combination of state or local funds on Medicaid. For example, when a Medicaid recipient receives a health care service, the provider incurs the costs and requests to be paid by the state Medicaid agency, at which point the state pays the provider based on the Medicaid rate for that service. The state is then reimbursed by the federal government at an amount equal to that state's match rate.

On the other hand, when it first established the Medicaid Program, Congress gave the HHS Secretary authority to enforce state compliance with federal Medicaid Program rules by withholding all or a portion of a state's federal matching funds.¹² Such a penalty can only be imposed after notice and the opportunity for a hearing and is subject to judicial review. The Secretary never has withheld a state's entire Medicaid grant as a penalty for noncompliance with federal requirements.¹³

Federal Medical Assistance Percentage

The federal government shares in the states' cost of Medicaid at a matching rate known as the Federal Medical Assistance Percentage (FMAP). The FMAP is calculated for each state based upon the state's per capita income for the last three years relative to the entire nation. The formula is:

¹² 42 U.S.C. § 1396c.

¹³ Source: The Henry J. Kaiser Family Foundation, *A Guide to the Supreme Court's Decision on the ACA's Medicaid Expansion*, August 2012.

$$1 - \frac{(\text{State per capita income})^2}{(\text{National per capita income})^2} \times 0.45$$

A state with average per capita income will have an FMAP of 55%. The higher a state's per capita income relative to the national average, the lower its match rate. The operation of the formula is bound by federal statute. The statute limit for FMAP is at least 50% and can be as high as 83%. In FFY 2015, the number of states receiving the minimum 50% FMAP are 13. Mississippi maintains the highest FMAP, of 73.58%.

The FMAP for Ohio for FFY 2015 is 62.64%. The general "rule of thumb" for how this cost sharing mechanism works is as follows: for every one dollar Ohio spends on Medicaid, the federal government gives Ohio about 63 cents.

There are exceptions to the FMAP formula for certain services and certain populations. For example, since 1973, family planning services and supplies are matched at 90%. And under the "Money Follows the Person" (MFP) Rebalancing Demonstration Program, the costs of transitioning individuals out of institutions into the community are matched at an "MFP-enhanced" FMAP which is the state's regular FMAP plus half of the percentage point difference between the FMAP and 100%. Lastly, there are two major exceptions: the matching rates for SCHIP and for administrative activities. SCHIP is reimbursed at an enhanced FMAP. The enhanced FMAP, or eFMAP, is used to determine the federal share of the cost of SCHIP. It is also set by statute and is calculated by reducing each state's Medicaid share by 30%. The cost for the treatment for breast or cervical cancer is also matched at the state's SCHIP FMAP rate.

The costs of administration are, in general, matched at 50%, although some administrative activities have a higher federal matching rate. Table 16 below shows the matching rates for various administrative functions.¹⁴

¹⁴ Source: Kaiser Commission on Medicaid and the Uninsured, *Medicaid Financing: An Overview of the Federal Medicaid Matching Rate (FMAP)*, September 2012.

Table 16. Federal Matching Rates for Various Administrative Activities	
Activity or Function	Percentage
Adoption and use of electronic health record (EHR) technology	100%
Citizenship verification	90%
Design, development, and installation of information systems for citizenship verification	90%
Management and operation of information systems for citizenship verification	75%
Design, development, and installation of Medicaid Management Information System (MMIS)	90%
Management and operation of MMIS	75%
Identification and education of individuals with sickle cell gene	50%
Immigration status verification	100%
Independent external reviews of managed care plans	75%
Medical and utilization review	75%
Preadmission screening and resident review	75%
Skilled professional medical personnel	75%
State fraud and abuse control unit activities	75%
State survey and certification	75%
Translation and interpretation services for children	75%
Other program administration activities	50%

Under the ACA, federal health care reform, the matching rate for the costs of upgrading eligibility and enrollment systems incurred before December 31, 2015, is 90%. The ACA provides a few more exceptions to the FMAP formula. Under the ACA, the federal government will finance the vast majority of the costs of the new Medicaid coverage to nondisabled adults under 65 with incomes at or below 138% FPL. The federal-state financing partnership that supports the current Medicaid Program will continue. However, the cost of the new Medicaid coverage stemming from health reform will be fully financed by the federal government in the first three years of reform (2014 to 2016). In subsequent years, the federal government will continue to finance the large portion of the costs. Table 17 below shows the phase-down FMAP.

Table 17. Phase-Down FMAP	
Calendar Year	Percentage
2014	100%
2015	100%
2016	100%
2017	95%
2018	94%
2019	93%
2020 and thereafter	90%

As stated above, the ACA also extends SCHIP through most of 2015 and beginning October 1, 2015, the enhanced SCHIP federal matching rate will increase by 23 percentage points and cap at 100%. The enhanced federal matching rate continues until September 30, 2019. This SCHIP increase is not tied to the Medicaid expansion.

Effective January 1, 2013, a 1% increase in FMAP is applied to expenditures for adult vaccines and clinical preventive services in states that provide these benefits without cost sharing.

The federal government will match at a 90% rate, for eight calendar quarters, the cost of providing health home services to beneficiaries with chronic conditions.

Under the Community First Choice option, the costs of home and community-based attendant services and supports a state elects to provide to individuals with disabilities are matched at the state's regular FMAP plus six percentage points.

Under the State Balancing Incentive Payments Program, the costs of furnishing noninstitutionally based long-term care services and supports are matched at a participating state's FMAP plus five percentage points or plus two percentage points, depending upon the percentage of long-term care spending that a state applies to home and community-based services.

Table 18 below provides a summary of these exceptions to the FMAP formula.

Population/Services	Percentage
Administrative Activities	50% to 100%
Family Planning Services	90%
Money Follows the Person	$FMAP + (100\% - FMAP) / 2$
Breast and Cervical Cancer Treatment	SCHIP FMAP
Newly eligible, adults under 65 up to 138% FPL	starting at 100%
Health Home Services	90% for 8 quarters
Community First Choice	FMAP + 6%
State Balancing Incentive Payments Program	FMAP + 5% or 2%
Clinical Preventive Services for Adults	FMAP + 1%
State Children's Health Insurance Program (SCHIP)	eFMAP

Congress has two times temporarily increased FMAPs to provide fiscal relief to state Medicaid programs during recession. The first occurred in response to the 2001 recession. During the five-quarter period beginning April 2003 through June 2004, every state's FMAP was increased by 2.95 percentage points, and every state was held harmless against any decline in its FMAP that would otherwise have occurred under the normal operation of the formula. Secondly, the American Recovery and Reinvestment Act of 2009 (ARRA) provided a temporary increase in the FMAP.

ARRA increased the federal share of Medicaid programs for 27 months over the period October 1, 2008 through December 31, 2010. It provided a 6.2 percentage point across-the-board increase and a bonus adjustment related to the change in a state's unemployment rate. Another federal law, P.L. 111-226, provided a two-quarter extension of the enhanced federal matching rates included in ARRA to June 30, 2011, which is the end of FY 2011. P.L. 111-226 also reduced the across-the-board increase from 6.2 to 3.2 percentage points for the third quarter of FY 2011 and to 1.2 percentage points for the fourth quarter of FY 2011. In addition, P.L. 111-226 maintained the formula for the calculation of the bonus adjustments but made certain rule modifications.

State Share

State Medicaid funding comes from several sources, including income, property, sales, and other sources that generally make up states' and counties' general funds. But states can also raise revenue for Medicaid by imposing fees, assessments, and other taxes on health care providers. Health care provider taxes have been commonly used to raise Medicaid match, especially during economic downturns when there are increased revenue pressures on states. Ohio currently has provider taxes on hospitals, nursing homes, and intermediate care facilities for individuals with intellectual disabilities (ICFs/IID).

State Plan Amendment

A State Plan is the basis for a state's claim for federal reimbursement, known as federal financial participation (FFP). The State Plan is the funding agreement between the state Medicaid agency and the federal government. States are required to submit a State Plan Amendment (SPA) to CMS for changes to its Medicaid Program. Each state's plan and any amendments to the plan must be reviewed and approved by CMS in order for a state to receive FFP. Federal regulations allow CMS 90 days to review a SPA and make a determination. This 90-day time period may be stopped if CMS has questions regarding the proposed amendment. Therefore, SPAs are written and submitted long before they can be implemented.

The State Plan includes information regarding groups of consumers served, services provided, payment to providers, and other program requirements. The State Plan must meet the following requirements unless a waiver (exemption) is requested and approved by CMS:

- **Statewideness.** All Medicaid services must be available on a statewide basis. States cannot limit the availability of the health care services to a specific geographic location or fail to provide a covered service in a particular area.

- **Freedom of Choice.** Medicaid consumers are provided the freedom to choose which Medicaid contracting providers they use. States may not restrict Medicaid recipients' access to qualified providers.
- **Amount, Duration, and Scope.** For every covered service, determinations are made regarding the amount, duration, and scope of coverage provided to meet recipients' needs. For example, a state could limit the number of days of hospital care provided. States must cover each service in an amount, duration, and scope that is reasonably sufficient. Services must not be arbitrarily limited for any specific illness or condition.
- **Comparability of Services.** States must ensure that the medical assistance available to any recipient is not less in amount, duration, or scope than what is available to any other recipient.
- **Reasonable Promptness.** States must promptly provide Medicaid to recipients without delay caused by the agency's administrative procedures.
- **Equal Access to Care.** States must set payment rates that are adequate to assure Medicaid recipients reasonable access to services of adequate quality.
- **Coverage of Mandatory Services for Mandatory Populations.** CMS requires state Medicaid programs to provide certain medically necessary services to covered populations.

The federal Deficit Reduction Act of 2005 (DRA) gave states greater flexibility to modify their Medicaid programs. This flexibility allows states to vary the level and range of Medicaid coverage based on recipient characteristics or geographic location. The DRA, however, maintains early and periodic screening, diagnostic, and treatment services as a wraparound for children. Some states have used the DRA to restructure benefits by setting more limited coverage standards for people with relatively good health, while allowing more generous benefits for adults with certain chronic physical or mental conditions and disabilities.

States may seek federal waivers to operate their Medicaid programs outside of federal guidelines. The Social Security Act gives the HHS Secretary authority to waive compliance with certain provisions of Medicaid law. Some states have used waivers to expand coverage, provide services that could not otherwise be offered, expand home and community services, and require recipients to enroll in managed care programs. Waivers have also been approved to allow states to limit Medicaid-covered services to existing Medicaid eligibility groups in order to cut spending and to expand coverage to the uninsured.

There are different types of waivers states may request, each named after the section in the federal Social Security statute that authorizes it. Each waiver has a distinct purpose and distinct requirements.

Section 1115 Research & Demonstration Projects. Section 1115 provides the HHS Secretary with broad authority to approve experimental, pilot, or demonstration projects likely to assist in promoting the objectives of the Medicaid statute. Flexibility under Section 1115 is sufficiently broad to allow states to test the merit of substantially new ideas of policy. These projects are intended to demonstrate and evaluate a policy or approach that has not been demonstrated on a widespread basis. Some states expand eligibility to cover groups of individuals and services not otherwise eligible for federal match and to demonstrate alternative approaches to providing or extending services to recipients.

The 1115 projects are generally approved to operate for a five-year period; states may submit renewal requests to continue the project for additional periods of time. Demonstrations must be "budget neutral" over the life of the project, meaning they cannot be expected to cost the federal government more than it would cost without the waiver.

Section 1915(b) Managed Care/Freedom of Choice Waivers. Section 1915(b) provides the HHS Secretary with the authority to grant waivers that allow states to implement managed care delivery systems, or otherwise limit individuals' choice of provider under Medicaid. This section also provides waivers allowing states to skip provisions requiring comparability of services and statewideness, which together require states to offer the same coverage to all categorically needy recipients statewide. Prior to the 1997 Balanced Budget Act, which allowed states to implement managed care programs under their state plans, states often used these waivers to implement managed care programs by restricting recipients' choice of providers.

Section 1915(c) Home and Community-Based Services Waivers. Section 1915(c) provides the HHS Secretary with the authority to waive Medicaid provisions in order to allow long-term care services to be delivered in community settings. This program is the Medicaid alternative to providing comprehensive long-term services in institutional settings. These waivers have been critical in state strategies to provide alternative settings for long-term care services.

Section 1915(i) State Plan Home and Community-Based Services. DRA added a new section 1915(i) to the Social Security Act. Section 1915(i) provides states an opportunity to offer services and supports before individuals need institutional care, and also provides a mechanism to provide State Plan home and community-based services to individuals with mental health and substance use disorders. This State Plan service package includes many similarities to options and services available through 1915(c) home and community-based services waivers, a significant difference is that

1915(i) does not require individuals to meet an institutional level of care in order to qualify for home and community-based services. The ACA made changes, which become effective October 1, 2010, to 1915(i) provisions by removing certain barriers of offering home and community-based services through the Medicaid State Plan.

Medicaid and the Economy

Medicaid is important to not only the millions of low-income Americans who receive benefits but also to the economy of the state where Medicaid funds support thousands of health-related jobs, medical education, and workforce development. State and federal dollars spent on health care services help employ health care workers and purchase medical goods and equipment from businesses in the state. Because of this increased employment and steady business in the health sector, other state economic sectors such as grocery stores, retail businesses, automotive services, etc., are also bolstered. Economists call this the multiplier effect. Medicaid spending at the state level injects more money into the state economy than would otherwise be there because of the federal match (i.e., reimbursement). In this way, Medicaid spending, more than other state spending, has uniquely powerful economic impacts on states. The magnitude of the Medicaid multiplier effect varies from state to state, depending on the size of the state's federal match rate, how the initial dollars are spent, and the economic conditions in the state.

Medicaid spending is countercyclical, rising when the economy falls and falling when the economy rises. The Medicaid spending patterns have nearly always tracked enrollment growth and the enrollment is affected by changes in the economic cycles. The business cycle is an important determinant particularly for nondisabled adults and children. As unemployment increases, workers and their dependents may lose access to employer coverage. This can happen because of unemployment, reduced employer contributions to health insurance, reduced eligibility for employer-sponsored insurance, and movement from full-time to part-time work. Individuals may become eligible and enroll in public coverage, purchase nongroup coverage, or become uninsured.

During an economic downturn, while the demand for Medicaid rises, state revenues decline, affecting states' ability to balance their budgets and to fund programs such as Medicaid. As a result, states must grapple with increasing pressures to limit program spending in Medicaid and manage the increased enrollment.

Medicaid vs. Medicare

Medicaid and Medicare are two different programs. Medicare is a federal health insurance program that covers individuals age 65 and over, as well as some disabled individuals. Medicaid is a federal-state medical assistance program for low-income individuals. Medicare provides only partial coverage, and requires beneficiaries to pay premiums, deductibles, and copayments. Medicaid provides more complete coverage,

without significant cost sharing from the recipients. All persons over age 65 (as well as younger individuals disabled for at least two years) who paid into Social Security are eligible for Medicare, but only low-income persons who are aged, blind, disabled, or are low-income families and adults, are qualified for Medicaid. Table 19 shows the differences between Medicaid and Medicare.

Table 19. Medicaid vs. Medicare	
Medicaid	Medicare
State administered under federal guidelines	Federally administered
State and federal funding	Federal funding
Must be low-income	No income limit
Children, parents, adults, disabled, and age 65 plus	Age 65 plus and some people with disabilities
Benefit coverage varies by state	Same benefit coverage nationwide

Medicare has four different benefit packages, or "Parts" commonly referred to as Medicare Parts A, B, C, and D. While Medicare Part A automatically covers most people who qualify, the remaining packages are optional and have associated costs.

Part A Hospital Insurance. Most people do not pay a premium for Part A because they or a spouse already paid for it through their payroll taxes while working. Medicare Part A helps cover inpatient care in hospitals, including critical access hospitals and skilled nursing facilities (not custodial or long-term care). It also helps cover hospice and some home health care. Beneficiaries must meet certain conditions to get these benefits.

Part B Medical Insurance. Most people pay a monthly premium for Part B. Medicare Part B helps cover doctors' services and outpatient care. It also covers some other medical services that Part A does not cover, such as some of the services of physical and occupational therapists and some home health care. Part B helps pay for these covered services and supplies when they are medically necessary.

Part C Advantage Plans. People with Medicare Parts A and B can choose to receive all of their health care services through Medicare Health Plans, which are referred to as Medicare Advantage Plans (MA Plans), under Part C. Medicare beneficiaries may voluntarily select this option and then choose from among a number of MA Plans contracted with the federal government to do business in their state or geographic region. Enrolling in Medicare Part C means the individual transfers their Part A and Part B health care coverage to the responsibility of their MA Plan.

Part D Prescription Drug Coverage. Medicare Part D, Medicare prescription drug coverage, began on January 1, 2006. It is provided through Prescription Drug Plans and MA Plans. It is optional coverage for which Medicare beneficiaries must enroll and pay a monthly insurance premium, an annual deductible, and coinsurance costs.

Dual Eligibles

Individuals who are eligible for both Medicaid and Medicare simultaneously are called "dual eligibles." Medicaid plays different roles for different types of dual eligibles. Most dual eligibles qualify for full Medicaid benefits. For these individuals, Medicaid helps to fill in some of the gaps in Medicare coverage by paying for services that are not part of the standard Medicare benefit package, such as most long-term care services. These individuals account for most of the costs to Medicaid for dual eligibles. For other dual eligibles that do not qualify for full Medicaid benefits, Medicaid helps to make Medicare more affordable by providing assistance with Medicare premiums, deductibles, and other coinsurance requirements. Whether they qualify for full benefits or more limited assistance, most dual eligibles are very low-income individuals – typically have income of less than \$10,000 a year, and often face serious health challenges such as diabetes, heart disease, dementia, or a severe mental illness. The Medicare Premium Assistance Program is Ohio's program that pays Medicare premiums, deductibles, and coinsurance for these low-income individuals enrolled in Medicare. This program is sometimes referred to as the Medicare Buy-In Program and is considered to be a part of the larger Medicaid Program.

Medicare Part D

The Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003 established the "Part D" in Medicare that gives people access to a private Medicare prescription drug plan. This Medicare pharmacy benefit, which provides drug coverage for many individuals that previously had none, has broad implications for states. The MMA requires state Medicaid programs to determine eligibility for Part D Medicare beneficiaries, and to contribute to the cost of federal prescription drug coverage for dual eligibles.

Pharmacy Benefits Under Medicare Part D. Like all other Medicare beneficiaries, dual eligibles have access to the universal Medicare prescription drug benefit starting January 1, 2006. Prior to January 2006, the prescription drug costs of the dual eligibles were paid by Medicaid. Under MMA, Medicaid no longer pays for prescription drugs for dual eligibles. Instead, they are to obtain their drug coverage by enrolling in one of the Medicare drug plans. Dual eligibles can sign up for a Medicare drug plan on their own, but, if they do not do so, the HHS Secretary is required to randomly enroll them in a plan.

Phased-Down State Contribution (Clawback). The mechanism through which the states help finance the Medicare drug benefit is popularly known as the "clawback" (the statutory term is "phased-down state contribution"). In brief, the clawback is a monthly payment made by each state to the federal Medicare Program. The amount of each state's payment roughly reflects the expenditures of its own funds that the state would have made if it continued to pay for prescription drugs through Medicaid on

behalf of dual eligibles. A state's clawback payment for any given month is equal to the product of a three-part formula:

$$\text{Payment} = (\text{PCE}/12) \times \text{DE} \times \text{P}\%$$

Per Capita Expenditures (PCE). This is the state's share of its per capita Medicaid expenditure for covered drugs for dual eligibles in calendar year (CY) 2003, increased by the growth in per capita prescription drug spending nationally, and adjusted for the change in the state's relevant FMAP. In calculating the state Medicaid per capita expenditures for prescription drugs for dual eligibles in CY 2003, it must include pharmacist dispensing fees, adjust for manufacturer rebates, and exclude any expenditure for drugs not covered under Part D.

Dual Eligibles (DE). This is the number of dual eligibles in the month who are enrolled in Medicare Part D and have been determined by the state to be eligible for full Medicaid benefits, not just subsidies for Medicare premiums and cost sharing.

Phase-Down Percentage (P%). This is the phase-down percentage for the year specified in the MMA. As seen in Table 20, the phase-down percentage decreases from 90% in CY 2006 to 75% in CY 2015 and thereafter.

Calendar Year	Percentage
2006	90.00%
2007	88.33%
2008	86.67%
2009	85.00%
2010	83.33%
2011	81.67%
2012	80.00%
2013	78.33%
2014	76.67%
2015 and thereafter	75.00%

For example, if, in January 2014, Ohio had 206,000 dual eligibles enrolled in Part D plans, and if the average monthly per capita Medicaid spending for prescription drugs for dual eligibles were \$120, then Ohio's clawback payment amount for the month would be \$18.9 million.

$$\$18.9 \text{ million} = \$120 \times 206,000 \times 76.67\%$$

Medicaid Eligibility

Federal Eligibility Category

Historically, federal law required states to cover certain "mandatory" groups in order to receive any federal matching funds. To qualify for Medicaid, a person had to meet financial criteria and be "categorically eligible" for the program. Financial eligibility was determined by income and assets. Categorical eligibility is determined by the federal government. Individuals had to fall into one of the federally determined population categories covered by Medicaid to qualify for the program. If an individual did not fall into one of these categories, he or she could not qualify for Medicaid even if his or her income and assets met the financial eligibility requirements. For example, adults without dependent children, no matter how poor they were, were categorically excluded from Medicaid unless they were disabled or pregnant. However, changes in ACA provide eligibility for nonelderly, childless adults who do not fit into the traditional categories.

The following Medicaid eligibility groups are examples of traditional mandatory groups under federal law:

- Parents who would meet the eligibility criteria for participation in the cash assistance program Aid to Families with Dependent Children (AFDC) as of July 16, 1996;¹⁵
- Children under age six in families with incomes up to 133% FPL;
- Children age six and older with family incomes up to 100% FPL, rising to 133% FPL beginning in 2014;
- Recipients of adoption assistance and foster care under Title IV-E of the Social Security Act, expanding to age 26 beginning in 2014;
- Pregnant women with incomes up to 133% FPL. In addition, after giving birth, these women and their infants have mandated coverage throughout the infant's first year, after which women and infants may continue to receive Medicaid coverage if eligible in other eligibility categories.
- Supplemental Security Income (SSI) recipients (or in states using more restrictive criteria – aged, blind, and disabled individuals who meet criteria which are more restrictive than those of the SSI Program and which were in place in the state's approved Medicaid Plan as of January 1, 1972).

Under the ACA, Medicaid eligibility for people under age 65 is based solely on income. With categorical restrictions abolished for this population, beginning 2014,

¹⁵ In Ohio, families with dependent children with incomes no higher than 32% FPL were eligible for AFDC.

states have an option to extend eligibility to adults under age 65 with income up to 133% FPL (plus 5% income disregard), for both parents and those without dependent children. States are to receive enhanced federal financial participating rates for the new eligibility group. The cost of the new eligibility group is fully financed by the federal government from 2014 to 2016. For subsequent years, the federal government will continue to finance the larger share, phasing down to 90% in 2020 and thereafter. Overall, federal funds will finance 96% of the cost of the Medicaid expansion over the first decade. If a state accepts the new ACA Medicaid expansion funds, it must abide by the new expansion coverage rules, but based on the Supreme Court's opinion, a state can refuse to participate in the expansion without losing any of its current federal Medicaid matching funds.

In addition to the expansion of coverage to childless adults, the ACA expands, beginning in 2014, Medicaid coverage to certain individuals who age out of foster care, up to age 26. The ACA, however, did not change Medicaid eligibility for the elderly and people with disabilities.

Under the ACA, as of January 1, 2014, modified adjusted gross income (MAGI) rules apply to most Medicaid enrollees. Also, no asset test will apply. MAGI is defined as the Internal Revenue Code's Adjusted Gross Income (AGI, which reflects a number of deductions, including trade and business deductions, losses from sale of property, and alimony payments), increased (if applicable) by tax-exempt interest and income earned by U.S. citizens or residents living abroad. In addition, for certain eligibility groups, states must disregard dollar amounts equal to 5% FPL, and states are prohibited from applying additional income disregards. MAGI does not apply for specific exempted populations (e.g., those eligible for Medicaid based on their eligibility through another federal or state program such as SSI or foster care, the elderly, certain disabled individuals, and medically needy populations). For such exempted populations, AFDC and SSI income counting rules continue to apply.

CMS's Rules on Eligibility and Enrollment Simplification under the ACA

On March 16, 2012, CMS released its eligibility and enrollment final rule to assist states in implementing the ACA coverage expansion. Major provisions of the rule regarding eligibility, which is effective January 1, 2014, are briefly summarized below.¹⁶

1. Medicaid eligibility extends to a new "adult group," which includes all nonpregnant individuals ages 19 to 65 with household incomes at or below

¹⁶ Source: Kaiser Commission on Medicaid and the Uninsured, *Medicaid Eligibility, Enrollment Simplification, and Coordination under the Affordable Care Act: A Summary of CMS's March 23, 2012 Final Rule*, December 2012.

- 133% FPL. Parents enrolling under this category must have their children enrolled in Medicaid, SCHIP, or other "minimum essential coverage." (This is now optional following the Supreme Court's decision.)
2. Most existing Medicaid eligibility categories are collapsed into three broad groups: (1) parents, (2) pregnant women, and (3) children under age 19. States set income eligibility standards for these groups subject to federally specified minimums and maximums. The transition to these broader groups is not intended to change current eligibility levels for these populations, but rather to streamline and consolidate existing eligibility categories.
 3. States may choose to cover nonelderly individuals who are not otherwise eligible for Medicaid, including pregnant women and children, with incomes above 133% FPL up to a maximum standard set by the state. States may phase-in coverage of the new group by category (e.g., pregnant women, children). Any parents enrolled under this category must have their children enrolled in Medicaid, SCHIP, or other "minimum essential coverage."
 4. Medicaid financial eligibility for most categories are based on the MAGI definition of household income. For these groups, MAGI methods are used to determine eligibility for new applicants beginning as of January 2014. MAGI methods are not applied to existing beneficiaries who were determined eligible for Medicaid on or before December 31, 2013 until March 31, 2014 or the next regularly scheduled renewal for the individual, whichever is later. Groups listed below are exempt from the use of MAGI. These groups continue to have their financial eligibility determined based on existing Medicaid rules.
 - Individuals eligible for Medicaid on a basis that does not require the determination of income by the Medicaid agency (e.g., SSI beneficiaries);
 - Individuals age 65 and older (only for purposes of being evaluated for an eligibility group related to age);
 - Individuals whose eligibility is determined on the basis of being blind or disabled (only for determining eligibility on such basis);
 - Individuals who request coverage for long-term services and supports, including nursing facility services, home and community-based services, and home health services;
 - Individuals eligible for Medicare cost sharing assistance (only for determining eligibility for Medicare cost sharing assistance);
 - Medically needy individuals (only for determining eligibility for the medically needy category).

5. Although MAGI is determined on an annual basis, Medicaid eligibility will remain based on income at the time of application. Medicaid eligibility determinations for new applicants continue to be based on current monthly income. For existing Medicaid beneficiaries determined eligible based on MAGI, the rule provides states the option to base continuing financial eligibility on either current monthly income or projected annual income for the remainder of the calendar year. In determining current monthly or projected annual income, a state may take into account reasonably anticipated changes in income. Actual changes in income must be reported by applicants and beneficiaries and acted upon by the state Medicaid agency.
6. The rule generally adopts MAGI methods for counting household income and eliminates the variety of income disregards and deductions currently used by states. In addition, there are no resource tests under MAGI. Using MAGI methods, household income is the sum of the income of every individual who is in the household, minus a standard income disregard of 5% of the FPL for the applicable household size.
7. The rule generally aligns references to "family size" in the current Medicaid rules with the definition of "household" used under MAGI.

Federal Poverty Lines

States use FPL in developing their income eligibility criteria for various Medicaid groups. FPL is the income guideline established and issued each year in the Federal Register by HHS. Public assistance programs usually define income standards in relation to FPL. Table 21 below provides the 2015 poverty lines for various family sizes for the 48 contiguous states and the District of Columbia. Alaska and Hawaii are provided a different set of federal poverty lines.

Family Size	Poverty Line
1	\$11,770
2	\$15,930
3	\$20,090
4	\$24,250
5	\$28,410
6	\$32,570
7	\$36,730
8	\$40,890

Ohio Medicaid Eligibility

While the federal government requires that certain groups be covered, it grants states flexibility in setting Medicaid eligibility. Optional eligibility groups include pregnant women, children, and parents with income exceeding the mandatory thresholds; persons residing in nursing facilities with income below 300% of the SSI standard, and "medically needy" individuals, who have high health expenses relative to their income. Between state expansions of Medicaid and eligibility under SCHIP, Ohio has expanded its coverage above the federal minimum.

To be qualified for Ohio Medicaid, an individual must meet basic requirements:

- Be a U.S. citizen or meet Medicaid citizenship requirements;¹⁷
- Be an Ohio resident;
- Have or get a Social Security number; and
- Meet certain financial requirements.

Various covered groups under Ohio Medicaid are described in the following sections.

Covered Families and Children and Group VIII

Covered Families and Children (CFC) includes families, children, and pregnant women. CFC is itself made up of several categories, including Healthy Start and Healthy Families. Generally, state law does not specify which persons fit into which categories. Rather, the categories have in large part been created administratively and there may not be a clear consensus as to the specific composition of the different categories.

Healthy Start

Healthy Start includes children under age 19 with family incomes not exceeding 200% FPL and pregnant women with family incomes not exceeding 200% FPL.

Children in families whose income is between 150% and 200% FPL must be considered "uninsured" to be eligible for Healthy Start. Children in families with

¹⁷ The citizenship requirement, which became effective September 25, 2006, is a result of the Deficit Reduction Act of 2005. The citizenship requirement is meant to ensure those receiving public assistance are U.S. citizens. The law requires everyone applying for Medicaid to provide original documents to establish legal citizenship. Previously, Medicaid applicants could self-declare their U.S. citizenship. (Immigrants applying for Medicaid have always been required to document their status.) Additionally, Medicaid recipients who were approved before the Deficit Reduction Act was enacted must verify their citizenship status at the time of their reapplication for Medicaid benefits. Citizenship needs to be established only once.

income below 150% FPL can have other health insurance and still qualify for Healthy Start.

Part of Healthy Start is funded with regular Medicaid funds. Another part, covering uninsured children under age 19 who do not otherwise qualify for Medicaid, is funded with SCHIP funds. The state receives a higher federal match for SCHIP.

In Ohio, SCHIP is commonly discussed as consisting of two parts: CHIP I and CHIP II. CHIP I began January 1998 and provides coverage for low-income children up to age 19 in families at or below 150% FPL. Am. Sub. H.B. 283 of the 123rd General Assembly (the FY 2000-FY 2001 budget) established CHIP II to cover uninsured individuals under age 19 in families with incomes between 150% and 200% FPL. CHIP II commenced on July 1, 2000.

Pregnant women are eligible for Healthy Start coverage during the entire pregnancy and up to 60 days after the baby is born. Babies born to mothers on Healthy Start are automatically eligible for free health coverage for one full year from the date of birth. Furthermore, pregnant women are allowed to receive expedited enrollment into Medicaid by meeting certain criteria. Expedited enrollment allows pregnant women to receive services under the fee-for-service (FFS) delivery system within 24 hours of applying for Medicaid. Once their eligibility is approved, they may continue to receive services under the FFS delivery system until they enroll in a managed care plan. After a pregnant woman selects a managed care plan, the state pays monthly capitation rates for the woman for the remainder of her pregnancy and pays a separate delivery payment upon birth.

Healthy Families

Healthy Families includes families with children. This category too can be broken down into different subcategories, including families that receive cash assistance under Ohio Works First and other families with family income not exceeding 90% FPL.

Other subcategories of CFC include the following:

- Extended eligibility (up to four months) for families that lose eligibility under the Healthy Families due to collection or increased collection of child or spousal support.
- Transitional Medicaid (up to 12 months) for families that lose eligibility under Healthy Families because their income exceeds 90% FPL due to increased earned income. The family must have received Medicaid under Healthy Families for at least three of the six months before losing eligibility due to the increased earned income.
- Certain low-income individuals age 19 or 20 who do not qualify for Medicaid under Healthy Families.

- Children for whom adoption assistance or foster care maintenance payments are provided.¹⁸
- Individuals under age 21 who were in foster care on their 18th birthday and for whom foster care maintenance payments or independent living services were furnished before they turned 18.

Group VIII

Beginning January 1, 2014, Medicaid coverage expands to adults between the ages of 19 and 64, who have family income less than 133% of FPL (with a 5% income disregard) and who are not eligible under other categories of Medicaid. In addition, parents whose family income is between 91% and 133% of the FPL (with a 5% income disregard) are eligible as Group VIII adults.

Aged, Blind, and Disabled

Medicaid covers certain low-income individuals who are aged (age 65 or older), blind, or disabled (ABD). ABD applicants must meet both income and resource criteria to qualify for Medicaid. Assets and resources are items such as: cash, stocks, bonds, bank accounts, and property. Some resources, such as the home in which the person is living, are considered exempt and are not counted when determining Medicaid eligibility. ABD applicants also must meet transfer of resources criteria that are in place to prevent a person from impoverishing themselves by giving away money to be qualified for Medicaid. In addition to meeting income and resources limits, ABD individuals must be elderly (age 65 or older), significantly visually impaired, or have a disabling condition that meets SSI requirements.

In some states, recipients of SSI are automatically eligible for Medicaid. Ohio is a 209(b) state, however, which means persons who receive SSI benefits do not automatically qualify for Medicaid in this state. Ohio uses more restrictive eligibility requirements for ABD. There are different standards for different services, but in general, ABD populations with annual incomes up to approximately 64% FPL are eligible for Medicaid in Ohio. ABD applicants whose income exceeds the Medicaid limit may qualify for Medicaid on a month-to-month basis after they "spend down" some of their income on health care expenses.

Tables 22 and 23 show the annual and monthly income limits for various eligible populations.

¹⁸ Children receiving a federally funded (Title IV-E) subsidy are automatically eligible for Medicaid. Children receiving a state-funded (non-Title IV-E) adoption subsidy can be eligible for Medicaid, based upon the child's income, resources, and special needs for medical, mental health, or rehabilitative care.

Table 22. Annual Income Guidelines					
		Annual Income Guidelines by Persons in Family			
Eligible Population	Income Guidelines	1	2	3	4
Workers with disabilities	<= 250%	\$29,425	\$39,825	\$50,225	\$60,625
Children to age 19	<= 200%	\$23,540	\$31,860	\$40,180	\$48,500
Pregnant women	<= 200%	\$23,540	\$31,860	\$40,180	\$48,500
Parents	<= 133%	\$15,654	\$21,187	\$26,720	\$32,253
Adults age 19 to 65	<= 133%	\$15,654	\$21,187	\$26,720	\$32,253
Disabled persons	<= 64%	\$7,533	\$10,195	\$12,858	\$15,520
Persons 65 & over	<= 64%	\$7,533	\$10,195	\$12,858	\$15,520

These figures are based on 2015 Federal Poverty Lines and change annually.
 Some eligibility categories consider resources other than income.
 Persons with incomes higher than 64% FPL may have medical expenses deducted from income calculations to "spend down" to this level.

Table 23. Monthly Income Guidelines					
		Monthly Income Guidelines by Persons in Family			
Eligible Population	Income Guidelines	1	2	3	4
Workers with disabilities	<= 250%	\$2,452	\$3,319	\$4,185	\$5,052
Children to age 19	<= 200%	\$1,962	\$2,655	\$3,348	\$4,042
Pregnant women	<= 200%	\$1,962	\$2,655	\$3,348	\$4,042
Parents	<= 133%	\$1,305	\$1,766	\$2,227	\$2,688
Adults age 19 to 65	<= 133%	\$1,305	\$1,766	\$2,227	\$2,688
Disabled persons	<= 64%	\$628	\$850	\$1,071	\$1,293
Persons 65 & over	<= 64%	\$628	\$850	\$1,071	\$1,293

These figures are based on 2015 Federal Poverty Lines and change annually.
 Some eligibility categories consider resources other than income.
 Persons with incomes higher than 64% FPL may have medical expenses deducted from income calculations to "spend down" to this level.

Medicare Cost Sharing Assistance

Medicaid helps certain Medicare beneficiaries with various Medicare cost-sharing expenses. The four major categories of Medicare cost sharing assistance are described below.

The first category is Qualified Medicare Beneficiary (QMB). In general, to qualify for the QMB category a Medicare recipient must have family income not exceeding 100% FPL. Medicaid pays QMB beneficiaries' Medicare Part A and B premiums and other Medicare cost sharing expenses (copayments, deductibles, and coinsurance).

The second category is Specified Low-Income Medicare Beneficiary (SLMB). In general, to qualify for SLMB a Medicare beneficiary must have family income above 100% FPL but less than 120% FPL. Medicaid pays SLMB beneficiaries' Medicare Part B premiums.

The third category is Qualified Individual (QI). In general, to qualify for the QI category a Medicare recipient must have family income of at least 120% FPL but not exceeding 135% FPL. Medicaid pays QI beneficiaries' Medicare Part B premiums, subject to an annual federal funding cap.

The income and asset limits for these programs are summarized in Tables 24 and 25.

Table 24. Monthly Income Limits		
	Individual Income Limit	Couple Income Limit
QMB	\$1,001 or less	\$1,348 or less
SLMB	\$1,197 to \$1,332	\$1,613 to \$1,789
QI	\$1,345	\$1,813

Note: Income based on the 2015 Federal Poverty Guideline and changes annually.
<http://www.medicare.gov/your-medicare-costs/help-paying-costs/medicare-savings-program/medicare-savings-programs.html#qmb>

Table 25. Asset Limits	
Individual Income Limit	Couple Income Limit
\$7,280	\$10,930

The fourth category is Qualified Disabled and Working Individual (QDWI). In general, to qualify for the QDWI category, an individual must have lost Medicare Part A benefits due to losing eligibility for disability benefits under Title II of the Social Security Act following a return to work, but be eligible to purchase Medicare Part A benefits by paying premiums, have family income not exceeding 200% FPL, and resources that do not exceed twice the limit for SSI. Medicaid pays QDWI beneficiaries' Medicare Part A premiums.

Breast and Cervical Cancer

Medicaid covers women under age 65, who have been screened for breast and cervical cancer under the federal Breast and Cervical Cancer Early Detection Program, and need treatment for the cancer. To qualify for the component, a woman cannot be covered by insurance considered to be "creditable coverage." Eligibility for Medicaid is limited to the period in which the woman requires treatment for breast or cervical cancer. The federal government reimburses a higher share of the costs of Medicaid provided under this group than the regular federal reimbursement rate.

Medicaid Buy-In for Workers with Disabilities

The Medicaid Buy-In for Workers with Disabilities Program is available to employed, disabled individuals, who are at least 16 but younger than 65 years of age, have countable income not exceeding 250% FPL, and meet other eligibility requirements including a resource requirement. Individuals with income exceeding 150% FPL must pay an annual premium to be qualified.

Family Planning Services

The ACA adds a new Medicaid eligibility option for states to improve access to family planning care without applying for waivers from the federal government. States can amend their Medicaid plans to create a new eligibility group of low-income individuals through a State Plan Amendment. On January 8, 2012, Ohio Medicaid implemented a new eligibility category that allows men and women of childbearing age who are under 200% FPL to receive family planning services.

Medicaid Benefits

Prior to 2006, in general, states were required to provide mandatory and optional services to their Medicaid recipients, referred to as "traditional" benefits. Under the DRA, states were given the option to provide "benchmark" and benchmark-equivalent benefit packages, as an alternative to the traditional benefits, to certain Medicaid populations or in certain state areas. However, most groups are exempt from benchmark coverage, including mandatory pregnant women and parents, individuals with severe disabilities, individuals who are medically frail or have special needs, dual eligibles, people with long-term care needs, and specified other groups.

Traditional Medicaid Benefits

Medicaid covers seniors, families, pregnant women, and people with physical and mental illness and chronic diseases. To address the various health care needs of its diverse recipients, Medicaid provides a rich benefit package not typically covered by private insurance, but also many additional services, such as dental and vision care and transportation, as well as long-term care services.

The Social Security Act specifies a set of mandatory health care services state Medicaid programs must cover and a set of optional services states may choose to cover. Most services provided under a state's Medicaid plan must be available to all covered individuals who have a medical need for that service. Exceptions include services provided only to children or only to individuals enrolled in home and community-based services waivers. As long as these benefits are provided in accordance with federal guidelines, states will receive federal financial participation (reimbursement) for eligible services provided to covered populations. As with private insurance, most of the services can be limited on the amount, duration, or scope of the benefits. For example, state Medicaid programs can choose the setting in which covered

services can be provided, limit the number of visits for a certain service, and cap the annual spending per person for a particular service. States are also allowed to use numerous tools to manage utilization, such as copayment, prior authorization, and case management.

Two important Medicaid benefits not covered in most private health insurance plans are Early and Periodic Screening, Diagnostic and Treatment (EPSDT) and long-term care services. EPSDT, known as Healthchek in Ohio, is a federally mandated program established to ensure Medicaid recipients under age 21 have access to periodic preventive care examinations and medically necessary treatment. The purpose of Healthchek is to discover and treat health problems as early as possible to prevent them from progressing. It requires state Medicaid programs to provide for any medical service a physician determines is needed for a Medicaid-eligible child. Under this program, children covered by Medicaid receive all the basic medical services such as well-child visits, immunizations, dental, hearing, and other screening services. In addition, they are also able to access a wide array of services that states do not otherwise cover in their Medicaid programs. In Ohio, a Healthchek coordinator is available in each Ohio county department of job and family services to assist Medicaid recipients in getting these services. All children eligible for Medicaid qualify for this program regardless of their eligibility category.

Medicaid long-term care includes comprehensive services provided in institutions, such as a nursing home or ICF/IID, and a wide range of services and supports needed by people to live independently in the community, such as home health care, personal care, medical equipment, rehabilitative therapy, adult day care, case management, and respite for caregivers.

All states must provide nursing home care as part of their Medicaid programs for seniors and other individuals with severe physical disabilities. Medicaid is by far the largest payer in Ohio, accounting for almost 70% of all nursing home costs.

Although technically an optional benefit, prescription drugs are covered in all states. Many of the services that are technically optional are particularly vital for persons with chronic conditions or disabilities and the elderly. Despite their "optional" designation in statute, the inclusion of many of these services in state Medicaid packages is evidence that they are often essential as a practical matter. Notably, more than 20% of Medicaid spending in Ohio is attributable to optional services.

Table 26 shows the services covered under Ohio Medicaid that are mandatory (M) and optional (O).

Table 26. Mandatory Services vs. Optional Services	
Mandatory Services	Optional Services
Ambulatory surgery centers	Ambulance & ambulette
Certified nurse practitioners	Chiropractic
Dental (medical & surgical)	Community alcohol & drug addiction treatment
Family planning and supplies	Community behavioral mental health
Home health	Dental
Inpatient hospital	Durable medical equipment and supplies
Lab & x-ray	Home & community-based service waivers
Nonemergency transportation	Hospice care
Nursing facility care	Independent psychology
Nurse midwife	Intermediate care facility
Outpatient hospital	Occupational therapy
Physician	Physical therapy
Vision (medical & surgical)	Podiatry
	Prescription drugs
	Private duty nursing
	Speech therapy
	Targeted case management
	Vision care

Benchmark Benefits

In general, benchmark benefit packages may cover fewer benefits than traditional Medicaid, but there are some requirements, such as coverage of EPSDT services and transportation to and from medical providers, that might make them more generous than private insurance. The benchmark options include:

- The Blue Cross/Blue Shield standard provider plan under the federal employees Health Benefits Program;
- A plan offered to state employees;
- The largest commercial HMO in the state; and
- Other U.S. Secretary-approved coverage appropriate for the targeted population.

Benchmark-equivalent coverage must have the same actuarial value as one of the benchmark plans identified above. Such coverage must include: (1) inpatient and outpatient hospital services, (2) physician services, (3) lab and x-ray services, (4) emergency care, (5) well-child care, including immunizations, (6) prescribed drugs, and (7) other appropriate preventive care (designated by the Secretary). Such coverage must also include at least 75% of the actuarial value of coverage under the benchmark plan for vision care and hearing services (if any). For any child under age 21 in one of the major mandatory and optional Medicaid eligibility groups, benchmark and benchmark-equivalent coverage must include EPSDT. Also, Medicaid recipients enrolled in such coverage must have access to services provided by rural health clinics and federally qualified health centers.

Under the ACA, the newly eligible Medicaid adults with income up to 138% FPL, unless they belong to one of the exempt groups mentioned above, will be enrolled in benchmark or benchmark-equivalent plans instead of traditional Medicaid. The reform law establishes a new minimum standard for benchmark benefits. Starting in 2014, both benchmark and benchmark-equivalent packages must cover at least essential health benefits that will also apply to plans in the private individual and small group markets. There are ten such essential health benefits: (1) ambulatory services, (2) emergency services, (3) hospitalization, (4) maternity and newborn care, (5) mental health and substance abuse services, (6) prescribed drugs, (7) rehabilitative and habilitative services and devices, (8) lab services, (9) preventive and wellness services and chronic disease management, and (10) pediatric services, including oral and vision care. Many of these essential health benefits are already coverable under benchmark packages. All benchmark packages must also cover family planning services.

Ohio's Medicaid Benefits

Ohio's Medicaid Program provides a comprehensive package of services that includes preventive care for Medicaid recipients. Benefits include primary and acute-care as well as long-term care. Some services are limited by dollar amount, number of visits per year, or setting in which they can be provided.

Basic covered services under Ohio Medicaid are described in the following sections.

Nursing Facility

A nursing facility provides skilled and intermediate nursing care, rehabilitation services, and other health-related care services on a regular basis. Nursing facility services are provided by nursing homes licensed by the Ohio Department of Health (ODH), county operated homes, or separate hospital units. To receive Medicaid payment for services, nursing facilities must meet state and federal requirements. ODM delegates the certification of these facilities to ODH, which also certifies their

participation in the federal Medicare Program. There are about 900 nursing facilities with more than 88,000 Medicaid-certified beds providing services to Medicaid recipients in Ohio.

Nursing Facility and Intermediate Care Facility for Individuals with Intellectual Disabilities (ICF/IID) are the only Medicaid services for which the Ohio Revised Code establishes the reimbursement formula. The manner in which Medicaid is to pay for the services has undergone extensive changes since it was first enacted into state law. The General Assembly first enacted the law establishing a Medicaid payment system for long-term care services in 1980. This payment system was retrospective in nature. In 1991, the General Assembly replaced the retrospective system with a temporary prospective system. In 1992, a prospective system was codified. For FY 2002 to FY 2006, temporary caps on the system were put in place. Medicaid payments for nursing facility services was based on the facilities' reported costs, with adjustments made to reflect the resident care needs and other limiting parameters. However, Am. Sub. H.B. 66 of the 126th General Assembly (the FY 2006 and FY 2007 biennial budget bill) substantially revised the Medicaid reimbursement formula for nursing facilities. The reimbursement formula was modified from a cost-based formula to a price-based model.

Regular Medicaid Payment Rate

The regular Medicaid payment rate for a nursing facility is based on four cost centers and one or, in the case of a critical access nursing facility, two special payments. The four cost centers are ancillary and support costs, capital costs, direct care costs, and tax costs. The special payment available to all nursing facilities is the quality incentive payment. The second special payment available to a critical access nursing facility is the critical access incentive payment.

A nursing facility's total rate, as shown below, is the sum of its rate for each cost center, its quality incentive payment, and, if applicable, its critical access incentive payment.

$$\begin{aligned}
 & \textit{Regular total Medicaid payment rate} \\
 & = \textit{rate for ancillary and support costs} + \textit{rate for capital costs} \\
 & + \textit{rate for direct care costs} + \textit{rate for tax costs} + \textit{quality incentive payment} \\
 & + \textit{(in the case of a critical access nursing facility) critical access incentive payment}
 \end{aligned}$$

Ancillary and Support Costs. A nursing facility's rate for ancillary and support costs is its peer group's rate for ancillary and support costs. A peer group's rate for ancillary and support costs is determined as follows:

1. Determine the rate for ancillary and support costs for each nursing facility in the peer group by using the greater of the facility's actual inpatient days or the inpatient days the facility would have had if its occupancy rate had been 90%;

2. Identify which nursing facility in the peer group is at the 25th percentile of the rate for ancillary and support costs determined under (1) above;
3. Multiply the rate for ancillary and support costs determined under (1) above for the nursing facility identified under (2) above by the rate of inflation for an 18-month period; and
4. Until the first rebasing of the rate for ancillary and support costs occurs, increase the amount calculated under (3) above by 5.08%.¹⁹

Capital Costs. A nursing facility's rate for capital costs is its peer group's rate for capital costs. A peer group's rate for capital costs is determined as follows:

1. Determine the rate for capital costs for the nursing facility in the peer group that is at the 25th percentile of the rate for capital costs; and
2. Until the first rebasing of the rate for capital costs occurs, increase the amount calculated under (1) above by 5.08%.

Direct Care Costs. A nursing facility's rate for direct care costs is determined semiannually by multiplying the cost per case-mix unit determined for the facility's peer group by the facility's semiannual case-mix score. A peer group's cost per case-mix unit is determined as follows:

1. Determine the cost per case-mix unit for each nursing facility in the peer group by dividing each facility's allowable per diem direct care costs by the facility's annual average case-mix score;
2. Identify which nursing facility in the peer group is at the 25th percentile of the cost per case-mix units determined under (1) above;
3. Calculate the amount that is 2% above the cost per case-mix unit determined under (1) above for the nursing facility identified under (2) above;
4. Multiply the rate of inflation for an 18-month period by the amount calculated under (3) above;
5. Until the first rebasing of the rate for direct care costs occurs, add \$1.88 to the amount calculated under (4) above; and
6. Until the first rebasing occurs, increase the amount calculated under (5) above by 5.08%.

¹⁹ A rebasing is a redetermination of the rates for nursing facilities' different costs (or, in the case of direct care costs, their costs per case-mix units) using information from Medicaid cost reports for a calendar year that is later than the calendar year used for the previous determination of the rates or costs per case-mix units.

A case-mix score is the measure of the relative direct-care resources needed to provide care and habilitation to a nursing facility resident. A nursing facility's annual average case-mix score is determined, in part, by using data from an assessment of each resident, regardless of payment source. A nursing facility's semiannual case-mix score is determined, in part, by using data from an assessment of each resident who is a Medicaid recipient and not a low resource utilization resident.

Tax Costs. A nursing facility's rate for tax costs is determined as follows:

1. Divide the nursing facility's allowable tax costs by the number of inpatient days the facility would have had if its occupancy rate had been 100%; and
2. Until the first rebasing of the rate for tax costs occurs, increase the amount calculated under (1) above by 5.08%.

Quality Incentive Payment. The amount of a nursing facility's quality incentive payment depends on how many points it is awarded for meeting accountability measures. To determine a nursing facility's quality incentive per diem payment, the number of such points so awarded is multiplied by \$3.29. There is, however, a cap on the quality incentive payment that may be paid. The maximum payment is \$16.44 per Medicaid day for a nursing facility that is awarded at least one point for meeting accountability measures regarding pain, pressure ulcers, physical restraints, urinary tract infections, and vaccinations. However, the maximum payment is to be reduced to \$13.16 per Medicaid day for a nursing facility that fails to be awarded at least one point for the accountability measures specified in the law.

Critical Access Incentive Payment. A critical access nursing facility's critical access incentive payment equals 5% of the sum of its rate for ancillary and support costs, rate for capital costs, rate for direct care costs, rate for tax costs, and quality incentive payment.

Low Resource Utilization Residents

H.B. 153 of 129th General Assembly established an exception to the Medicaid payment rate based on the formula discussed above. A nursing facility is paid \$130 per Medicaid day for services provided to low resource utilization residents during FY 2013 instead of the rate based on the formula. A low resource utilization resident is a Medicaid recipient residing in a nursing facility who, for purposes of calculating the nursing facility's Medicaid payment rate for direct care costs, is placed in either of the two lowest resource utilization groups, excluding any resource utilization group that is a default group used for residents with incomplete assessment data.

H.B. 303 of the 129th General Assembly provided for the \$130 per Medicaid day rate to continue indefinitely for nursing facility services provided to low resource utilization residents.²⁰ This rate for low resource utilization rates continues beyond the first rebasing.

Inpatient Hospital Services

Ohio pays hospitals for Medicaid inpatient admissions using a prospective payment system that includes a pre-established amount for each admission based on a diagnosis-related group (DRG). A small portion of hospital services provided in freestanding rehabilitation or long-term hospitals, in hospitals that are licensed as Health Maintenance Organizations (HMOs), and in cancer hospitals, are paid on a "reasonable cost" basis. Under the DRG system, hospitals are reimbursed based on the principal diagnosis or condition requiring the hospital admission. The DRG system is designed to classify patients into groups that are clinically coherent with respect to the amount of resources required to treat a patient with a specific diagnosis.

Ohio Medicaid creates DRGs by examining hospital charges statewide and comparing charges for each DRG to the average charges for all discharges. With constant changes in the resources required for health care services, including shifts in technology and more efficient methods of providing patient care, hospital resource consumption changes over time. To recognize these changes, Ohio Medicaid updated payment systems in July 2013 by implementing the 3M Health Information System's All Patient Refined – Diagnosis Related Grouper (APR-DRG).

Although a hospital's costs can vary significantly among patients within a specific DRG, the DRG payment is fixed. To compensate hospitals that incur significantly higher costs for Medicaid patients, the state established outlier payments similar to those enacted for Medicare. Congress established Medicare outlier payments for situations in which the costs of treating a Medicare patient are extraordinarily high in relation to the average costs of treating comparable conditions or illnesses. These outlier policies are intended to promote access to care for patients with extremely costly illnesses. Additional payments are also provided, if applicable, for capital costs and medical education.

Medicaid Prescription Drug Services

Prescription drugs often provide an alternative to expensive surgery, shorten hospital stays, and prevent illness. However, prescription drugs can be expensive. The effort to make prescription drugs available and, at the same time, contain costs has

²⁰ R.C. 5111.222.

created diverse legislative proposals that seek to monitor expenditures, utilization, and access.

Federal law governing Medicaid drug reimbursement has sought to contain costs by placing limits on pharmacy reimbursement and mandatory manufacturer rebates on pharmaceutical products. In 1987, the federal government established a set of limits on payments for drugs in the Medicaid Program. These regulations established several guidelines that have significantly affected public spending on Medicaid and other state-funded programs. The federal government sets a maximum allowable cost for multiple-source drugs and requires state payments for all other drugs not exceed the lesser of the pharmacy's usual and customary charge or the estimated acquisition cost determined by the state. States are allowed to pay pharmacists a reasonable "dispensing fee" to cover pharmacy overhead and profit. Ohio Medicaid presently pays 7% above the wholesale acquisition cost for brand name drugs.

Medicaid prescription drug services in Ohio presently encompass over 30,000 line items of drugs from nearly 300 different therapeutic categories. Pharmacy claims are processed by Xerox State Healthcare in an online, real-time environment, which allows the dispensing pharmacist access to the terms of coverage. In the event a particular product is not approved, the dispensing pharmacist can notify the prescribing physician of possible alternatives in a timely fashion. The prescribing physician may choose an alternative product or may call a designated toll-free number to request prior authorization for the product originally prescribed.

Ohio receives two types of drug rebates under Medicaid: drug rebates under federal law, and supplemental drug rebates under state law. Federal law requires that pharmaceutical manufacturers enter into rebate agreements with the federal government in order for their products to be eligible for outpatient drug coverage by state Medicaid programs. Prior to the implementation of the supplemental drug rebate program in Ohio, the only rebates the state received were the drug rebates under federal law.

Am. Sub. S.B. 261 of 124th General Assembly authorized ODJFS to establish a supplemental drug rebate program under which drug manufacturers may be required to provide a supplemental rebate to the state as a condition of having their products covered by Medicaid without prior approval. Am. Sub. H.B. 95 of the 125th General Assembly continued this provision of the law and allowed the full implementation of the Supplemental Drug Rebate Program and a preferred drug list (PDL).

These programs were initiated in April 2003. ODJFS designated the most clinically and cost-effective drug as the preferred drug in a class; in some cases, more than one drug may be designated as preferred. All other (nonpreferred) drugs in that class are covered; however, prior authorization from the Medicaid pharmacy benefit

manager is necessary in order to obtain a prescribed, nonpreferred drug. ODJFS sought supplemental rebates from manufacturers for preferred prescription drugs.

Am. Sub. H.B. 66 of the 126th General Assembly eliminated a requirement that any drug product used to treat mental illness or HIV or AIDS be exempted from the Supplemental Drug Rebate Program. H.B. 66 also authorized ODJFS to receive a supplemental rebate in a provider's primary place of business.

Am. Sub. H.B. 95 of the 125th General Assembly allowed ODJFS to establish copayments for prescription drugs that are not included on the PDL. Beginning January 1, 2004, certain Medicaid consumers are charged copayments for prescription drugs that are not found on the PDL. These copayments are sought only from those recipients who are eligible for cost sharing under federal requirements. Services for children and those related to pregnancy are federally exempt from copayments, as are services for adults who reside in institutional settings. ODJFS did not actually collect the copayments. Instead, the pharmacist's reimbursement is reduced by the amount of the copayments. Am. Sub. H.B. 66 of the 126th General Assembly also allowed copayments on brand name drugs. Am. Sub. H.B. 59 of the 130th General Assembly further allowed copayments on generic drugs.

Home and Community-Based Service Waivers

Home and Community-Based Service (HCBS) waivers provide alternatives to institutional long-term care under state Medicaid programs. The term "waiver" refers to an exception to federal law that is granted to a state by CMS. Medicaid waivers allow participants, who have disabilities and chronic conditions, to have more control of their lives and remain active participants in their community. Without HCBS waivers, many consumers would live in a hospital, nursing home, or ICF/IID. In addition to providing alternatives to institutional care, waivers allow the state Medicaid Program to limit enrollment, limit the locations where services are provided, and waive certain eligibility requirements.

There are several waivers within Ohio Medicaid. ODM currently administers the Ohio Home Care Waiver (OHCW) and the Transitions Carve-Out Waiver (T2).²¹ The Ohio Department of Aging (ODA) manages the PASSPORT and Assisted Living waivers.²² ODODD manages the Level One Waiver, Individual Options Waiver, Self-

²¹ According to ODM's website, the T2 waiver will be phased out by June 30, 2015 and individuals enrolled on the waiver will be enrolled onto PASSPORT. Transitioning from T2 to PASSPORT is expected to begin in February 2015. This is estimated to impact 1,300 individuals.

²² ODA also managed the Choices waiver until the program ceased operations on June 30, 2014, when consumer directed services became available statewide under PASSPORT and enrollees were transitioned onto PASSPORT.

Empowered Life Funding (SELF) Waiver, and the Transitions Developmental Disabilities (DD) Waiver. Together these waivers provided alternative access to long-term care to almost 70,000 individuals. In addition, MyCare Ohio enrollees are eligible to receive HCBS waiver services.

A level of care is used to approve enrollment on a Medicaid waiver or authorize Medicaid payment to a nursing facility. A person who wants to be enrolled on a Medicaid waiver must meet the specific level of care that is required for that waiver. All individuals must meet and exceed the requirements of a protective level of care, which includes a need for assistance with instrumental activities of daily living (IADLs) and/or supervision of one activity of daily living (ADL) or medication administration.

There are currently two levels of care associated with Medicaid waivers:

1. Intermediate care facility for individuals with intellectual disabilities (ICF/IID) level of care. This level of care includes a presence of a substantial developmental delay or a severe, chronic disability. A Medicaid waiver that requires an ICF/IID level of care provides services as an alternative to institutional care.
2. Nursing Facility-Based (NF-Based) level of care. A Medicaid waiver that requires a NF-Based level of care provides services as an alternative to nursing facilities, hospitals, or rehabilitation facilities. This level of care includes the Intermediate and Skilled levels of care:
 - Intermediate level of care includes a need for assistance with ADLs, medication administration, and/or a need for at least one skilled nursing or skilled rehabilitation service; and
 - Skilled level of care indicates a higher level of need than the Intermediate and ICF/IID levels of care and includes a presence of an unstable medical condition and a need for a specific amount of skilled nursing or skilled rehabilitation services.

Table 27 based on OHT's "Blueprint for a New Ohio Budget Detail, February 2015" provides a summary of these waiver programs.

Medicaid Cost Sharing

Medicaid has historically limited patient cost sharing because the program serves a much poorer and sicker population than private health insurance. The Deficit Reduction Act of 2005 (DRA) loosened the rules that restricted states' use of premiums and cost-sharing in Medicaid. Under DRA, states may impose premiums and cost sharing through Medicaid state plan amendments rather than through waiver authority, subject to specific restrictions.

In general, for individuals with income under 100% FPL:

- No premiums may be imposed;
- Service-related cost sharing cannot exceed nominal amounts; and
- The total aggregate amount of all cost sharing cannot exceed 5% of monthly or quarterly family income.

For individuals in families with income between 100% and 150% FPL:

- No premiums may be imposed;²³
- Service-related cost sharing cannot exceed 10% of the cost of the item or service rendered; and
- The total aggregate amount of all cost sharing cannot exceed 5% of monthly or quarterly family income.

For individuals in families with income above 150% FPL:

- Service-related cost sharing cannot exceed 20% of the cost of the item or service rendered; and
- The total aggregate amount of all cost sharing (including any applicable premiums) cannot exceed 5% of monthly or quarterly family income.

There are exemptions to DRA cost sharing for certain groups and services. Groups such as most children, pregnant women, and individuals with special needs are exempt from paying premiums regardless of their income. Also, certain services such as preventive care for children, emergency care, and family planning services are exempt from the service-related cost sharing. Under the DRA option, special rules apply to cost sharing for nonpreferred prescription drugs and for emergency room copayments for nonemergency care, and such cost sharing can be adjusted for medical inflation over time. Finally, DRA give states the option to terminate Medicaid coverage if premiums are not paid and, except for mandatory children and adults under 100% FPL, to grant health care providers the right to deny care if Medicaid patients do not pay their cost-sharing charges.

Over the past few years, most states have introduced or increased cost sharing requirements for their Medicaid recipients for reasons such as encouraging personal responsibility and controlling prescription drug costs. Cost sharing may make Medicaid recipients less likely to make unnecessary doctor visits or treatments, and copayments on brand name drugs can encourage the use of generic drugs. However, it is possible that cost sharing may force Medicaid recipients to forego needed health care, causing them to become sicker and need more expensive care later on, increasing costs in the long run.

Cost sharing requirements for Medicaid recipients are determined by states, but are subject to federal guidelines. Table 28 shows the current copayments required under Ohio Medicaid.

²³ The executive proposes to seek CMS approval to charge a premium to childless, nonpregnant adults who have income between 100% FPL to 138% FPL.

Services	Copayments
Nonemergency services obtained in a hospital emergency room	\$3 per visit
Dental services	\$3 per visit
Routine eye examinations	\$2 per examination
Eyeglasses	\$1 per fitting
Most brand name (nongeneric) medications	\$2 per prescription or refill
Medications that require prior authorization	\$3 per prescription or refill

If a Medicaid recipient is unable to pay the copayment, they cannot be refused medical services. However, they still owe the copayment to the health care services provider. The health care services provider may refuse medical services if there are past unpaid copayments. Copayments are not required for individuals who are:

- Younger than age 21;
- Pregnant or the pregnancy ended up to 90 days prior;
- Living in a nursing home or an ICF/IID;
- Receiving emergency services in a hospital, clinic, office, or other facility;
- Receiving family planning-related services;
- Receiving hospice care; or
- In a managed care plan that does not charge copayments.

Delivery Systems

Fee-for-Service and Managed Care

There are two delivery systems for Ohio Medicaid: "fee-for-service" and "managed care." Both delivery systems provide medically necessary primary care, specialty and emergency care services, and preventive services. Ohio Medicaid also provides home and community-based, and facility-based long-term care services, exclusively through the fee-for-service system for nondual population.

Medicaid does not directly provide medical services to eligible individuals enrolled in the program. It provides financial reimbursement to health care professionals and institutions for providing approved medical services, products, and equipment to Medicaid enrollees. Under fee-for-service, Medicaid pays most service providers a set fee for the specific type of service rendered. Payments are based on the lowest of the state's fee schedule, the actual charge, or federal Medicare allowances.

An alternative to fee-for-service reimbursement is managed care. The two main models of managed care in Medicaid are managed care organizations and primary care case management (PCCM).

A managed care organization, also called a managed care plan (MCP) under Ohio Medicaid, is a capitated at-risk plan in which the beneficiary receives all care through a single point of entry, and the managed care provider is paid a fixed monthly premium per beneficiary for any health care included in the benefit package, regardless of the amount of services actually used. The beneficiary is responsible for, at most, modest copayments for services; the provider is at risk for the remaining cost of care. A capitated plan can be a network of physicians and clinics, all of whom participate in the plan and also participate in other plans or fee-for-service systems, or it can be a plan that hires the physicians who provide all of the care required.

In PCCM, the primary care provider receives a small fee per person per month to provide basic care and coordinate specialist care and other needed services, which are usually paid fee-for-service. Many states are building into their PCCM programs features to enhance the coordination and management of care for enrollees with chronic illnesses and disabilities. Some disease and care management programs are targeted to people with specific conditions, and others target individuals with multiple conditions. A number of states are structuring payment strategies and incentives to support the "patient-centered medical home" model for Medicaid recipients. This model emphasizes continuous and comprehensive care, care teams directed by a personal physician, and care for all stages of life. It also seeks to enhance access through expanded hours and other improvements. Information technology and quality improvement activities promote quality and safety.

The ACA provides new opportunities for states to improve care delivery in Medicaid. The ACA established the Center for Medicare and Medicaid Innovation (CMMI) to test, evaluate, and expand innovative care and payment models to foster patient-centered care, improve quality, and slow cost growth in Medicare, Medicaid, and SCHIP. The ACA also establishes the Federal Coordinated Health Care Office (FCHCO) within CMS. FCHCO will work to align Medicare and Medicaid benefits and improve state and federal coordination when distributing benefits to dual eligible beneficiaries.

The ACA includes several demonstrations that will enable some states to test new approaches such as bundling payments around hospital care, setting global payments for safety-net hospital systems, allowing pediatric providers to organize as Accountable Care Organizations (ACOs), and encouraging healthy lifestyle changes. The following provides brief descriptions of some of the programs and initiatives authorized by the ACA for reducing the rate of cost growth and improving the quality of care delivery through more coordinated care delivery models and reimbursement methods that reward coordinated care.

1. **Medicare Shared Savings Program (MSSP).** The MSSP provides incentives for health care providers to organize into ACOs as a means of providing coordinated, quality care to Medicare beneficiaries at a reduced cost. ACOs that meet quality performance benchmarks while saving costs may share in the savings. The ACA grants the HHS Secretary discretion to include electronic health record and electronic prescribing requirements in the MSSP.
2. **Patient-Centered Medical Homes.** The ACA authorizes funding for the creation of "health teams" that will support primary care providers and patient-centered medical homes. Methods of support include: (1) offering care coordination, care transition, disease management, and disease prevention services, (2) collecting and reporting quality data, and (3) facilitating EHR implementation that meets the Health Information Technology for Economic and Clinical Health Act's ("HITECH") "meaningful use" requirements.
3. **State Option to Provide Health Homes for Enrollees with Chronic Conditions.** States may offer health home services to Medicaid enrollees with a mental health condition, a substance use disorder, asthma, diabetes, heart disease, or obesity. The ACA defines health home services as including care management, care coordination, transitional care, and patient and family support services linked together by the use of health information technology.
4. **Hospital Readmissions Reduction Program (HRRP).** The HRRP imposes a financial penalty on hospitals that have high readmission rates for conditions specified by the HHS Secretary.

Ohio's Medicaid Managed Care

Ohio Medicaid has incorporated the use of managed care since 1978. Although Ohio has contracted with managed care plans since the late 1970s to provide care for certain Medicaid eligibles, the use of capitated rates was not given major emphasis in Ohio's program until the state received an 1115 demonstration waiver in January 1995. As one initiative of the federally approved OhioCare proposal, the state was given the freedom to require mandatory managed care enrollment by CFC Medicaid eligibles.

In FY 2004, Medicaid provided health care coverage to approximately 500,000 Ohioans per month through managed care. ODJFS contracted with six managed care providers that served 15 Ohio counties. Managed care membership was mandatory for the CFC population in four counties (Cuyahoga, Stark, Lucas, and Summit) and optional in the other 11 (Butler, Clark, Clermont, Franklin, Greene, Hamilton, Lorain, Montgomery, Pickaway, Warren, and Wood).

Am. Sub. H.B. 66 of the 126th General Assembly (the FY 2006-FY 2007 biennial budget) required MCPs be implemented in all counties and required ODJFS to designate the CFC population for participation.²⁴ The bill also required ODJFS to designate the participants not later than January 1, 2006. Not later than December 31, 2006, all designated participants were required to enroll in Medicaid MCPs. H.B. 66 also required ODJFS to implement the MCPs for certain aged, blind, and disabled Medicaid recipients in all counties. This requirement did not apply to: (1) individuals under age 21, (2) institutionalized individuals, (3) individuals eligible for Medicaid by spend-down, (4) dual eligibles, and (5) Medicaid waiver recipients. Not later than December 31, 2006, all designated participants were required to enroll in Medicaid MCPs. Prior to these mandated expansions in H.B. 66, Ohio Medicaid MCPs were limited to large metro areas and exclusively focused on the CFC population. The statewide expansion in H.B. 66 included rural areas such as Appalachia where access to health care can be difficult. And for the first time, the elderly population was included in managed care.

In FY 2010, Medicaid provided health care coverage to 173,000 CFC and 373,000 ABD per month through fee-for-service and 1.4 million CFC and 115,000 ABD per month through managed care.

As a result, this statewide expansion of Medicaid managed care that began in July 2005 has dramatically shifted expenditures from fee-for-service to the managed care. In FY 2012, expenditures for the managed care categories were \$6.4 billion and represented 44% of the total Medicaid service expenditures in the Office of Medical Assistance. In FY 2012, Ohio Medicaid provided health care coverage to 146,582 CFC and 90,389 ABD per month through fee-for-service and 1.5 million CFC and 127,793 ABD per month through managed care plans.

H.B. 153 of the 129th General Assembly (the FY 2012-FY 2013 biennial budget) further expanded managed care plan coverage to an even boarder population by requiring Ohio Medicaid (1) to implement Health Homes, (2) not later than July 1, 2012, to establish a pediatric accountable care organization (ACO) recognition system for children under age 21 who are blind or disabled, and (3) to implement the Integrated Care Delivery System (ICDS), now known as MyCare Ohio, that will coordinate the delivery of and be accountable for all covered Medicare and Medicaid services for participating dual enrollees. The details of each of the programs are provided as following:

²⁴ According to both state and federal regulations, managed care enrollment is optional for children receiving adoption assistance under the Federal Title IV-E Program, foster care assistance, or out-of-home placement.

Health Homes

Health Homes is a system under which Medicaid recipients with chronic conditions are provided with coordinated care. Beginning in October 2012, Ohio Medicaid received federal approval for enhanced federal match to pay for care coordination in serious and persistent mental illness (SPMI)-focused health homes. Under the new system, care managers in patient-centered medical homes provide intensive care coordination and develop an individualized care plan for each consumer to address both medical and nonmedical needs.

Health homes are an intense form of care management that includes a comprehensive set of services and meaningful use of health information technology. A health home can operate within FFS, managed care, or other service delivery systems. The ACA allows states to claim a 90% federal match for eight quarters for a defined set of care coordination services for individuals who are severely chronically ill or have multiple chronic conditions.

Pediatric Accountable Care Organizations

A pediatric accountable care organization provides pediatric accountable care for children under age 21 who are blind or disabled. The standards of recognition are to be the same as, or not conflict with, those adopted under the ACA. More than 37,000 children with special health care needs were transitioned to managed care in July 2013.

MyCare Ohio

In December 2012, ODJFS announced that Ohio had reached an agreement with CMS regarding the creation of an integrated care delivery system – otherwise known as "MyCare Ohio." MyCare Ohio allows care to be coordinated for individuals that are eligible for both Medicare and Medicaid. The goal of the program is to improve access to care and to improve quality of that care, as well as promoting participant independence within the community, eliminating cost shifting between the two programs, and achieving cost savings through care coordination. Services are provided in the setting of choice and individuals are able to transition to different settings as their needs change.

MyCare Ohio is a three-year demonstration project that covers 29 counties, which are grouped into seven regions. The counties covered are in the state's more metropolitan areas. Program enrollment began in the northeast region in May 2014 and continued with the remaining regions in June and July 2014. At least two managed care organizations in each region are contracting with the state and CMS to administer the program. These organizations must subcontract with Area Agencies on Aging (AAAs) and other entities to provide care coordination services such as information and referral, screening, pre-admission and resident review, long-term care consultations, and level of care determinations. Seven AAA and eight independent living centers

provided hands-on assistance during the enrollment process. The AAAs and the centers were able to contract with other local entities to help provide enrollment assistance counseling.

Eligible individuals are those that are 18 and older, meet requirements to receive full Medicare Parts A, B, and D and full Medicaid benefits, and live in a participating county. However, there are some individuals excluded from the program such as children, those enrolled in the Program for All-Inclusive Care for the Elderly (PACE), and those with a developmental disability. Under the program, individuals receive Medicare and Medicaid services and additional items and services at a capitated rate (Medicare and Medicaid will both contribute to this rate). Individuals enrolled in MyCare Ohio had until the end of calendar year 2014 to choose a MyCare Ohio plan for their Medicare benefits. However, while individuals have to receive their Medicaid benefits through MyCare Ohio, individuals have the option of choosing to continue receiving Medicare benefits in the same manner that they currently do.

There are currently about 182,000 dual eligible individuals in Ohio. As of December 31, 2014, over 100,000 of these individuals were enrolled onto MyCare.

Program of All-Inclusive Care for the Elderly

In addition to the MCPs mentioned above, Ohio Medicaid offers a unique managed type of program: the Program of All-Inclusive Care for the Elderly (PACE). PACE is authorized through the Medicaid State Plan and operated under an agreement with CMS.

PACE provides home and community-based care, allowing seniors to live in the community. There is currently one PACE site – McGregor PACE, which is located in Cleveland. Prior to August 2014, there were actually two PACE sites. The other site was Tri-Health Senior Link, which was located in Cincinnati. The site stopped providing services at the end of August 2014 and consumers were transitioned onto other waiver programs. The PACE sites provide participants with all of their needed health care, medical care, and ancillary services at a capitated rate. All PACE participants must be 55 years of age or older and qualify for a nursing home level of care. The PACE sites assume full financial risk for the care of the participants. Indeed, if PACE participants require nursing facility care, the PACE site continues to be responsible for the cost of the participant's care. Consequently, there is an incentive that a broad range of preventive and community-based services be provided as alternatives to more costly care.

Currently, ODA administers PACE; however, funding for services is provided by ODM. In FY 2014, PACE served an average of 717 consumers per month. In FY 2015, that number is anticipated to be 401 due to the elimination of the PACE site in Cincinnati. The monthly capitated rate for the Cleveland facility in FY 2014 and FY 2015

was/is \$2,394 for dual eligibles and \$3,553 for individuals enrolled only in Medicaid. The monthly capitated rate for the Cincinnati facility in FY 2014 was \$2,694 for dual eligibles and \$3,769 for Medicaid-only individuals.

Medicaid Provider Taxes

States have the authority to establish taxes to fund various activities. Sometimes states establish taxes to fund specific purposes. Other times, taxes may be credited to the states' general treasury to be used for any state purpose. One type of tax that is commonly relied on by many states to fund a portion of their share of Medicaid program costs is a tax on health care providers. These taxes, called provider taxes, are required to comport with certain federal laws established by Congress in 1991 and subsequent changes made in 2005, 2006, and 2008.

A vast majority of states use at least one provider tax to help finance Medicaid. Many of these states use the provider tax revenue to increase Medicaid payment rates for the class of providers, such as hospitals, responsible for paying the provider tax. This financing strategy allows states to fund increases to Medicaid payment rates without the use of state funds as the increased Medicaid payment rates are funded with provider tax revenue and federal Medicaid matching funds. States also use provider tax revenues to fund other Medicaid or non-Medicaid purposes. States first began using health care provider taxes to help finance the state's share of Medicaid expenditures in the mid-1980s. Some states were particularly aggressive in their use of provider taxes. As a result, in the early 1990s, the federal government imposed statutory and regulatory limitations on states' use of health care provider tax revenue to finance Medicaid.

With respect to provider-specific taxes, the federal law:

- Requires provider taxes be "broad-based" and uniformly applied to all providers within specified classes of providers – in other words, states cannot limit the provider taxes only to Medicaid providers; the same tax has to be imposed on all providers within a specified class of providers.
- Prohibits taxes that exceed 25% of the state (or nonfederal) share of Medicaid expenditures.
- Prohibits states from a direct or indirect guarantee that providers receive their money back (or be "held harmless") – in other words, hold the providers harmless for the cost of the provider tax.

For the purpose of claiming federal matching payments, the specified classes of providers used to ensure that tax programs are "broad-based" are those that provide the following:

- Inpatient hospital services;
- Outpatient hospital services;

- Nursing facility services;
- Services of intermediate care facilities for individuals with intellectual disabilities;
- Physicians' services;
- Home health care services;
- Outpatient prescription drugs;
- Services of Medicaid managed care organizations (including health maintenance organizations, preferred provider organizations, and such other similar organizations as the HHS Secretary may specify by regulation);
- Ambulatory surgical centers;
- Dental services;
- Podiatric services;
- Chiropractic services;
- Optometric/optician services;
- Psychological services;
- Therapist services;
- Nursing services;
- Laboratory and x-ray services;
- Emergency ambulance services; and
- Other health care items or services for which the state has enacted a licensing or certification fee.

While federal requirements allow states to impose provider taxes on 19 classes of health care providers, the classes of providers that are most often taxed include nursing facilities, hospitals, intermediate care facilities for individuals with intellectual disabilities (ICFs/IID), and managed care organizations.

Requiring that all providers within a class be taxed, as opposed to only Medicaid providers, dampened the ability of states to establish such taxes. The reason is that Medicaid providers could easily be held harmless by inflating Medicaid payments. Other providers could not be repaid so simply, and therefore would be more likely to oppose the imposition of such taxes.

Changes to law include a provision in the Deficit Reduction Act of 2005 (DRA, P.L. 109-171), which altered one of the specified classes of providers. The "Medicaid managed care organizations" class was changed to all "managed care organizations."

The Tax Relief and Health Care Act of 2006 (TRHCA, P.L. 109-432) included a provision changing the rules exempting taxes from scrutiny of their hold harmless

provisions. The rule changed the threshold under which tax programs could avoid scrutiny of hold harmless provisions from 6% of a taxpayer's revenue to 5.5% for fiscal years beginning on or after January 1, 2008, through September 30, 2011. In addition, the regulation further specified that the revenues against which the 5.5% threshold should be applied are "net operating revenues." The former regulation had not specified the type of revenues against which to apply the threshold test. On October 1, 2011, the threshold reverted to 6% of net patient service revenues.

Ohio's Medicaid Provider Taxes

In addition to funding from the GRF, several provider tax programs and other special revenues are used to pay for Medicaid services. The revenues from the provider taxes mentioned below are appropriated in ODM's budget although some of the revenues are transferred to the other state agencies that also administer Medicaid programs.

Nursing Facility Franchise Permit Fees

ODM is required to assess an annual franchise permit fee on each long-term care bed in a nursing home or hospital. Until July 1, 2001, the amount of the fee was \$1 for each bed multiplied by the number of days in the fiscal year for which the fee is assessed. The fee was applied to: (1) nursing home beds, (2) Medicare-certified skilled nursing facility beds, (3) Medicaid-certified nursing facility beds, and (4) beds in hospitals that are registered as skilled nursing facility beds or long-term care beds, or licensed as nursing home beds.

Am. Sub. H.B. 94 of the 124th General Assembly (the FY 2002-FY 2003 biennial budget) raised the franchise permit fee to \$3.30 for FY 2002 and FY 2003. Am. Sub. S.B. 261 of the 124th General Assembly (the FY 2002-FY 2003 corrective bill) raised the franchise permit fee to \$4.30 for FYs 2003 through 2005, a \$1.00 per bed per day increase for FY 2003, and a \$3.30 per bed per day increase for FY 2004 and FY 2005. Am. Sub. H.B. 66 of the 126th General Assembly (the FY 2006-FY 2007 biennial budget) increased the fee to \$6.25 for FY 2006 and FY 2007. H.B. 119 of the 127th General Assembly (the FY 2008-FY 2009 biennial budget) maintained the fee at \$6.25 for FY 2008 and FY 2009. H.B. 1 of the 128th General Assembly (the FY 2010-FY 2011 biennial budget) increased the fee to \$12.01 for FY 2010 and \$11.95 for FY 2011.

H.B. 153 of the 129th General Assembly kept the nursing facility franchise fee at about \$11.38 in FY 2012 and \$11.60 in FY 2013 in order to maximize federal reimbursement for nursing facility services. H.B. 59 of the 130th General Assembly (the FY 2014-FY 2015 biennial budget) requires, effective July 1, 2013, the franchise permit fee rate to be determined each fiscal year by the formula specified in the statute. The franchise fees for FY 2015 are calculated to be \$12.10 for all licensed beds.

ICF/IID Franchise Permit Fees

ICFs/IID are required to pay a franchise permit fee. Beginning August 1, 2009, developmental centers (ICFs/IID that ODODD operates) are also subject to the franchise permit fee. Revenue raised by the franchise permit fee is to be used for the expenses of the programs ODODD administers and ODODD's administrative expenses.

The franchise permit fee for ICFs/IID, at \$9.63 per bed per day, was unchanged from FY 2002 through FY 2007. H.B. 119 of the 127th General Assembly did not change the amount of the ICF/IID franchise permit fee, but added an annual composite inflation factor adjustment. H.B. 562 of the 127th General Assembly increased the franchise permit fee on ICFs/IID to \$11.98 effective July 1, 2008. H.B. 1 of the 128th General Assembly maintained the fee at \$11.98 until August 1, 2009. The fee was raised to \$14.75 for the period beginning August 1, 2009, and ending June 30, 2010. For FY 2011, the fee was lowered to \$13.55. H.B. 153 of the 129th General Assembly set the ICFs/IID franchise permit fee rate at \$17.99 for FY 2012 and \$18.32 for FY 2013 and thereafter. H.B. 59 of the 130th General Assembly sets the rate for the franchise permit fee charged ICFs/IID at \$18.24 for FY 2014 and \$18.17 for FY 2015 and thereafter.

Managed Care Assessments

H.B. 66 of the 126th General Assembly required each Medicaid health insuring corporation to pay a franchise permit fee for each calendar quarter between January 1, 2006, and June 30, 2007, to help offset the statewide CFC managed care expansion that biennium. The fee was 4.5% of the managed care premiums the health insuring corporation received in the applicable calendar quarter, unless (1) ODM adopted rules decreasing the percentage or increasing it to not more than 6%, or (2) the fee was reduced or terminated to comply with federal law or because the fee did not qualify for matching federal funds.

Am. Sub. S.B. 190 of the 126th General Assembly changed the effective date of the managed care plan assessment from January 1, 2006 to December 1, 2005. The Medicaid managed care assessment continued for the FY 2008-FY 2009 biennium, and the managed care assessment fee was increased from 4.5% to 5.5% on July 1, 2008.

The money collected from the franchise permit fee was used to pay for Medicaid services, administrative costs, and contracts with Medicaid health insuring corporations. Under prior federal law, Medicaid managed care organizations were identified as a separate class of providers, and were therefore not subject to the provisions of the Social Security Act that require provider-based taxes to be broad-based in nature. However, effective October 1, 2009, the Deficit Reduction Act of 2005, removed this distinction for Medicaid managed care organizations. Accordingly, Ohio's Medicaid managed care franchise fee was terminated.

To replace the \$194 million in revenue generated from the managed care franchise fee to the state, as well as the resulting federal match received when these funds would be used to pay for Medicaid services (roughly \$550 million including both state and federal shares), H.B. 1 of the 128th General Assembly (the FY 2010-FY 2011 biennial budget) requires managed care organizations (MCOs) to be subjected to the state sales and use tax and to the existing health insuring corporation (HIC) tax on payments received from the state to provide Medicaid services. MCOs were previously exempted from the latter tax. The total tax rate is about 7.7% (5.5% state sales tax, 1.2% average local sales tax, and 1.0% HIC tax). To cover the MCOs' tax costs, the state-contracted actuary adds to the capitated rate an amount equal to the taxes assessed on MCOs. MCOs pay the taxes back to the state when the taxes are assessed.²⁵ The state deposits most of the state sales and HIC tax receipts into the GRF. A small portion (5.9%) of the state sales and HIC tax revenues are diverted to the Local Government Fund (3.68%) and the Public Libraries Fund (2.22%), and then disbursed to counties and public libraries. Counties receive the local sales tax revenue based on the residence of Medicaid clients covered by the MCOs.

The state's cost of the tax included in the capitated rate is considered an allowable cost under federal Medicaid law and is therefore eligible for federal Medicaid reimbursement. If the initial draw of federal reimbursement on the cost of taxes were spent entirely on Medicaid services, it would constitute the state share and earn additional federal reimbursement. In the end, revenue from the collection of taxes and earned federal reimbursement offset the cost of the taxes and result in a net gain to the GRF.

Hospital Care Assessments

H.B. 1 of the 128th General Assembly created a hospital assessment to raise money to help pay for the Medicaid Program. The assessment was collected over the course of three payments during each year of 2010 and 2011 as follows:

1. 28% of a hospital's assessment for a year is due on the last business day of October;
2. 31% is due on the last business day of February; and
3. 41% is due on the last day of May.

The percentage of a hospital's total facility costs that was to be the hospital's assessment for the first year of the assessment is 1.52%. The percentage to be used for

²⁵ HIC tax payments are due in March for services provided in the previous calendar year. State and local sales taxes are collected on an ongoing basis.

the second and successive years was 1.61%. This fee is separate from the established assessment fee under the Health Care Assurance Program (HCAP).

The amount of a hospital's assessment for a year is to equal a percentage of the hospital's total facility costs. A hospital's total facility costs are the hospital's total costs for all care provided to all patients, including the direct, indirect, and overhead costs to the hospital of all services, supplies, equipment, and capital related to the care of patients, regardless of whether patients are enrolled in a health insuring corporation. However, total facility costs exclude all of the following costs: skilled nursing services provided in distinct-part nursing facility units, home health services, hospice services, ambulance services, renting durable medical equipment, and selling durable medical equipment. And, the ODM Director is permitted to adopt rules to exclude certain program costs from a hospital's total facility costs. The amount of a hospital's total facility costs is to be derived from cost-reporting data for the hospital submitted to ODM for purposes of HCAP. The cost-reporting data used to determine a hospital's assessment is subject to the same type of adjustments made to the data under HCAP.

Effective October 14, 2010, the following changes were made to the hospital assessment due to an Executive Order:

1. Changing the basis upon which hospitals are assessed, by removing Medicare costs from the calculation of each hospital's total facility costs;
2. Lowering the assessment rate for the second year to 1.38%; and
3. Delaying the collection of the October hospital franchise fee payment until November 30, 2010.

H.B. 153 of the 129th General Assembly continued the assessments imposed on hospitals for two additional years, ending October 1, 2013, rather than October 1, 2011. H.B. 153 required ODJFS to adopt rules specifying the percentage of hospitals' total facility costs that hospitals are to be assessed. A hospital's total facility costs are derived from cost-reporting data submitted to ODJFS for purposes of HCAP. The estimated assessment rate for FY 2013 is about 2.67%. H.B. 153 also allowed ODJFS to establish a different payment schedule in rules in order to reduce hospitals' cash flow difficulties. It required ODJFS to impose a penalty of 10% of the amount due on any hospital that fails to pay its assessment by the due date.

H.B. 59 continued the assessments imposed on hospitals for two additional years, ending October 1, 2015, rather than October 1, 2013.

Hospital Care Assurance Program

The federal government requires state Medicaid programs to make subsidy payments to hospitals that provide uncompensated, or charity, care to low-income and uninsured individuals at or below 100% FPL under the Disproportionate Share Hospital (DSH) Program. HCAP is the system Ohio uses to comply with the DSH Program

requirement. Under HCAP, hospitals are assessed an amount based on their total facility costs, and government hospitals make intergovernmental transfers to ODM. ODM then redistributes back to hospitals money generated by the assessments, intergovernmental transfers, and federal matching funds based on uncompensated care costs. In federal fiscal year (FFY) 2010, HCAP collected \$208 million from Ohio hospitals, matched it with federal dollars, and redistributed \$568 million back to the hospitals.

ARRA provided additional fiscal relief to states by increasing most states' FFY 2009 and FFY 2010 Medicaid DSH allotments by 2.5%. As a result, Ohio received about an additional \$20.1 million in DSH allotments.

Under ACA, the federal DSH allotments to states were to be reduced starting in 2014. From FFY 2009 forward, state DSH allotments equal the prior year amount increased by the change in the consumer price index for all urban consumers. That overall amount will increase over time under the current formula until 2014, when there should be fewer uninsured people as a result of ACA. Thus, there may be less need for Medicaid DSH payments going forward. Under ACA, there will be specific reductions in overall DSH allotments by year that must be implemented by the Secretary of Health and Human Services. ACA required the Secretary to use certain general parameters and develop a methodology to achieve specific reductions.

Source: General Revenue Fund

Legal Basis: Sections 323.10 through 323.10.50, 323.10.63, and 323.50 of Am. Sub. H.B. 59 of the 130th G.A.

Purpose: This line item funds the Ohio Department of Medicaid's (ODM) operating expenses. Beginning in FY 2014, the state share of administrative funding previously appropriated in GRF line items 600321, Program Support, 600416, Information Technology Projects, 600417, Medicaid Provider Audits, 600425, Health Care Programs, and 600525, Health Care/Medicaid, all used by the Ohio Department of Job and Family Services (ODJFS), is appropriated in this line item. Additionally, the state share of administrative funding from non-GRF line items 600639, Health Care/Medicaid Support - Recoveries, 600629, Health Care Program and DDD Support, and 600608, Long-Term Care Support, also used by ODJFS, is also consolidated into this line item. As a result, line item 651425 exists as a purely administrative, purely state share GRF line item. The associated federal match is appropriated in line item 651624, Medicaid Program Support - Federal, along with the federal match for administrative activities previously funded from 600623, Health Care Federal.

Department of Medicaid

Legal Basis: Sections 323.10, 323.10.10, 323.10.20, 323.10.60, 323.10.63, 323.20, 323.50, 323.60, 323.100, 323.103, 323.150, 323.170, and 323.310 of Am. Sub. H.B. 59 of the 130th G.A.

Purpose: This line item reimburses health care providers for covered services to Medicaid recipients. Beginning in FY 2014, this line item replaced GRF line item 600525, Health Care/Medicaid, which was under the Department of Job and Family Services. It is used for the same purpose except that the costs of administrative activities and health care related contracts such as eyeglass purchases, inpatient hospital peer review, enrollment information centers, and contracted case management are not funded through this line item. The federal earnings on the payments that are made entirely from this line item are deposited as revenue into the GRF.

Spending from this line item generally can be placed into one of several major service categories: Managed Care Plans, Nursing Facilities (NFs), Hospital Services, Prescription Drugs, Physician Services, Medicare Buy-In, Ohio Home Care Waiver, Department of Aging-administered programs (PASSPORT, Assisted Living, and PACE service costs), and All Other Care. The majority of expenditures from this line item earn the regular Federal Medical Assistance Percentage (FMAP) reimbursement rate at approximately 64%, although family planning expenditures earn an enhanced 90% federal participation rate, and a portion of the buy-in premium payments are state funds only. Expenditures for the State Children's Health Insurance Program (SCHIP) from this line item earn an enhanced federal participation rate of approximately 74%.

In H.B. 64 of the 131st G.A., As Introduced, the expenditures for covering the Medicaid expansion population will be reimbursed out of this line item. During FY 2016, federal funds will provide 100% of the expenditures associated with covering this population. In January of FY 2017, federal funds will provide 95% of these expenditures and the state will provide the remaining 5%. In the current biennium, federal line item 651623, Medicaid Services - Federal (Fund 3F00), is used to reimburse for expenditures related to this population.

Source: General Revenue Fund

Legal Basis: Sections 323.10, 323.10.10, and 323.150 of Am. Sub. H.B. 59 of the 130th G.A.

Purpose: This GRF line item is used for the phased-down state contribution, otherwise known as the clawback payment, under the Medicare Part D requirements contained in the federal Medicare Prescription Drug, Improvement, and Modernization Act (MMA) of 2003. The clawback is a monthly payment made by each state to the federal Medicare Program. The amount of each state's payment roughly reflects the expenditures of its own funds that the state would have made if it continued to pay for outpatient prescription drugs through Medicaid on behalf of dual eligibles (individuals eligible for both Medicare and Medicaid). Prior to FY 2014, funds for this purpose were provided for in GRF line item 600526, Medicare Part D, which was used by the Ohio Department of Job and Family Services.

Source: Federal Fund Group: CFDA 93.778 Medical Assistance Grants (Medicaid); CFDA 93.779, Health Care Financing Research, Demonstrations and Evaluations; and the federal share of drug rebates and other Medicaid revenues

Legal Basis: ORC 5162.50; Sections 323.10, 323.10.60, 323.100, 323.103, and 323.190 of Am. Sub. H.B. 59 of the 130th G.A.

Purpose: This line item provides the Medicaid federal share when the state share is provided from a source other than GRF line item 651525, Medicaid/Health Care Services, GRF line item 651425, Medicaid Program Support – State, or line item 651682, Health Care Grants – State. Major activities in this line item include the federal share of nursing facility, hospital, prescription drug expenditures, and general Medicaid services. Prior to FY 2014, funds for this purpose were provided for in federal line item 6000623, Health Care Federal, which was used by the Ohio Department of Job and Family Services.

In FY 2014 and FY 2015, this line item is also used to provide reimbursements for expenditures relating to the Medicaid expansion population. In H.B. 64 of the 131st G.A., As Introduced, line item 651525, Medicaid/Health Care Services, will instead be used to reimburse for costs associated with covering this population.

Legal Basis: ORC 5162.50; Sections 323.10 through 323.10.63 of Am. Sub. H.B. 59 of the 130th G.A.

Purpose: This line item provides for the federal share of Medicaid administrative expenses while the state share of these expenditures is provided mostly from GRF line item 651425, Medicaid Program Support – State. This line item also includes contracts previously funded through GRF line item 600525, Health Care/Medicaid, and the federal share of other administrative spending previously funded through line items 600623, Health Care Federal, 600321, Program Support, and 600416, Information Technology Projects.

3G50 651655 Medicaid Interagency Pass-Through

FY 2012 Actual	FY 2013 Actual	FY 2014 Actual	FY 2015 Estimate	FY 2016 Introduced	FY 2017 Introduced
\$0	\$0	\$1,084,811,781	\$1,895,403,348	\$91,400,000	\$91,406,000
	N/A	N/A	74.7%	-95.2%	0.0%

Source: Federal Fund Group: CFDA 93.658, State Survey and Certification of Health Care Providers and Suppliers; CFDA 93.778, Medical Assistance Program (Medicaid: Title XIX); CFDA 93.777 Children's Health Insurance Program

Legal Basis: Sections 323.10, 323.10.10, 323.10.20, 323.10.30, 323.10.50, 323.10.63, and 323.220 of Am. Sub. H.B. 59 of the 130th G.A.

Purpose: This line item is used to disburse federal reimbursement to other agencies for Medicaid expenditures they have made. Prior to FY 2014, funds for this purpose were provided for in federal line item 600655, Interagency Reimbursement, which was used by the Ohio Department of Job and Family Services.

The departments of Aging, Developmental Disabilities, Health, Job and Family Services, and Mental Health and Addiction Services assist ODM in administering certain Medicaid programs/services and receive federal reimbursements, for services provided and related administration, from line item 651655. Line item 651655, is appropriated so that these transfers may occur. In addition, line items within these agencies, that receive transferred funds, are also appropriated so that expenditures can occur out of these line items as well. So, in effect, appropriations for these transfers are in ODM's budget and the receiving agency's budget. H.B. 64 of the 131st G.A., As Introduced, corrects this and allocates federal reimbursements related to services to the applicable state agency only. However, reimbursements related to administration remain in this line item.
