### Detailed Fiscal Analysis

The bill creates a statewide Blue Alert Program, a statewide system designed to rapidly disseminate information to speed the apprehension of persons suspected of killing or seriously injuring law enforcement officers and also to aid in the location of missing law enforcement officers. Presumably the Blue Alert Program will use the existing infrastructure for the statewide emergency alert program and, therefore, will not result in more than a negligible increase in costs for the state to implement the program. The same is likely the case for any local governments that need to activate the alert.
